

1
00:00:04,649 --> 00:00:10,360
Cygnus spacecraft brought a lot of things and then before it leaves we

2
00:00:10,360 --> 00:00:16,539
need to pack them with equipment and also a lot of trash. And today is a

3
00:00:16,539 --> 00:00:22,119
trash day, so you just follow me. I will take you to the PMM where we keep our

4
00:00:22,119 --> 00:00:24,419
trash.

5
00:00:35,070 --> 00:00:41,800
Yeah this is the PMM. This is like a warehouse of the space station. We have

6
00:00:41,800 --> 00:00:48,339
all kinds of equipment, experiments, clothing, food, and here at the end cone

7
00:00:48,339 --> 00:00:57,449
we gather trash. So I'm gonna take this common trash bag all the way to the

8
00:00:57,449 --> 00:01:01,839
Cygnus spacecraft.
I don't know how heavy this is but

9
00:01:01,839 --> 00:01:06,820
probably, you know, 10, 20 kilograms, but it's very easy to handle. You can just

10
00:01:06,820 --> 00:01:09,810
push it with your finger.

11
00:01:36,540 --> 00:01:44,090

It's a big trash bag but it's so easy
to handle. Once it started to get going

12

00:01:44,090 --> 00:01:49,650

you can just just keep control the
orientation where it's going. It's so

13

00:01:49,650 --> 00:01:52,500

easy.

I wish here, taking out trash it

14

00:01:52,500 --> 00:01:56,690

will be like this easy on the ground.

15

00:01:59,460 --> 00:02:02,030

Okay.

16

00:02:02,220 --> 00:02:09,920

And here it is, the Cygnus spacecraft is
here. Going in there.
