

1
00:00:06,490 --> 00:00:07,660
Hi.

2
00:00:07,660 --> 00:00:12,030
It's been a while since I've done one of these videos, and I wanted to take this opportunity

3
00:00:12,030 --> 00:00:18,490
to congratulate the entire KSC team on the outstanding job that you did last week.

4
00:00:18,490 --> 00:00:21,500
We launched the Perseverance Rover on its way to Mars.

5
00:00:21,500 --> 00:00:26,160
And we brought Bob and Doug home safely from the International Space Station.

6
00:00:26,160 --> 00:00:31,800
We did it all in the midst of a pandemic with a hurricane bearing down on us.

7
00:00:31,800 --> 00:00:32,800
Absolutely outstanding.

8
00:00:32,800 --> 00:00:36,010
I couldn't be more proud of this team.

9
00:00:36,010 --> 00:00:41,780
Speaking of the pandemic, I want you to know that we are providing as safe a workplace

10
00:00:41,780 --> 00:00:46,130
as we possible can for those folks that have to come on site.

11
00:00:46,130 --> 00:00:51,979
When I look at the cases that we've had with

the KSC team, most of the contacts have been

12

00:00:51,979 --> 00:00:56,879

the result of contacts out in town, not on site.

13

00:00:56,879 --> 00:01:01,280

So I want you all to be careful, when you're out in town, you know, follow the CDC guidelines,

14

00:01:01,280 --> 00:01:03,280

wear your mask, do the right thing.

15

00:01:03,280 --> 00:01:06,869

We need to protect our team so that we can accomplish the critical work that we need

16

00:01:06,869 --> 00:01:08,240

to here at KSC.

17

00:01:08,240 --> 00:01:12,729

I am going to be having an All Hands soon here, another Town Hall.

18

00:01:12,729 --> 00:01:15,700

I want to hear from all of you, and I want to be able to answer your questions.

19

00:01:15,700 --> 00:01:19,240

Let you know where we're going, what our future looks like.

20

00:01:19,240 --> 00:01:24,450

We've got an outstanding future, and I want us laser-focused on the mission ahead.

21

00:01:24,450 --> 00:01:27,240

You know we've got Crew-1 coming up here at the end of September.

22

00:01:27,240 --> 00:01:28,880

We've gotta keep Commercial Crew flying.

23

00:01:28,880 --> 00:01:34,630

We've got to be ready for that core stage of SLS when it arrives for the Artemis I mission.

24

00:01:34,630 --> 00:01:37,880

EGS is going to be a major focus as we get ready.

25

00:01:37,880 --> 00:01:42,250

All of the flight hardware is here at KSC right now, except for that core stage.

26

00:01:42,250 --> 00:01:47,340

So we're gonna get that green run done at Stennis Space Center in October and then when

27

00:01:47,340 --> 00:01:50,340

it arrives we're going to be ready for processing here at KSC.

28

00:01:50,340 --> 00:01:53,909

You guys are doing an absolutely outstanding job.

29

00:01:53,909 --> 00:01:55,950

I want you to stay focused.
