

1
00:00:09,620 --> 00:00:07,400
hi I'm NASA astronaut Peggy Whitson

2
00:00:12,169 --> 00:00:09,630
floating here onboard the International

3
00:00:14,120 --> 00:00:12,179
Space Station the space station is a

4
00:00:16,160 --> 00:00:14,130
unique orbiting laboratory where

5
00:00:18,910 --> 00:00:16,170
astronauts can live and conduct

6
00:00:22,099 --> 00:00:18,920
scientific research in microgravity

7
00:00:23,720 --> 00:00:22,109
recently we received a 20-17 calendar

8
00:00:25,929 --> 00:00:23,730
that was filled with artwork from

9
00:00:29,599 --> 00:00:25,939
children from all parts of the world

10
00:00:31,580 --> 00:00:29,609
about 1,700 young people from 51

11
00:00:34,520 --> 00:00:31,590
different countries sent an artwork on

12
00:00:36,500 --> 00:00:34,530
the station we have an opportunity to

13
00:00:38,360 --> 00:00:36,510

see the world from a perspective that

14

00:00:40,910 --> 00:00:38,370

not many people have had a chance to

15

00:00:43,160 --> 00:00:40,920

experience so it's very special to view

16

00:00:46,430 --> 00:00:43,170

the perspectives of young people on our

17

00:00:48,709 --> 00:00:46,440

mission here this calendar is a welcome

18

00:00:50,720 --> 00:00:48,719

surprise it is interesting to note that

19

00:00:53,889 --> 00:00:50,730

everyone who submitted art for the

20

00:00:56,569 --> 00:00:53,899

calendar was between 4 and 12 years old

21

00:00:58,160 --> 00:00:56,579

since the station has had humans living

22

00:01:00,439 --> 00:00:58,170

here for 17 years

23

00:01:03,130 --> 00:01:00,449

that means you have never known a world

24

00:01:05,660 --> 00:01:03,140

that didn't have someone living in space

25

00:01:08,700 --> 00:01:05,670

thank you all for your wonderful art
