

Victoria Booth
Kennedy Space Center

1

00:00:00,400 --> 00:00:05,320

Hi I'm NASA Kennedy's Victoria Booth, and I'm here to you Inside KSC!

2

00:00:06,940 --> 00:00:13,139

On June 3, a SpaceX Falcon 9 roared into orbit from historic Launch Complex 39A at NASA's

3

00:00:13,139 --> 00:00:18,010

Kennedy Space Center to begin the latest resupply run to the International Space Station.

4

00:00:18,010 --> 00:00:22,060

This was the 100th liftoff from this pad, and sixth for SpaceX.

5

00:00:22,060 --> 00:00:26,609

The rocket launched a Dragon spacecraft filled with 6,000 pounds of supplies and experiments

6

00:00:26,609 --> 00:00:32,640

for more than 250 science and research investigations during expeditions 52 and 53.

7

00:00:32,640 --> 00:00:38,100

Looking like something out of this world, a futuristic Mars rover concept vehicle was

8

00:00:38,100 --> 00:00:43,230

unveiled by the Kennedy Space Center Visitor Complex to kick off its "Summer of Mars"

9

00:00:43,230 --> 00:00:44,230

promotion.

10

00:00:44,230 --> 00:00:48,440

The objective of the scientifically-themed vehicle is inspiration and education as NASA

11

00:00:48,440 --> 00:00:51,820

continues developing plans for its journey
to the Red Planet.

12

00:00:51,820 --> 00:00:56,190

Former astronaut Scott Kelly was also on hand
for the June 5th ceremony.

13

00:00:56,190 --> 00:01:00,190

Kelly shared some of his experiences during
his one-year stay aboard the international

14

00:01:00,190 --> 00:01:02,329

space station.
