

1
00:00:39,140 --> 00:00:37,730
I'll do this anybody warrants were

2
00:00:43,220 --> 00:00:39,150
hoping I cleanse in myself and I thought

3
00:00:44,720 --> 00:00:43,230
that was easier than yeah but but if you

4
00:01:18,740 --> 00:00:44,730
want someone to help pull it pull it out

5
00:01:22,380 --> 00:01:20,910
I've only been inside this I don't know

6
00:01:24,660 --> 00:01:22,390
what this but you normally have this

7
00:01:27,419 --> 00:01:24,670
kind of stuff here though she pulled it

8
00:01:29,310 --> 00:01:27,429
up higher well just pull it up to about

9
00:01:36,510 --> 00:01:29,320
here to where there's no real folds in

10
00:01:38,160 --> 00:01:36,520
it belt back there right small your back

11
00:02:05,789 --> 00:01:38,170
okay does it feel like it's in subpoena

12
00:02:05,799 --> 00:02:12,960
didn't see that points treacherous yeah

13
00:02:24,580 --> 00:02:17,860

mark when it says to perform a BPM pops

14

00:02:33,830 --> 00:02:24,590

really means come over here and March it

15

00:02:38,540 --> 00:02:35,930

I thought that one was today we

16

00:02:39,570 --> 00:02:38,550

delivered have any more questions

17

00:02:43,800 --> 00:02:39,580

Rebecca Smith

18

00:03:01,600 --> 00:02:43,810

I'm gonna be here today still longer in

19

00:03:10,280 --> 00:03:07,100

AP electronics electrode leads to stuff

20

00:03:17,890 --> 00:03:10,290

and you got a good ECG up there okay

21

00:03:25,210 --> 00:03:19,509

look the top and that's just that guy

22

00:04:06,820 --> 00:03:25,220

right there that's just haven't yet

23

00:04:06,830 --> 00:04:11,860

well it's a mountain

24

00:04:15,820 --> 00:04:14,080

is you know a 945 to have my first blood

25

00:04:17,920 --> 00:04:15,830

pressure reading every

26

00:04:19,120 --> 00:04:17,930

I'm just hitting this thing so that's

27

00:04:20,860 --> 00:04:19,130

how it's going to be and then it's gonna

28

00:04:22,420 --> 00:04:20,870

be essentially it each one of these

29

00:04:24,010 --> 00:04:22,430

things will be three minutes or I envy

30

00:04:29,440 --> 00:04:24,020

you know at three at two at once alright

31

00:04:30,160 --> 00:04:29,450

we'll have the clock time wonder what

32

00:04:32,860 --> 00:04:30,170

clock time

33

00:04:34,720 --> 00:04:32,870

you mean this will have this hasn't this

34

00:04:36,700 --> 00:04:34,730

guy records the day and time the

35

00:04:38,770 --> 00:04:36,710

oppressor reading was made internally

36

00:04:40,870 --> 00:04:38,780

okay so I can play it back later

37

00:04:43,690 --> 00:04:40,880

play it back dump it to the computer

38

00:04:46,480 --> 00:04:43,700

later so this is really just back up to

39

00:04:48,100 --> 00:04:46,490

that at least this is for your decision

40

00:04:49,330 --> 00:04:48,110

that you're gonna be every guy's gonna

41

00:05:22,659 --> 00:04:49,340

be watching the pulse pressures and

42

00:05:22,669 --> 00:05:53,070

crank it back

43

00:05:58,400 --> 00:05:55,469

and John you're comfortable with plus or

44

00:05:58,410 --> 00:06:31,180

the numbers Bonnie got it right on

45

00:06:31,190 --> 00:06:48,350

like normally open again and it back

46

00:06:48,360 --> 00:07:00,659

okay I'm sorry

47

00:07:00,669 --> 00:07:06,760

I first

48

00:07:12,730 --> 00:07:08,439

Marsha were fifteen seconds away from

49

00:07:12,740 --> 00:07:30,659

or

50

00:07:44,119 --> 00:07:31,860

and we can go ahead and consider where

51

00:07:44,129 --> 00:08:11,950

I feel there

52

00:08:25,390 --> 00:08:15,600

marks over about 30 seconds away

53

00:08:25,400 --> 00:08:51,410

don't worry about the organ

54

00:08:51,420 --> 00:08:55,320

versus

55

00:09:01,330 --> 00:08:58,690

you can see the ventricle and just over

56

00:09:03,190 --> 00:09:01,340

What did he say my name is can you see

57

00:09:05,470 --> 00:09:03,200

the picture yeah all right see this part

58

00:09:10,760 --> 00:09:05,480

here yeah there's more like this yeah

59

00:09:10,770 --> 00:09:36,220

pretty much
