

Bob Behnken

Commercial Crew Astronaut

1

00:00:00,329 --> 00:00:05,120

Hey! I'm NASA Kennedy's Skyler Kleinschmidt,
taking YOU Inside KSC!

2

00:00:05,120 --> 00:00:12,480

The sharp minds behind Kennedy's transition
and numerous technological advancements held

3

00:00:12,480 --> 00:00:16,270

center stage recently during the center's
annual Innovation Expo.

4

00:00:16,270 --> 00:00:20,600

Kennedy's work force and the general public
were treated to details about the inner workings

5

00:00:20,600 --> 00:00:25,189

of KSC, and plans for bringing in new businesses.

6

00:00:25,189 --> 00:00:29,980

Bob Behnken and Suni Williams, two of the
four astronauts selected to work closely with

7

00:00:29,980 --> 00:00:34,510

Commercial Crew Program providers Boeing and
SpaceX, offered a number of details about

8

00:00:34,510 --> 00:00:36,040

the program during a live NASA event.

9

00:00:36,040 --> 00:00:41,160

My elevator pitch for NASA and
the Commercial Crew Program is that we're

10

00:00:41,160 --> 00:00:45,130

really trying to develop new vehicles to give
us an alternative to the Soyuz for transportation

11

00:00:45,130 --> 00:00:48,620

to the space station. It's really important
to have that capability out of the United

12

00:00:48,620 --> 00:00:51,600

States and we're looking forward to the days
when that happens.
