

**INSIDE  
▶▶ KSC!**

1  
00:00:05,210 --> 00:00:03,169  
hi I'm NASA Kennedy's Bianca rim and I'm

2  
00:00:07,190 --> 00:00:05,220  
taking you inside KSC

3  
00:00:08,390 --> 00:00:07,200  
NASA and spaceless definitely

4  
00:00:10,879 --> 00:00:08,400  
demonstrated the launch escape

5  
00:00:13,669 --> 00:00:10,889  
capability of the company's crew Dragon

6  
00:00:15,379 --> 00:00:13,679  
spacecraft on January 19th there were no

7  
00:00:18,200 --> 00:00:15,389  
astronauts aboard for this in-flight

8  
00:00:20,210 --> 00:00:18,210  
abort test a falcon 9 rocket carried the

9  
00:00:22,910 --> 00:00:20,220  
crew dragon lifting off from Kennedy

10  
00:00:24,529 --> 00:00:22,920  
Space Center's launch pad 39a then

11  
00:00:25,939 --> 00:00:24,539  
kicked off the launch escape sequence

12  
00:00:28,460 --> 00:00:25,949  
about a minute and a half into the

13  
00:00:30,500 --> 00:00:28,470

flight the demo included separation of

14

00:00:32,720 --> 00:00:30,510

the spacecraft from the rocket engine

15

00:00:35,299 --> 00:00:32,730

firings parachute deployment and a

16

00:00:37,940 --> 00:00:35,309

splashdown in the Atlantic Ocean this

17

00:00:39,740 --> 00:00:37,950

test paves the way for the demo tuition

18

00:00:41,540 --> 00:00:39,750

which will send a crew dragon with two

19

00:00:43,340 --> 00:00:41,550

astronauts aboard to the International

20

00:00:44,529 --> 00:00:43,350

Space Station under NASA's Commercial

21

00:00:46,930 --> 00:00:44,539

Crew program

22

00:00:48,880 --> 00:00:46,940

NASA astronauts Bob bankin and Doug

23

00:00:51,399 --> 00:00:48,890

Hurley were on hand at Kennedy for the

24

00:00:53,259 --> 00:00:51,409

in-flight abort test they also had the

25

00:00:55,810 --> 00:00:53,269

opportunity to rehearse standard launch

26  
00:00:57,969 --> 00:00:55,820  
date procedures they donned their space

27  
00:01:00,069 --> 00:00:57,979  
set face suit inside the suit up room

28  
00:01:01,689 --> 00:01:00,079  
used for the apollo and space shuttle

29  
00:01:03,639 --> 00:01:01,699  
program then walked out of the Neil

30  
00:01:05,770 --> 00:01:03,649  
Armstrong operations and check-out

31  
00:01:08,920 --> 00:01:05,780  
building and headed out to launch pad

32  
00:01:10,240 --> 00:01:08,930  
39a banking and Hurley each flew on two

33  
00:01:13,539 --> 00:01:10,250  
Shuttle missions to the space station

34  
00:01:31,190 --> 00:01:13,549  
and remember spaceport magazine digs
