

CASSINI-HUYGENS

WARNING
ORANGE
INSTALLED

1

00:00:00,200 --> 00:00:04,776

Hey I'm NASA Kennedy's Jennifer Horner taking you Inside KSC.

2

00:00:08,342 --> 00:00:10,860

The Vehicle Assembly Building at NASA's Kennedy Space Center in Florida reached a

3

00:00:11,340 --> 00:00:15,679

new level of preparation for the Journey to Mars. Platform H was installed in the Vehicle

4

00:00:15,679 --> 00:00:18,999

Assembly Building's High Bay 3 last week.

5

00:00:18,999 --> 00:00:23,249

Platform H will allow technicians and engineers to reach the booster for segment attachment,

6

00:00:23,249 --> 00:00:27,779

cable routing and closeouts. It's the third of 10 work platforms that will surround and

7

00:00:27,779 --> 00:00:32,609

provide access to the Space Launch System rocket and Orion spacecraft for Exploration

8

00:00:32,609 --> 00:00:33,579

Mission 1.

9

00:00:33,579 --> 00:00:39,179

A robotic explorer bound for a near-Earth asteroid began prelaunch testing at Kennedy.

10

00:00:39,179 --> 00:00:44,989

The Origins Spectral Interpretation Resource Identification Security -- Regolith Explorer,

11

00:00:44,989 --> 00:00:50,469

or OSIRIS-REx, recently went for a spin in the Payload Hazardous Servicing Facility.

12

00:00:50,469 --> 00:00:54,510

The spin test required the spacecraft to be placed on a spin table and rotated to check

13

00:00:54,510 --> 00:00:56,149

its weight and center of gravity.

14

00:00:56,149 --> 00:01:02,449

OSIRIS-REx is slated for liftoff September 8 aboard a United Launch Alliance Atlas V

15

00:01:02,449 --> 00:01:03,579

rocket.
