

**Trip Healey**  
Kennedy Space Center

1

00:00:00,420 --> 00:00:07,860

Hi I'm NASA Kennedy's Trip Healey, taking you  
Inside KSC!

2

00:00:07,860 --> 00:00:12,480

United Launch Alliance recently tested an  
emergency evacuation system at Space Launch

3

00:00:12,480 --> 00:00:14,400

Complex 41.

4

00:00:14,400 --> 00:00:18,550

The zipline-based system gives astronauts  
and ground support teams on the crew access

5

00:00:18,550 --> 00:00:22,840

tower a quick getaway in case an emergency  
situation develops.

6

00:00:22,840 --> 00:00:27,460

The system was put in place as part of preparations  
to launch astronauts aboard Boeing's Starliner

7

00:00:27,460 --> 00:00:31,310

spacecraft to the International Space Station.

8

00:00:31,310 --> 00:00:36,530

NASA renamed its Radiological Control Center  
in honor of Randy Scott, a health physicist

9

00:00:36,530 --> 00:00:39,510

and Kennedy's radiation protection officer.

10

00:00:39,510 --> 00:00:44,319

Scott was instrumental in the planning and  
coordination for numerous launches of plutonium-powered

11

00:00:44,319 --> 00:00:48,829

spacecraft including New Horizons and the

Curiosity.
