NASA

NASA

LAUNCH
AMERICA

1
00:00:05,210 --> 00:00:02,690
you're looking live at the crew Dragon

2
00:00:07,430 --> 00:00:05,220
spacecraft on top of a Falcon 9 rocket

3
00:00:09,470 --> 00:00:07,440
set to launch three astronauts and one

4
00:00:11,810 --> 00:00:09,480
Cosmonaut to the International Space

5
00:00:14,270 --> 00:00:11,820
Station in a little more than three

6
00:00:18,349 --> 00:00:16,250
and welcome to the Kennedy Space Center

7
00:00:20,929 --> 00:00:18,359
in Florida for live coverage of NASA and

8
00:00:23,750 --> 00:00:20,939
spacex's launch of cruise six now

9
00:00:26,450 --> 00:00:23,760
streaming in 4K resolution I'm NASA's

10
00:00:28,670 --> 00:00:26,460
Daryl nail and with me is NASA astronaut

11
00:00:30,650 --> 00:00:28,680
rajachari great to have you here Colonel

12
00:00:32,150 --> 00:00:30,660
super happy to be here Daryl and what a

13
00:00:33,530 --> 00:00:32,160

beautiful night for a launch other than

14

00:00:35,870 --> 00:00:33,540

some mosquitoes you know something

15

00:00:37,430 --> 00:00:35,880

interesting about uh Raja being here

16

00:00:39,590 --> 00:00:37,440

besides the mosquitoes which are a

17

00:00:42,709 --> 00:00:39,600

little bit of a bother is he is actually

18

00:00:44,450 --> 00:00:42,719

never witnessed a launch firsthand yeah

19

00:00:46,670 --> 00:00:44,460

so Kayla and I are our first launch was

20

00:00:48,110 --> 00:00:46,680

being on the rocket and so Kayla got to

21

00:00:49,670 --> 00:00:48,120

see one now I get to see one live myself

22

00:00:52,069 --> 00:00:49,680

so looking forward to seeing it from the

23

00:00:53,690 --> 00:00:52,079

outside we enjoy we are going to enjoy

24

00:00:55,729 --> 00:00:53,700

seeing seeing and hearing it through

25

00:00:57,110 --> 00:00:55,739

your perspective as you watch it for the

26
00:00:58,850 --> 00:00:57,120
first time but you were you were in The

27
00:01:00,709 --> 00:00:58,860
Rock and that's why you're here to give

28
00:01:02,170 --> 00:01:00,719
us all of that uh I don't get a whole

29
00:01:04,969 --> 00:01:02,180
lot of pity when I tell people

30
00:01:07,190 --> 00:01:04,979
no not at all well let's talk about

31
00:01:09,109 --> 00:01:07,200
Cruise six they are already getting

32
00:01:10,969 --> 00:01:09,119
suited up and we've got a little bit of

33
00:01:13,609 --> 00:01:10,979
video that was recorded earlier less

34
00:01:16,730 --> 00:01:13,619
than an hour ago of crew six in that

35
00:01:18,649 --> 00:01:16,740
historic astronaut crew quarters suit up

36
00:01:21,649 --> 00:01:18,659
room and there you see the commander

37
00:01:25,010 --> 00:01:21,659
Stephen Bowen in his seat it is exactly

38
00:01:27,170 --> 00:01:25,020

as the seats are inside the dragon

39

00:01:29,030 --> 00:01:27,180

there's Woody hoberg the pilot for today

40

00:01:30,109 --> 00:01:29,040

yep that's exactly how the foam the

41

00:01:31,550 --> 00:01:30,119

fittings and everything like that are

42

00:01:33,230 --> 00:01:31,560

exactly there's Sultan one of the

43

00:01:35,210 --> 00:01:33,240

mission Specialists and so what they do

44

00:01:37,130 --> 00:01:35,220

is two by two they pressurize them up

45

00:01:38,090 --> 00:01:37,140

check the Comm system uh and basically

46

00:01:39,710 --> 00:01:38,100

are checking to make sure there's no

47

00:01:41,390 --> 00:01:39,720

malfunctions in the suit because you'd

48

00:01:42,289 --> 00:01:41,400

rather fix that there than out on the

49

00:01:45,109 --> 00:01:42,299

pad

50

00:01:47,270 --> 00:01:45,119

absolutely and so they're also connected

51
00:01:48,890 --> 00:01:47,280
up there right with those umbilicals

52
00:01:50,210 --> 00:01:48,900
they are just like they are in the

53
00:01:51,830 --> 00:01:50,220
spacecraft so they're checking out the

54
00:01:52,969 --> 00:01:51,840
the suit side umbilical connection make

55
00:01:54,530 --> 00:01:52,979
sure the cooling is working make sure

56
00:01:55,850 --> 00:01:54,540
the comms working

57
00:01:56,990 --> 00:01:55,860
um they take them up to pressure just

58
00:01:58,730 --> 00:01:57,000
like they would in the suit pressure

59
00:01:59,990 --> 00:01:58,740
checks and make sure that they there's

60
00:02:01,249 --> 00:02:00,000
two layers of the suit there's a

61
00:02:02,450 --> 00:02:01,259
pressure garment and then restraint

62
00:02:04,130 --> 00:02:02,460
garment so they're making sure all the

63
00:02:05,630 --> 00:02:04,140

zippers for both those layers are
