

1
00:00:04,020 --> 00:00:09,190
alright so here's ago what do you think

2
00:00:15,049 --> 00:00:12,560
this private life changing they probably

3
00:00:18,019 --> 00:00:15,059
never even imagined it will be the cobia

4
00:00:19,790 --> 00:00:18,029
to go to outer space see God's creation

5
00:00:22,310 --> 00:00:19,800
love close and personal and everything

6
00:00:24,500 --> 00:00:22,320
so I probably change our whole lives if

7
00:00:28,940 --> 00:00:24,510
I had a home alone with this book we can

8
00:00:31,880 --> 00:00:28,950
do we put our class together a huge

9
00:00:33,380 --> 00:00:31,890
councilman be all done together just

10
00:00:35,389 --> 00:00:33,390
think about it all of us working

11
00:00:37,819 --> 00:00:35,399
together from different backgrounds and

12
00:00:39,140 --> 00:00:37,829
things like that we get together put our

13
00:00:41,210 --> 00:00:39,150

differences aside and we can accomplish

14

00:00:45,400 --> 00:00:41,220

great things obviously you weren't a lot

15

00:00:48,640 --> 00:00:47,140

I guess I'd imagine they were pretty

16

00:00:49,750 --> 00:00:48,650

stunned and something like that it

17

00:00:52,690 --> 00:00:49,760

really ever been done before it was

18

00:00:53,979 --> 00:00:52,700

probably a really incredible thing to

19

00:00:55,310 --> 00:00:53,989

their country again something like that

20

00:00:56,670 --> 00:00:55,320

as

21

00:00:59,010 --> 00:00:56,680

watching out

22

00:01:00,720 --> 00:00:59,020

I still think it's incredible even even

23

00:01:07,510 --> 00:01:00,730

the fact they did it so long ago between

24

00:01:12,910 --> 00:01:10,480

as far as manned exploration i really

25

00:01:14,800 --> 00:01:12,920

hope we're on the moon but if not i know

26

00:01:16,510 --> 00:01:14,810

the voyagers right now are out of our

27

00:01:18,340 --> 00:01:16,520

solar system it'd be really nice to have

28

00:01:20,709 --> 00:01:18,350

some more data coming in from them I

29

00:01:22,450 --> 00:01:20,719

like to see NASA take us back tomorrow

30

00:01:24,639 --> 00:01:22,460

back to the moon first an end to Mars

31

00:01:26,980 --> 00:01:24,649

and hopefully beyond that I've always

32

00:01:29,649 --> 00:01:26,990

had an interest in space exploration so
