

1
00:00:00,000 --> 00:00:05,010

you

2
00:00:09,850 --> 00:00:07,170

communicating the space experience

3
00:00:11,530 --> 00:00:09,860

sending someone into Earth orbit who

4
00:00:15,610 --> 00:00:11,540

could tell us what its life in our own

5
00:00:18,730 --> 00:00:15,620

terms has long been a NASA goal and in

6
00:00:20,679 --> 00:00:18,740

August 1984 the spaceflight participant

7
00:00:23,349 --> 00:00:20,689

program was given the greenlight

8
00:00:27,070 --> 00:00:23,359

by President Reagan today I'm directing

9
00:00:30,040 --> 00:00:27,080

NASA to begin a search in all of our

10
00:00:32,200 --> 00:00:30,050

elementary and secondary schools and to

11
00:00:34,750 --> 00:00:32,210

choose as the first citizen passenger in

12
00:00:41,639 --> 00:00:34,760

the history of our space program one of

13
00:00:43,930 --> 00:00:41,649

America's finest a teacher last June the

14

00:00:46,029 --> 00:00:43,940

semi-finalists in NASA's teacher and

15

00:00:49,750 --> 00:00:46,039

space project met the press for the

16

00:00:52,810 --> 00:00:49,760

first time in Washington DC the 114

17

00:00:53,590 --> 00:00:52,820

educators selected from over 11,000

18

00:00:55,450 --> 00:00:53,600

applicants

19

00:00:57,520 --> 00:00:55,460

spent a week in the nation's capital

20

00:01:00,220 --> 00:00:57,530

becoming familiar with the history of

21

00:01:02,229 --> 00:01:00,230

space travels and of course taking notes

22

00:01:05,220 --> 00:01:02,239

in workshops dealing with various

23

00:01:08,080 --> 00:01:05,230

aspects of shuttle flight get it red-hot

24

00:01:10,270 --> 00:01:08,090

the next major milestone came in early

25

00:01:12,880 --> 00:01:10,280

July when the ten finalists were

26
00:01:15,190 --> 00:01:12,890
announced these teachers had survived an

27
00:01:17,290 --> 00:01:15,200
extensive screening process but they had

28
00:01:19,270 --> 00:01:17,300
to demonstrate even more rike stuff

29
00:01:22,020 --> 00:01:19,280
during their two-week stay at the

30
00:01:24,850 --> 00:01:22,030
Johnson Space Center in Houston Texas

31
00:01:26,890 --> 00:01:24,860
after a series of tests to ensure that

32
00:01:29,170 --> 00:01:26,900
they were medically fit to fly aboard

33
00:01:33,100 --> 00:01:29,180
the shuttle the ten were given a ride on

34
00:01:35,230 --> 00:01:33,110
the kc-135 a hollowed-out had inject

35
00:01:38,270 --> 00:01:35,240
that simulates weightlessness for short

36
00:01:44,420 --> 00:01:41,940
but finally on July 19 cops I squash

37
00:01:46,140 --> 00:01:44,430
they then destroy dating back

38
00:01:48,930 --> 00:01:46,150

congratulations and they have a letter e

39

00:01:51,090 --> 00:01:48,940

school teacher from Ohio just selected

40

00:01:53,940 --> 00:01:51,100

as the back-up plan today and pushed

41

00:01:55,980 --> 00:01:53,950

them across Journal a high school social

42

00:02:00,120 --> 00:01:55,990

studies teacher she's the one who

43

00:02:01,650 --> 00:02:00,130

actually try this place it's it's not

44

00:02:03,660 --> 00:02:01,660

often that a teacher is at a loss for

45

00:02:06,630 --> 00:02:03,670

words I know my students wouldn't think

46

00:02:09,300 --> 00:02:06,640

so I've made nine wonderful friends over

47

00:02:14,940 --> 00:02:09,310

the last two weeks when that shuttle

48

00:02:16,830 --> 00:02:14,950

goes they might do one body but there's

49

00:02:22,740 --> 00:02:16,840

gonna be 10 souls that I'm doing with me

50

00:02:26,280 --> 00:02:22,750

Thank You c'n see everything selection

51
00:02:31,790 --> 00:02:26,290
water training in beauty I've been a lot

52
00:02:35,250 --> 00:02:34,350
during the shuttle flight in addition to

53
00:02:38,160 --> 00:02:35,260
keeping a journal

54
00:02:41,340 --> 00:02:38,170
mrs. McAuliffe will seek to live lessons

55
00:02:50,170 --> 00:02:41,350
from stage one called the ultimate seeds

56
00:02:57,619 --> 00:02:53,960
no a number other expensive oddly zoned

57
00:02:58,309 --> 00:02:57,629
for classroom use after the majority for

58
00:03:00,860 --> 00:02:58,319
gold

59
00:03:03,619 --> 00:03:00,870
I would like to humanize the space age

60
00:03:05,509 --> 00:03:03,629
by giving a perspective from a non

61
00:03:06,920 --> 00:03:05,519
astronaut because I think the students

62
00:03:09,140 --> 00:03:06,930
will look at that and say this is an

63
00:03:11,119 --> 00:03:09,150

ordinary person this ordinary person is

64

00:03:13,100 --> 00:03:11,129

contributing to history and if they can

65

00:03:14,449 --> 00:03:13,110

make that connection then they're going

66

00:03:15,500 --> 00:03:14,459

to get excited about history they're

67

00:03:17,890 --> 00:03:15,510

going to get excited about the future

68

00:03:25,220 --> 00:03:17,900

they're going to get excited about space

69

00:03:29,970 --> 00:03:27,300

understandably things at the McCallum

70

00:03:31,740 --> 00:03:29,980

house have change for example there's

71

00:03:34,199 --> 00:03:31,750

now a notice missing throws on the

72

00:03:37,289 --> 00:03:34,209

freezer to the microwave but husband

73

00:03:39,110 --> 00:03:37,299

Evan Turner daughter Caroline and son

74

00:03:42,360 --> 00:03:39,120

Scott took it on there as

75

00:03:43,589 --> 00:03:42,370

responsibilities without reservation you

76
00:03:45,259 --> 00:03:43,599
know you're talking about a human being

77
00:03:47,309 --> 00:03:45,269
being free of the bonds of gravity

78
00:03:50,069 --> 00:03:47,319
orbiting the Earth or many human beings

79
00:03:52,289 --> 00:03:50,079
have done that and I so I think both of

80
00:03:55,440 --> 00:03:52,299
us feel that whatever the price in terms

81
00:03:56,399 --> 00:03:55,450
of readjustments are my taking on things

82
00:03:59,550 --> 00:03:56,409
that I probably should have been doing

83
00:04:01,289 --> 00:03:59,560
before anyway and hadn't done whatever

84
00:04:10,050 --> 00:04:01,299
those prices are they certainly pale in

85
00:04:14,190 --> 00:04:12,600
and because even though mrs. McAuliffe

86
00:04:16,319 --> 00:04:14,200
was a great economics teacher I think

87
00:04:18,539 --> 00:04:16,329
what I learned most from her was outside

88
00:04:21,120 --> 00:04:18,549

the classroom she taught me that the

89

00:04:23,879 --> 00:04:21,130

little person counts in that anyone can

90

00:04:25,430 --> 00:04:23,889

make an effect on our society and on the

91

00:04:27,690 --> 00:04:25,440

world she proved that by being the first

92

00:04:29,940 --> 00:04:27,700

private citizen in space and being the

93

00:04:32,340 --> 00:04:29,950

first teacher in space and I think she's

94

00:04:40,800 --> 00:04:32,350

a tribute to her profession and we're

95

00:04:43,560 --> 00:04:40,810

all very proud of her I mean the whole

96

00:04:45,240 --> 00:04:43,570

thing is so gorgeous you just want to
