

INSIDE
KSOA

1

00:00:00,240 --> 00:00:05,300

Hi I'm NASA Kennedy's Tori McLendon and I'm taking you Inside KSC.

2

00:00:07,169 --> 00:00:12,419

The flame trench at Launch Pad 39B is being strengthened to withstand the power of the

3

00:00:12,419 --> 00:00:18,449

agency's next-generation heavy-lift rocket, the Space Launch System. The concrete surroundings

4

00:00:18,449 --> 00:00:23,960

have been repaired, an improved epoxy has been applied, and teams are installing an

5

00:00:23,960 --> 00:00:27,429

all-new heat-resistant brick lining.

6

00:00:27,429 --> 00:00:32,310

The flame trench allows a safe escape for the fiery exhaust generated during liftoff.

7

00:00:32,310 --> 00:00:38,540

Kennedy is celebrating the 46th annual Earth Day with two days of activities for employees

8

00:00:38,540 --> 00:00:44,120

and visitors to the Kennedy Space Center Visitor Complex. About 50 exhibitors from around the

9

00:00:44,120 --> 00:00:49,440

country will share their sustainability tips - from recycling to sustainable gardening

10

00:00:49,440 --> 00:00:51,230

to electric cars.

11

00:00:51,230 --> 00:00:54,870

Our planet is changing. We're on it.
