

1
00:00:04,940 --> 00:00:02,899
and as they climb into dragon they will

2
00:00:07,700 --> 00:00:04,950
buckle themselves in and attach their

3
00:00:10,299 --> 00:00:07,710
umbilicals to their suits as you can see

4
00:00:12,980 --> 00:00:10,309
the suit techs are there to help them

5
00:00:15,620 --> 00:00:12,990
get buckled and settled into those seats

6
00:00:17,450 --> 00:00:15,630
and as we mentioned earlier in the

7
00:00:19,490 --> 00:00:17,460
broadcast the suits primary function is

8
00:00:22,519 --> 00:00:19,500
to protect the crew in the event of a

9
00:00:24,380 --> 00:00:22,529
cabin depressurization so the suits help

10
00:00:27,800 --> 00:00:24,390
keep them cool as well as delivers

11
00:00:32,179 --> 00:00:27,810
nitrox in case there is a suit

12
00:00:34,310 --> 00:00:32,189
depressurization as we go through this

13
00:00:36,049 --> 00:00:34,320

we saw Doug Hurley go in first he's the

14

00:00:38,720 --> 00:00:36,059

commander for this mission he's closest

15

00:00:40,580 --> 00:00:38,730

to your screen and then Bob Jenkins just

16

00:00:42,080 --> 00:00:40,590

next to him and they're gonna get some

17

00:00:44,510 --> 00:00:42,090

assistance from these suit texts as they

18

00:00:46,520 --> 00:00:44,520

get in there are four seats inside of

19

00:00:48,229 --> 00:00:46,530

dragon for these missions and they are

20

00:00:50,720 --> 00:00:48,239

numbered one through four if you're

21

00:00:52,819 --> 00:00:50,730

looking from the perspective of the suit

22

00:00:55,279 --> 00:00:52,829

text inside the hatch going from right

23

00:00:57,500 --> 00:00:55,289

to left so Doug Hurley is in seat two

24

00:00:59,630 --> 00:00:57,510

that's the commander seat and Bob bankin

25

00:01:02,900 --> 00:00:59,640

is in seat three which for crew dragons

26

00:01:06,890 --> 00:01:02,910

the pilot seat dragon SpaceX dragon the
