

1

00:00:00,690 --> 00:00:07,660

Hi, I'm Commercial Crew Astronaut Suni Williams taking you Inside KSC!

2

00:00:07,660 --> 00:00:11,599

Astronaut Bill Shepard and cosmonauts Yuri Gidzenko and Sergei Krikalev moved in to the

3

00:00:11,599 --> 00:00:15,379

International Space Station 15 years ago this week.

4

00:00:15,379 --> 00:00:20,120

Docking with the core elements of the outpost, including the Unity node delivered by Kennedy's

5

00:00:20,120 --> 00:00:25,500

own Bob Cabana, the three residents turned on systems and conducted experiments off the

6

00:00:25,500 --> 00:00:28,660

Earth for the benefit of all those on the Earth.

7

00:00:28,660 --> 00:00:33,839

Kennedy's work processing and launching module after module helped transform the fledgling

8

00:00:33,839 --> 00:00:39,280

apartment in space into a working, cutting-edge laboratory with abilities offered nowhere

9

00:00:39,280 --> 00:00:40,870

on Earth.

10

00:00:40,870 --> 00:00:44,980

NASA's Commercial Crew Program will allow more research to take place in space with

11

00:00:44,980 --> 00:00:49,569

the addition of another astronaut to the space station residence.

12

00:00:49,569 --> 00:00:54,229

Cargo resupply missions remain vital to the space station and to making possible an array

13

00:00:54,229 --> 00:00:58,999

of experimentation including research for deep-space missions.
