

1
00:00:33,670 --> 00:00:28,070

you

2
00:00:33,680 --> 00:00:46,570

mornin mornin

3
00:00:50,840 --> 00:00:49,010

this is basically the air that's not the

4
00:00:53,210 --> 00:00:50,850

same trash compactor that you observe

5
00:00:56,510 --> 00:00:53,220

during the functional test in building

6
00:00:58,160 --> 00:00:56,520

17 and we send that back to Johnson

7
00:01:00,590 --> 00:00:58,170

engineering with some comments from you

8
00:01:03,440 --> 00:01:00,600

and after all functional tests and they

9
00:01:05,510 --> 00:01:03,450

did modifications in Colorado and they

10
00:01:07,580 --> 00:01:05,520

send it back toes and earlier today

11
00:01:10,219 --> 00:01:07,590

basically demonstrated a modified

12
00:01:13,300 --> 00:01:10,229

version on Walker this is the action

13
00:01:32,840 --> 00:01:13,310

progressions or the storage provisional

14

00:01:39,710 --> 00:01:35,780

what to do go into the opposite so I

15

00:01:43,850 --> 00:01:39,720

flash and basically clean how do you

16

00:01:48,200 --> 00:01:43,860

fill it up with it in there this would

17

00:01:55,279 --> 00:01:48,210

be inside a a beta off that made up off

18

00:01:57,550 --> 00:01:55,289

Ahmed Johnson a drink the reason we

19

00:02:00,649 --> 00:01:57,560

can't use the existing aerospace

20

00:02:28,970 --> 00:02:00,659

existing beta lock bags because there

21

00:02:35,130 --> 00:02:33,090

yeah what's that contains it contains

22

00:02:41,310 --> 00:02:35,140

the odor because I've activated charcoal

23

00:02:46,980 --> 00:02:41,320

also has one day now and this was

24

00:02:49,800 --> 00:02:46,990

gore-tex for bogey soaks up water that

25

00:02:51,720 --> 00:02:49,810

hooks up over shrink any bacteria that's

26

00:03:01,040 --> 00:02:51,730

generated from the trash inside the bag

27

00:03:08,820 --> 00:03:03,900

candles are marked driving laughs and

28

00:03:13,170 --> 00:03:08,830

you won't confuse yourself all right Bob

29

00:03:20,910 --> 00:03:13,180

which is your right whatever the hard

30

00:03:25,470 --> 00:03:20,920

part of this mission okay and religion

31

00:03:27,839 --> 00:03:25,480

here for clarity says compaction on your

32

00:03:30,089 --> 00:03:27,849

red there are some red and green arrows

33

00:03:34,020 --> 00:03:30,099

on the top and also down here and then

34

00:03:36,930 --> 00:03:34,030

you're in retraction mode so make sure

35

00:03:51,420 --> 00:03:36,940

that the rhyme is fully we parked it to

36

00:03:57,820 --> 00:03:55,300

and now already from compact trash and

37

00:04:00,280 --> 00:03:57,830

compassion needs to be read so we should

38

00:04:25,150 --> 00:04:00,290

be changing directional all three rivers

39

00:05:02,140 --> 00:04:57,540

did you are you lose count this point

40

00:05:04,210 --> 00:05:02,150

loading the door so before you take the

41

00:05:05,440 --> 00:05:04,220

appellate ow you want to unload the door

42

00:05:14,900 --> 00:05:05,450

so you want to spring out hit somebody

43

00:05:45,980 --> 00:05:19,290

crash footage handle put pressure on it

44

00:05:50,880 --> 00:05:48,510

expecting juice will get to absorbed

45

00:05:53,220 --> 00:05:50,890

into the yeah well know if it's absorbed

46

00:05:55,230 --> 00:05:53,230

into a filter size it doesn't say this

47

00:05:58,020 --> 00:05:55,240

is activated charcoal that glass door we

48

00:06:02,640 --> 00:05:58,030

take up over he should be this is the

49

00:06:04,830 --> 00:06:02,650

one way to check water barrier that last

50

00:06:10,950 --> 00:06:04,840

air to go through but not water say

51

00:06:21,430 --> 00:06:14,260

actually guys will end late in the

52

00:06:22,870 --> 00:06:21,440

mission we should flip right now they're

53

00:06:50,470 --> 00:06:22,880

working they're working in the kitchen

54

00:06:55,310 --> 00:06:53,960

the thing with with three drops of fluid

55

00:07:32,020 --> 00:06:55,320

on we're going to pick this qualified

56

00:07:32,030 --> 00:07:42,690

okay now

57

00:07:46,890 --> 00:07:44,430

perhaps if you put your hand on you can
