1

00:00:00,240 --> 00:00:07,029

Hey I'm NASA Kennedy's Brittney Mostert taking you Inside KSC.

2

00:00:07,029 --> 00:00:11,790

Jason-3 is now in orbit around the Earth adding to the record of sea measurement data that

3

00:00:11,790 --> 00:00:17,109

stretches back some 23 years following a fog-covered liftoff and ascent from Vandenberg Air Force

4

00:00:17,109 --> 00:00:19,730

Base on January 17.

5

00:00:19,730 --> 00:00:24,640

NASA's Launch Services Program, based at Kennedy, managed the NOAA-mission's launch which was

6

00:00:24,640 --> 00:00:29,320

only the second flight from Vandenberg of SpaceX's Falcon 9 rocket.

7

00:00:29,320 --> 00:00:35,020

The Pressurized Cargo Module of an Orbital ATK Cygnus cargo-carrier spacecraft arrived

8

00:00:35,020 --> 00:00:38,910

at Kennedy on Friday to begin processing for launch in March.

9

00:00:38,910 --> 00:00:43,190

As a similar spacecraft did last year, the Cygnus will fly to the International Space

10

00:00:43,190 --> 00:00:49,670

Station aboard a United Launch Alliance Atlas V rocket from Space Launch Complex 41.
