

DRAGON

SPACEX

1
00:00:00,370 --> 00:00:01,480
Happy Halloween!

2
00:00:01,480 --> 00:00:03,360
I'm NASA Kennedy's Joshua Santora,

3
00:00:03,360 --> 00:00:05,740
taking you Inside KSC!

4
00:00:07,789 --> 00:00:10,170
Astronauts Scott Kelly and Kjell Lindgren
conducted a spacewalk

5
00:00:10,170 --> 00:00:13,080
on Wednesday to outfit the International Space
Station

6
00:00:13,080 --> 00:00:16,340
for the next generation of human-rated spacecraft.

7
00:00:16,340 --> 00:00:19,310
The spacewalkers moved cables into place for
a docking mechanism

8
00:00:19,310 --> 00:00:22,220
to be used by NASA partners Boeing and SpaceX

9
00:00:22,220 --> 00:00:24,610
when their spacecraft bring astronauts to
the station

10
00:00:24,610 --> 00:00:27,000
in the near future.

11
00:00:27,000 --> 00:00:30,110
A Cygnus spacecraft built by Orbital ATK has
been loaded

12

00:00:30,110 --> 00:00:32,809
with more than three tons of supplies and
equipment

13
00:00:32,809 --> 00:00:35,649
bound for the International Space Station.

14
00:00:35,649 --> 00:00:38,190
Now connected to a service module at Kennedy,

15
00:00:38,190 --> 00:00:39,850
the complete Cygnus will launch aboard a

16
00:00:39,850 --> 00:00:43,289
United Launch Alliance Atlas V in December.
