

INSIDE  
KSC!

1

00:00:00,359 --> 00:00:05,999

Hi I'm NASA Kennedy's Rich Johanboeke, taking you Inside KSC!

2

00:00:07,720 --> 00:00:12,000

Kennedy's firefighters practiced in realistic conditions for an emergency they hope to never

3

00:00:12,009 --> 00:00:13,530

face in real life.

4

00:00:13,530 --> 00:00:18,320

Working with a mock-up airplane fuselage, firefighters battled a deliberately set blaze

5

00:00:18,320 --> 00:00:21,260

to refine their approach to extinguishing a real fire.

6

00:00:22,410 --> 00:00:27,600

The grounds outside the Vehicle Assembly Building continue to echo with welding and other activities

7

00:00:27,600 --> 00:00:32,080

as platforms designed for the Space Launch System rocket arrive for installation.

8

00:00:33,120 --> 00:00:38,300

Once installed, the platforms will form 10 levels for engineers and technicians to prep

9

00:00:38,300 --> 00:00:43,530

the large rocket for launches carrying astronauts to deep space destinations and eventually

10

00:00:43,530 --> 00:00:44,450

Mars.
