

1  
00:00:04,160 --> 00:00:02,540  
these seats are basically ground support

2  
00:00:05,450 --> 00:00:04,170  
equipment seats they're pretty much the

3  
00:00:06,889 --> 00:00:05,460  
same as the ones in the vehicle as

4  
00:00:09,799 --> 00:00:06,899  
Leland said so what they're doing right

5  
00:00:11,959 --> 00:00:09,809  
now is strapping the crew into the seats

6  
00:00:13,669 --> 00:00:11,969  
to prepare for the two big checkouts

7  
00:00:15,110 --> 00:00:13,679  
that they're doing right now they're

8  
00:00:16,760 --> 00:00:15,120  
going to do a comms check a

9  
00:00:18,800 --> 00:00:16,770  
bi-directional comms check where they're

10  
00:00:20,420 --> 00:00:18,810  
going to check that the microphones that

11  
00:00:22,910 --> 00:00:20,430  
are inside of the helmets that the crew

12  
00:00:24,560 --> 00:00:22,920  
wearing that they could suit Tex can

13  
00:00:27,109 --> 00:00:24,570

communicate with them by directionally

14

00:00:28,550 --> 00:00:27,119

and they'll also do a leak test which is

15

00:00:30,050 --> 00:00:28,560

a pressure test while they're

16

00:00:33,020 --> 00:00:30,060

pressurized the spacesuit

17

00:00:35,450 --> 00:00:33,030

so the suits are more much more than

18

00:00:38,229 --> 00:00:35,460

just futuristic looking outfits they do

19

00:00:40,790 --> 00:00:38,239

look like they come from a sci-fi movie

20

00:00:43,190 --> 00:00:40,800

but they as we described they're they're

21

00:00:45,799 --> 00:00:43,200

designed to connect directly into dragon

22

00:00:47,900 --> 00:00:45,809

seats to provide communications cooling
