

1

00:00:00,200 --> 00:00:04,020

Hi, We are NASA Kennedy's Heidi Culp and Kamala Roberts

2

00:00:04,020 --> 00:00:07,880

and you're coming with us Inside KSC!

3

00:00:09,200 --> 00:00:14,559

Crawler-transporter 2 rolled part of the way to Launch Complex 39B tracking over much

4

00:00:14,559 --> 00:00:17,560

of the same path it will take in the future.

5

00:00:17,560 --> 00:00:19,160

The crawler will move the Space Launch

6

00:00:19,160 --> 00:00:24,900

System rocket and Orion spacecraft to the launch pad for deep-space missions.

7

00:00:24,900 --> 00:00:29,680

OneWeb broke ground on the first satellite production facility at the spaceport's

8

00:00:29,680 --> 00:00:31,270

Exploration Park.

9

00:00:31,270 --> 00:00:35,700

The company plans to build 2,000 satellites at the plant and use them

10

00:00:35,700 --> 00:00:39,530

to provide internet access to every portion of the world.

11

00:00:39,530 --> 00:00:44,420

NASA's Engineering Management Board toured the Vehicle Assembly Building and its

12

00:00:44,420 --> 00:00:48,110

new fixtures for SLS and Orion processing.

13

00:00:48,110 --> 00:00:52,970

The tour was part of work to ensure a unified focus on NASA projects across the

14

00:00:52,970 --> 00:00:58,080

agency, including the development of the deep-space rocket and spacecraft.
