

INSIDE
KSC!

1

00:00:00,489 --> 00:00:07,859

I'm NASA Kennedy's Steve Sicheloff, taking you Inside KSC!

2

00:00:07,859 --> 00:00:12,410

An instrument known as NICER arrived at Kennedy on June 8 to begin processing before it is

3

00:00:12,410 --> 00:00:17,140

flown to the International Space Station.

Short for Neutron star Interior Composition

4

00:00:17,140 --> 00:00:21,830

Explorer, the package will help scientists evaluate the mysterious state of matter inside

5

00:00:21,830 --> 00:00:23,070

neutron stars.

6

00:00:25,580 --> 00:00:30,039

The first half of the D-level work platforms for NASA's Space Launch System rocket, arrived

7

00:00:30,060 --> 00:00:31,900

at the center on June 7.

8

00:00:32,260 --> 00:00:37,500

The D-level platforms form one of 10 levels that will surround the SLS vehicle and Orion

9

00:00:37,500 --> 00:00:42,480

spacecraft. They will provide access for testing and processing as NASA prepares for the first

10

00:00:42,480 --> 00:00:45,100

integrated launch of the rocket and spacecraft.
