

1
00:00:00,340 --> 00:00:02,389
Hello, I'm Rachel Cox of Kennedy Space Center

2
00:00:02,389 --> 00:00:04,670
and this is Inside KSC!

3
00:00:07,180 --> 00:00:10,380
Students at Kennedy and around the nation
on the Digital Learning Network

4
00:00:10,390 --> 00:00:12,610
heard from cast members of "The Martian"

5
00:00:12,610 --> 00:00:15,349
and their real-life counterparts during a
session detailing the NASA

6
00:00:15,349 --> 00:00:18,000
science behind the hit movie.

7
00:00:18,000 --> 00:00:21,810
From the real-life possibilities of growing
food on Mars to the challenges

8
00:00:21,810 --> 00:00:25,630
of mounting a rescue mission, the audience
was able to find out about the work

9
00:00:25,630 --> 00:00:28,949
going into NASA's journey to Mars.

10
00:00:28,949 --> 00:00:32,109
Workers began the structural construction
phase for the Central Campus building.

11
00:00:32,109 --> 00:00:36,980
A tower crane has been erected at the site
just north of the existing headquarters

12

00:00:36,980 --> 00:00:41,230

for the lifting required to build the new,
seven-story structure.

13

00:00:41,230 --> 00:00:43,980

Once finished, the Central Campus will provide
an efficient,

14

00:00:43,980 --> 00:00:47,399

environmentally friendly headquarters for
the center.

15

00:00:47,399 --> 00:00:48,250

And remember,
