

1  
00:00:00,000 --> 00:00:02,640  
Hi I'm NASA Kennedy's Jon Cowart,

2  
00:00:02,640 --> 00:00:05,180  
lets' go inside KSC.

3  
00:00:06,700 --> 00:00:10,020  
Dozens of baby alligators were re-introduced to their

4  
00:00:10,020 --> 00:00:12,240  
swampland homes at Kennedy after wildlife

5  
00:00:12,240 --> 00:00:16,500  
researchers lifted the eggs from the nest earlier this year for care and study.

6  
00:00:16,500 --> 00:00:21,340  
The study is an important aspect of research at Kennedy because the gators

7  
00:00:21,340 --> 00:00:22,900  
are the top of the local food

8  
00:00:22,900 --> 00:00:24,980  
chain and their health has broad implications

9  
00:00:24,980 --> 00:00:27,820  
for the local environment and even human health.

10  
00:00:28,440 --> 00:00:31,440  
Boeing raised a new mural on the High Bay of the Commercial Crew

11  
00:00:31,440 --> 00:00:34,140  
and Cargo Processing Facility at Kennedy,

12  
00:00:34,140 --> 00:00:37,060  
where it will process its CST-100 spacecraft.

13  
00:00:37,060 --> 00:00:39,660

Workers placed a detailed illustration over the

14

00:00:39,660 --> 00:00:42,840

former Orbiter Processing Facility that shows a CST-100

15

00:00:42,840 --> 00:00:45,380

passing over Florida as seen from space.

16

00:00:45,380 --> 00:00:47,800

Boeing and SpaceX are working with NASA's

17

00:00:47,800 --> 00:00:51,340

commercial crew program to develop the next generation of spacecraft

18

00:00:51,340 --> 00:00:53,880

to carry astronauts to the International Space Station

19

00:00:53,880 --> 00:00:55,840

from Florida's Space Coast.
