

1

00:00:00,359 --> 00:00:07,990

Hello I'm Dava Newman at Kennedy Space Center,
lets go Inside KSC.

2

00:00:07,990 --> 00:00:09,500

Thanks Dava!

3

00:00:09,500 --> 00:00:14,169

Kennedy officials cut the ribbon on a new
launch pad dedicated to the needs of small-class

4

00:00:14,169 --> 00:00:16,520

launch vehicles.

5

00:00:16,520 --> 00:00:23,040

Dubbed Pad 39C, the area is inside the 39B
complex perimeter and will host the liftoffs

6

00:00:23,040 --> 00:00:28,340

of rockets carrying small payloads such as
cubesats into orbit.

7

00:00:28,340 --> 00:00:33,330

A NASA instrument called EPIC snapped a photo
of the full sunlit-face of Earth from a million

8

00:00:33,330 --> 00:00:38,010

miles away as part of the DSCOVR mission.

9

00:00:38,010 --> 00:00:42,930

The DSCOVR spacecraft launched from Kennedy
earlier this year and has taken position 1

10

00:00:42,930 --> 00:00:48,820

million miles away to constantly assess conditions
on the Sun and Earth for NOAA.
