

1

00:00:00,220 --> 00:00:05,479

I'm Ian Ziering, Fin from Sharknado, and
Inside KSC this week, we have some stories

2

00:00:05,479 --> 00:00:08,680

with some real bite!

3

00:00:08,680 --> 00:00:09,700

That's right Ian!

4

00:00:09,700 --> 00:00:14,490

NASA assigned four veteran astronauts with
test pilot experience to train for the first

5

00:00:14,490 --> 00:00:18,109

flight tests aboard Commercial Crew spacecraft.

6

00:00:18,109 --> 00:00:23,890

Bob Behnken, Eric Boe, Doug Hurley and Suni
Williams will work shoulder-to-shoulder with

7

00:00:23,890 --> 00:00:29,449

Boeing and SpaceX as the companies finalize
their systems. The agency will select crew

8

00:00:29,449 --> 00:00:33,450

members from this group to fly the first test
flights in 2017.

9

00:00:33,450 --> 00:00:39,620

The New Horizons spacecraft flew past Pluto
right on time this week - more than nine years

10

00:00:39,620 --> 00:00:41,640

after launching from here.

11

00:00:41,640 --> 00:00:47,210

KSC's Launch Services Program executed the
flawless processing and liftoff of the spacecraft

12

00:00:47,210 --> 00:00:51,150

aboard an Atlas V rocket in 2006.

13

00:00:51,150 --> 00:00:53,640

Well that's this week's episode of "Inside
KSC."

14

00:00:53,640 --> 00:00:57,940

This one's over, but we're never Fin-ished
here.
