

1  
00:00:06,789 --> 00:00:03,510  
you're looking live at the crew dragon

2  
00:00:08,870 --> 00:00:06,799  
spacecraft on top of a falcon 9 rocket

3  
00:00:10,950 --> 00:00:08,880  
set to launch four astronauts to the

4  
00:00:13,270 --> 00:00:10,960  
international space station in just a

5  
00:00:15,509 --> 00:00:13,280  
few hours today a crew of three

6  
00:00:17,430 --> 00:00:15,519  
americans and one european astronaut

7  
00:00:20,390 --> 00:00:17,440  
will set off on a six-month science

8  
00:00:22,390 --> 00:00:20,400  
mission to the world's only orbiting

9  
00:00:24,150 --> 00:00:22,400  
laboratory

10  
00:00:26,070 --> 00:00:24,160  
and welcome everyone to the kennedy

11  
00:00:28,710 --> 00:00:26,080  
space center in florida for live

12  
00:00:31,269 --> 00:00:28,720  
coverage of nasa and spacex's launch of

13  
00:00:35,110 --> 00:00:31,279

crew 3. i'm daryl nail with nasa and

14

00:00:36,790 --> 00:00:35,120

this is nasa's astronaut shannon walker

15

00:00:39,350 --> 00:00:36,800

so thrilled to have you here with our

16

00:00:41,750 --> 00:00:39,360

launch broadcast first time for somebody

17

00:00:44,150 --> 00:00:41,760

who's actually flown on the dragon so

18

00:00:45,270 --> 00:00:44,160

we're the top story right now we're

19

00:00:47,510 --> 00:00:45,280

seeing a little bit of weather you can

20

00:00:49,830 --> 00:00:47,520

see it in the picture we got some clouds

21

00:00:52,630 --> 00:00:49,840

behind us but we currently sit at 70

22

00:00:53,910 --> 00:00:52,640

percent go hopeful that that holds yep

23

00:00:55,910 --> 00:00:53,920

hopefully it will hold we've had a

24

00:00:57,750 --> 00:00:55,920

little bit of misty rain today but uh it

25

00:00:59,990 --> 00:00:57,760

seems to be pushing out so keep our

26

00:01:02,310 --> 00:01:00,000

fingers crossed it'll keep keep on going

27

00:01:05,030 --> 00:01:02,320

let's begin now with a mission overview

28

00:01:08,550 --> 00:01:05,040

in just over four hours at 9 03 pm

29

00:01:11,270 --> 00:01:08,560

eastern time nasa astronauts raja chari

30

00:01:13,510 --> 00:01:11,280

tom marshburn caleb aaron and european

31

00:01:16,390 --> 00:01:13,520

space agency astronaut matthias maurer

32

00:01:18,469 --> 00:01:16,400

will lift off from launch complex 39a at

33

00:01:21,109 --> 00:01:18,479

nasa's kennedy space center

34

00:01:22,630 --> 00:01:21,119

as part of the commercial crew program

35

00:01:24,310 --> 00:01:22,640

okay let's talk about the crew and what

36

00:01:26,469 --> 00:01:24,320

they did you're familiar with this yes

37

00:01:28,789 --> 00:01:26,479

prior to today's flight the crew shifted

38

00:01:31,270 --> 00:01:28,799

their sleep schedule always a fun thing

39

00:01:33,190 --> 00:01:31,280

yes waking up late morning and one of

40

00:01:35,109 --> 00:01:33,200

the first things they did was this let's

41

00:01:37,270 --> 00:01:35,119

take a look at some video here they

42

00:01:39,670 --> 00:01:37,280

stuck their sticker on the wall

43

00:01:41,030 --> 00:01:39,680

literally right below crew one sticker

44

00:01:43,270 --> 00:01:41,040

there's crew three and then they gave it

45

00:01:44,389 --> 00:01:43,280

a tap slapped it on the wall it's a new

46

00:01:46,069 --> 00:01:44,399

tradition

47

00:01:48,310 --> 00:01:46,079

and shaman i guess you started that

48

00:01:50,469 --> 00:01:48,320

right your crew well yep uh well i

49

00:01:52,230 --> 00:01:50,479

believe demo two is there as well but uh

50

00:01:53,990 --> 00:01:52,240

something crews like to do leave their

51  
00:01:56,069 --> 00:01:54,000  
stickers wherever they are so we put it

52  
00:01:58,389 --> 00:01:56,079  
on inside crew quarters and then you see

53  
00:01:59,910 --> 00:01:58,399  
them here they are awaiting breakfast

54  
00:02:01,910 --> 00:01:59,920  
they looked hungry

55  
00:02:02,870 --> 00:02:01,920  
food hadn't been served yet nope ready

56  
00:02:07,030 --> 00:02:02,880  
to eat

57  
00:02:09,029 --> 00:02:07,040  
pre-launch meal and so we're of course
