

DOUG HURLEY BOB BEHNKEN

1
00:00:06,799 --> 00:00:11,599
There's astronaut Doug Hurley
you can see astronaut Bob Behnken also in

2
00:00:11,599 --> 00:00:15,040
view now
and there they are NASA Astronauts Bob

3
00:00:15,040 --> 00:00:18,240
Behnken
and Doug Hurley

4
00:00:23,519 --> 00:00:29,679
A little thumbs up from from Bob.
There they are taken in the site.

5
00:00:29,679 --> 00:00:32,960
And as they climb into
Dragon they will buckle in and attach

6
00:00:32,960 --> 00:00:40,320
their umbilicals to their suits.
Five four three two

7
00:00:40,320 --> 00:00:47,200
one zero ignition liftoff
of the Falcon 9 and crew Dragon go NASA

8
00:00:47,200 --> 00:01:01,520
go SpaceX god speed Bob and Doug. America has launched. We're
less than a mile away from station we're

9
00:01:01,520 --> 00:01:09,760
inside 100 meters continuing to close.
Dragon closing in we're inside 20 meters

10
00:01:10,000 --> 00:01:13,840
soft capture complete.

11

00:01:14,960 --> 00:01:19,200

We have Bob Behnken from SpaceX Demo 2 mission entering the international space

12

00:01:19,200 --> 00:01:21,680

station.

13

00:01:23,440 --> 00:01:29,440

Followed by Doug Hurley Demo 2 crew now aboard the international space station

14

00:01:49,520 --> 00:01:56,399

Dragon departing. Dragon SpaceX separation confirmed.

15

00:01:56,399 --> 00:01:59,439

Thrusters looking good.

16

00:02:00,800 --> 00:02:07,280

Rise and shine Daddy we love you, hurry home so we can go get my dog.

17

00:02:12,480 --> 00:02:15,720

Splash down.

18

00:02:20,240 --> 00:02:24,480

Dragon is out of the water.

19

00:02:26,640 --> 00:02:29,840

Getting some great views of the crew now coming down

20

00:02:29,840 --> 00:02:34,560

from the gulf stream aircraft. It's a little bit overwhelming to

21

00:02:34,560 --> 00:02:37,920

to see everybody here considering the things that have gone

22

00:02:37,920 --> 00:02:41,120

on in the last few months since we've
been off planet

23

00:02:41,120 --> 00:02:45,200

you know this has been a uh quite an
odyssey the last

24

00:02:45,200 --> 00:02:48,879

five six seven eight years five years
since

25

00:02:48,879 --> 00:02:51,920

Bob and I started working on this
program

26

00:02:51,920 --> 00:02:55,920

and to be where we are now the first
crewed flight

27

00:02:55,920 --> 00:03:00,400

of Dragon is just unbelievable. There's
something special

28

00:03:00,400 --> 00:03:04,000

about having that capability to launch
and and bring your

29

00:03:04,000 --> 00:03:08,159

own astronauts home and uh we went
through a lot of years without that

30

00:03:08,159 --> 00:03:11,440

capability
and i think we're both super super proud

31

00:03:11,440 --> 00:03:13,840

to have been just a small part of the
team that
