

1

00:00:00,190 --> 00:00:08,349

Hey I'm NASA Kennedy's Trent Smith, and I'm taking you Inside KSC!

2

00:00:08,349 --> 00:00:12,589

Astronauts on the International Space Station for the first time ate lettuce grown in space

3

00:00:12,589 --> 00:00:18,230

this week, a precursor step to feeding crews on long missions to deep space destinations

4

00:00:18,230 --> 00:00:19,570

such as Mars.

5

00:00:19,570 --> 00:00:24,730

Veggie, as the project is called, is run from Kennedy and researchers here operated a ground

6

00:00:24,730 --> 00:00:29,200

control lettuce-growing operation that will be used to compare the results from the space-grown

7

00:00:29,200 --> 00:00:30,140

lettuce.

8

00:00:30,140 --> 00:00:35,780

The Emergency Response Team at Kennedy worked recently with the Aviation unit at the center

9

00:00:35,780 --> 00:00:39,460

to practice techniques designed for a changing world of threats.

10

00:00:39,460 --> 00:00:45,039

Covering more than 144,000 acres, Kennedy's spaceport requires mobility and expertise

11

00:00:45,039 --> 00:00:49,420

from its protective forces and the teams spend  
a good deal of their time rehearsing for a

12

00:00:49,420 --> 00:00:52,039

wide range of scenarios.
