

1
00:00:07,839 --> 00:00:11,320
Imagine a place where drugs
treat tumors and patients

2
00:00:11,320 --> 00:00:13,860
experience fewer side effects
from traditional chemotherapy.

3
00:00:13,860 --> 00:00:18,359
A place where scientists unravel
genes to cure diseases

4
00:00:18,359 --> 00:00:21,830
A place where we learn how to
make bones and muscles grow

5
00:00:21,830 --> 00:00:23,830
stronger as we age.

6
00:00:23,830 --> 00:00:27,680
Satellites refuel in orbit,
saving companies billions of

7
00:00:27,680 --> 00:00:28,680
dollars.

8
00:00:28,680 --> 00:00:31,730
Robots perform
dangerous tasks.

9
00:00:31,730 --> 00:00:32,960
Scientists
discover the mysteries

10
00:00:32,960 --> 00:00:35,641
of dark matter leading to new
technologies that change the

11
00:00:35,641 --> 00:00:36,641

world.

12

00:00:36,641 --> 00:00:39,730

We monitor and manage
Earth's precious resources

13

00:00:39,730 --> 00:00:43,120

And take advantage of those
resources in space to explore

14

00:00:43,120 --> 00:00:44,440

farther away from home.

15

00:00:44,440 --> 00:00:47,050

Where a new commercial
marketplace thrives.

16

00:00:47,050 --> 00:00:50,810

Where people from many nations
work together peacefully for

17

00:00:50,810 --> 00:00:52,700

the good of all humanity.

18

00:00:52,700 --> 00:00:55,469

This place is humanity's home
in space.

19

00:00:55,469 --> 00:00:58,129

And the springboard
for future journeys into deep

20

00:00:58,129 --> 00:00:59,129

space.

21

00:00:59,129 --> 00:01:01,101

A place where we are
living off the Earth, Working

22

00:01:01,101 --> 00:01:02,320
for the Earth.

23

00:01:02,320 --> 00:01:03,640
So look up.

24

00:01:03,640 --> 00:01:06,390
Marvel at the third brightest
object in our sky.

25

00:01:06,390 --> 00:01:07,649
The
International Space Station:
