

**Umbilical Placed at LETF**

1

00:00:00,390 --> 00:00:02,230

Hey, I'm Steve Lander of Kennedy Space Center

2

00:00:02,230 --> 00:00:03,699

lets go Inside KSC!

3

00:00:07,459 --> 00:00:10,400

The massive Space Launch System rocket, a booster that rivals

4

00:00:10,500 --> 00:00:16,320

the power of the mighty Saturn V, requires modernized platforms and other fixtures.

5

00:00:16,320 --> 00:00:20,279

Some of those new platforms sit just outside the VAB where workers

6

00:00:20,279 --> 00:00:24,789

are putting the finishing touches on them before they are installed.

7

00:00:24,789 --> 00:00:28,619

Preparations also are under way at the Launch Equipment Test Facility

8

00:00:28,619 --> 00:00:32,840

where the Interim Cryogenic Upper Stage umbilical is being installed for evaluation

9

00:00:32,840 --> 00:00:35,980

before it is taken to the Mobile Launcher.

10

00:00:35,980 --> 00:00:37,109

And remember,
