

INSIDE  
KSC!

1

00:00:00,540 --> 00:00:05,100

Hi, I'm NASA Kennedy's Erik Denson and I'm taking you Inside KSC!

2

00:00:07,360 --> 00:00:11,740

Orbital ATK is preparing a Cygnus spacecraft for a Commercial Resupply Services mission

3

00:00:11,769 --> 00:00:13,900

to the International Space Station.

4

00:00:13,900 --> 00:00:19,450

In the Space Station Processing Facility, Cygnus was loaded with about 7,500 pounds

5

00:00:19,450 --> 00:00:23,860

of scientific experiments and supplies for the orbiting outpost.

6

00:00:23,860 --> 00:00:28,800

Cygnus is scheduled to liftoff from Cape Canaveral Air Force Station atop a United Launch Alliance

7

00:00:28,800 --> 00:00:31,300

Atlas V rocket on March 19.

8

00:00:32,400 --> 00:00:35,600

NASA's Kennedy Space Center recently celebrated Engineers Week.

9

00:00:35,620 --> 00:00:40,330

The annual event is dedicated to increasing understanding of and interest in engineering

10

00:00:40,330 --> 00:00:41,440

and technology.

11

00:00:41,440 --> 00:00:45,670

Employees had opportunities to learn about

some of the latest developments in the field.

12

00:00:45,670 --> 00:00:49,920

At the Florida spaceport, NASA Engineering played a key role in transforming the center

13

00:00:49,920 --> 00:00:52,560

to a premier, multi-user spaceport.

14

00:00:52,560 --> 00:00:56,739

Ongoing work includes a variety of projects from supporting installation of new platforms

15

00:00:56,739 --> 00:01:01,010

in the Vehicle Assembly Building to testing umbilical access arms for the Space Launch

16

00:01:01,010 --> 00:01:02,660

System's mobile launcher.
