

1

00:00:00,360 --> 00:00:03,576

Hi I'm NASA Kennedy's Dawn Brush taking you Inside KSC

2

00:00:06,660 --> 00:00:11,440

Two pathfinder, or test versions, of solid rocket booster segments for NASA's Space

3

00:00:11,450 --> 00:00:14,849

Launch System rocket recently arrived at the Kennedy Space Center.

4

00:00:14,849 --> 00:00:18,680

The inert booster segments were delivered to the spaceport's Rotation, Processing and

5

00:00:18,680 --> 00:00:23,740

Surge Facility. Inside, the segments were offloaded and inspected for pathfinder operations

6

00:00:23,740 --> 00:00:28,070

as NASA prepares for the first SLS launch, Exploration Mission-1.

7

00:00:28,070 --> 00:00:33,350

On March 1, NASA astronaut Scott Kelly and Russian cosmonaut Mikhail Kornienko returned

8

00:00:33,350 --> 00:00:37,309

to Earth after a year aboard the International Space Station. The mission focused on how

9

00:00:37,309 --> 00:00:41,339

future missions into deep space would affect flight crews.

10

00:00:41,339 --> 00:00:45,199

Resupply spacecraft launched from Florida during Kelly's year in space included more

11

00:00:45,199 --> 00:00:51,390

than 520 parts and systems, not counting hardware
for scientific research. Kelly successfully

12

00:00:51,390 --> 00:00:55,850

grew lettuce with Kennedy's Veggie experiment,
and later added color growing zinnias that
