

1  
00:00:08,011 --> 00:00:08,077  
Hi, I'm John\h\h

2  
00:00:08,100 --> 00:00:11,640  
Bakalyar.  
I'm the Super Guppy Program Manager.

3  
00:00:11,640 --> 00:00:13,560  
And this is the Super Guppy aircraft.

4  
00:00:13,560 --> 00:00:17,880  
We use it to move large space cargo\h  
around the country from where an\h\h

5  
00:00:17,880 --> 00:00:21,000  
item is built to where it's tested,\h  
ultimately where it's is launched.

6  
00:00:21,000 --> 00:00:28,320  
Today, the Super Guppy is bringing the OSA -\h  
Orion Stage Adapter - from Kennedy Space Center\h

7  
00:00:28,320 --> 00:00:30,900  
back here to Marshall Space Flight Center.

8  
00:00:30,900 --> 00:00:36,900  
And the OSA is the structural ring that\h  
goes between the top of the SLS rocket\h

9  
00:00:36,900 --> 00:00:38,820  
and the bottom of the Orion spacecraft.
