upcoming demo2 mission to the

7  
00:00:19,040 --> 00:00:17,130  
International Space Station also

00:00:21,050 --> 00:00:19,050  
participating in the briefings were NASA

program vengon and Hurley will fly to

launch and landing operations this

23  
00:00:53,180 --> 00:00:51,000  
flight test will be the last major step

24  
00:00:54,650 --> 00:00:53,190  
before NASA can fully certify the system

25  
00:00:58,040 --> 00:00:54,660  
for routine crewed flights to the

26  
00:01:00,590 --> 00:00:58,050  
orbiting laboratory nASA has selected

27  
00:01:03,349 --> 00:01:00,600  
three US companies to design and build a

28  
00:01:05,090 --> 00:01:03,359  
human landing system or HLS for missions

29  
00:01:07,429 --> 00:01:05,100  
to the moon under the agency's Artemis

30  
00:01:09,560 --> 00:01:07,439  
program the companies are Blue Origin of

California over the next 10 months each

34  
00:01:17,840 --> 00:01:15,960  
company will work to refine its hls

35  
00:01:19,429 --> 00:01:17,850  
concept while NASA determines which ones

36  
00:01:22,190 --> 00:01:19,439  
will need to fly on demonstration

37  
00:01:24,050 --> 00:01:22,200  
missions following this one design will

38  
00:01:25,700 --> 00:01:24,060

be chosen for maturation ahead of the

39

00:01:27,410 --> 00:01:25,710

Artemis mission that will land the first

00:01:28,460 --> 00:01:27,420

woman in the next man on the moon by

2024

42

00:01:32,210 --> 00:01:30,600

under the Artemis program NASA will use

00:01:34,490 --> 00:01:32,220

the lunar surface as a testing ground

44

00:01:36,800 --> 00:01:34,500

before journeying to Mars and beyond as
