

Operations Integrator

National Space Flight Center
Huntsville, Alabama

1
00:00:07,269 --> 00:00:03,830
what we need to do is continue any

2
00:00:08,950 --> 00:00:07,279
industry needs to continue to to to push

3
00:00:10,549 --> 00:00:08,960
itself you can't just do the same things

4
00:00:12,310 --> 00:00:10,559
over and over even though i'm a huge fan

5
00:00:14,390 --> 00:00:12,320
of what's happening on the space station

6
00:00:15,910 --> 00:00:14,400
and the benefits that that we derive

7
00:00:18,070 --> 00:00:15,920
from it

8
00:00:19,029 --> 00:00:18,080
going on to another destination be it

9
00:00:21,349 --> 00:00:19,039
the

10
00:00:23,590 --> 00:00:21,359
mars moon asteroid whatever our

11
00:00:26,070 --> 00:00:23,600
direction ends up being

12
00:00:28,150 --> 00:00:26,080
is the logical and critical next step

13
00:00:30,870 --> 00:00:28,160

and certainly you need a big engine to

14

00:00:33,110 --> 00:00:30,880

get there and the work that's being done

15

00:00:35,750 --> 00:00:33,120

on that here at marshall space flight

16

00:00:38,310 --> 00:00:35,760

center obviously is essentially critical

17

00:00:39,750 --> 00:00:38,320

to in the in the key
