

1
00:00:04,530 --> 00:00:02,249
we're in the suit-up room I mean I

2
00:00:05,940 --> 00:00:04,540
remember this back in 2009 when I was

3
00:00:07,320 --> 00:00:05,950
sitting in lazy boys from back in the

4
00:00:09,480 --> 00:00:07,330
Apollo era but they had these really

5
00:00:11,460 --> 00:00:09,490
cool new suits and new seats that

6
00:00:13,830 --> 00:00:11,470
they're they're working in here so yeah

7
00:00:15,930 --> 00:00:13,840
it's so amazing to see this first live

8
00:00:17,669 --> 00:00:15,940
look in the room there's astronauts Bob

9
00:00:19,800 --> 00:00:17,679
Behnken and Doug Hurley sitting in those

10
00:00:23,159 --> 00:00:19,810
seats I'm being helped by the suit

11
00:00:25,859 --> 00:00:23,169
technicians this room was first used for

12
00:00:28,259 --> 00:00:25,869
the first Apollo mission Apollo 7 that

13
00:00:30,299 --> 00:00:28,269

they suited up in there in 1968 and

14

00:00:31,799 --> 00:00:30,309

there they are given a thumbs up that

15

00:00:35,040 --> 00:00:31,809

looks like Doug given a thumbs up there

16

00:00:37,590 --> 00:00:35,050

well so the suits are actually much more

17

00:00:39,870 --> 00:00:37,600

than just garments they actually connect

18

00:00:42,030 --> 00:00:39,880

directly into dragon seats as you can

19

00:00:44,490 --> 00:00:42,040

see there those GSC seats or ground

20

00:00:46,410 --> 00:00:44,500

support equipment seats are essentially

21

00:00:48,480 --> 00:00:46,420

replicas of the seats that are inside of

22

00:00:51,960 --> 00:00:48,490

the Dragon spacecraft and the seats

23

00:00:54,030 --> 00:00:51,970

provide communications as through an

24

00:00:57,180 --> 00:00:54,040

umbilical umbilical but also the ability

25

00:00:59,130 --> 00:00:57,190

to pressurize the suit if necessary so

26

00:01:00,780 --> 00:00:59,140

right now with the suit team is doing is

27

00:01:03,540 --> 00:01:00,790

they're doing communications checks as

28

00:01:05,700 --> 00:01:03,550

well as a pressure check to make sure

29

00:01:07,980 --> 00:01:05,710

that the the space suit can hold

30

00:01:10,739 --> 00:01:07,990

pressure in the event of a cabin

31

00:01:12,330 --> 00:01:10,749

depressurization emergency this is the

32

00:01:14,760 --> 00:01:12,340

last time that we're going to do this
