

1
00:00:50,180 --> 00:00:56,340
29 4 minutes 35 to get on there too

2
00:01:04,979 --> 00:00:59,250
not a very big thing okay we'll see how

3
00:01:04,989 --> 00:01:08,140
Don

4
00:01:12,580 --> 00:01:10,090
but with the rationale again for going

5
00:01:27,880 --> 00:01:12,590
the fourth time we've got this is the

6
00:01:32,830 --> 00:01:31,000
okay that sounds good

7
00:01:37,360 --> 00:01:32,840
and remember the alternate circa factor

8
00:01:39,700 --> 00:01:37,370
was popped on a PCP and so we can't so

9
00:01:44,710 --> 00:01:39,710
we can't use the alternate actuator at

10
00:01:47,380 --> 00:01:44,720
all I don't think right so if a were to

11
00:01:50,170 --> 00:01:47,390
be blank we'd still be go providing bees

12
00:01:56,020 --> 00:01:51,940
if they happen to be in control for some

13
00:02:02,200 --> 00:01:58,930

and the be one was blank we still be go

14

00:02:04,359 --> 00:02:02,210

provided a was in control

15

00:02:12,290 --> 00:02:04,369

first that is that if you only have one

16

00:02:12,300 --> 00:02:17,520

we thought

17

00:02:24,580 --> 00:02:20,640

whatever so we cannot place in the state

18

00:02:26,770 --> 00:02:24,590

vector across but I can stand

19

00:02:31,649 --> 00:02:26,780

yeah I can't stand it so it's riding

20

00:02:31,659 --> 00:02:40,910

we have all the kickstand

21

00:02:40,920 --> 00:02:44,020

so yeah we

22

00:02:44,030 --> 00:02:48,929

yes

23

00:02:55,070 --> 00:02:51,670

come in two minutes so he has a big dick

24

00:02:57,200 --> 00:02:55,080

football get the man to a cylinder

25

00:03:06,010 --> 00:02:57,210

oh ok that's great I'll around with

26

00:03:10,070 --> 00:03:08,480

how'd your cubby I guess between its

27

00:03:12,170 --> 00:03:10,080

data take three and four he's going to

28

00:03:13,780 --> 00:03:12,180

do an IMU align I guess we should tell

29

00:03:16,490 --> 00:03:13,790

them we don't want to align IMU three

30

00:03:18,050 --> 00:03:16,500

hits failed you may not but we

31

00:03:19,850 --> 00:03:18,060

definitely don't want to do that that

32

00:03:23,870 --> 00:03:19,860

I'm you the way it is at let's give us

33

00:03:25,730 --> 00:03:23,880

some insight McLain at Franklin no we

34

00:03:27,200 --> 00:03:25,740

were just wondering we wanted to keep up

35

00:03:29,960 --> 00:03:27,210

with you could you give us a status on

36

00:03:36,800 --> 00:03:29,970

where you are in the EBA prep yeah we're

37

00:03:41,420 --> 00:03:36,810

just starting page 54 of the okay thank

38

00:03:43,550 --> 00:03:41,430

you TVA fly did that help yeah that's

39

00:03:45,020 --> 00:03:43,560

not real good news that puts them and

40

00:03:49,340 --> 00:03:45,030

that could put them as much as 40

41

00:03:51,860 --> 00:03:49,350

minutes behind the timeline the worst

42

00:03:53,870 --> 00:03:51,870

thing that happens to us here is that if

43

00:03:55,580 --> 00:03:53,880

we are indeed a half hour behind it

44

00:04:00,229 --> 00:03:55,590

means and we're going we're not

45

00:04:02,650 --> 00:04:00,239

successful on 18 a that they're gonna

46

00:04:06,650 --> 00:04:02,660

get outside a half an hour earlier later

47

00:04:10,699 --> 00:04:06,660

what what that means blind is that we do

48

00:04:12,949 --> 00:04:10,709

not we do not have a 21 a available to

49

00:04:15,770 --> 00:04:12,959

us if we press on with this because the

50

00:04:18,259 --> 00:04:15,780

batteries what that means is the I us

51
00:04:23,510 --> 00:04:18,269
will not be able will not be able to get

52
00:04:26,420 --> 00:04:23,520
off a deploy on time but that's that's

53
00:04:29,060 --> 00:04:26,430
where we may be stacking stacking some

54
00:04:35,240 --> 00:04:29,070
failures here flight that assumes that

55
00:04:41,570 --> 00:04:35,250
we elevated and we stuck after umbilical

56
00:04:44,810 --> 00:04:41,580
pool which is a much shorter EV a so we

57
00:04:47,060 --> 00:04:44,820
might be able to say that the EV a to go

58
00:04:50,870 --> 00:04:47,070
up to 29 degrees there's a little bit of

59
00:04:53,960 --> 00:04:50,880
a trade yeah yeah clock doesn't start

60
00:05:00,740 --> 00:04:53,970
till we go on batteries I'm in their cru

61
00:05:02,640 --> 00:05:00,750
state right okay we try on 18 am doesn't

62
00:05:04,990 --> 00:05:02,650
work

63
00:05:09,390 --> 00:05:05,000

I guess what they wanted was for you

64

00:05:13,660 --> 00:05:12,220

we don't get an elevator on 18

65

00:05:22,300 --> 00:05:13,670

never going to have developed I don't

66

00:05:26,470 --> 00:05:24,220

will deploy on a cine if they're after

67

00:05:32,580 --> 00:05:26,480

works if it doesn't work them well do an

68

00:05:38,920 --> 00:05:35,290

I mean we're going to use that

69

00:05:41,140 --> 00:05:38,930

we're going to use that that capped I

70

00:05:42,790 --> 00:05:41,150

might help to wherever time always point

71

00:05:45,670 --> 00:05:42,800

3 40 or something like that right Mike

72

00:05:46,960 --> 00:05:45,680

and now we get it elevated okay 258 now

73

00:05:48,249 --> 00:05:46,970

we're going to we're going to jump to

74

00:05:52,779 --> 00:05:48,259

that other page of the cap for the

75

00:05:54,279 --> 00:05:52,789

deployment okay yeah we don't get

76
00:05:56,529 --> 00:05:54,289
elevated we're going to stay in that one

77
00:05:58,570 --> 00:05:56,539
that we're in the original one and the

78
00:06:01,779 --> 00:05:58,580
deploy will be later than 18 and presume

79
00:06:03,820 --> 00:06:01,789
but that calls for your life be for long

80
00:06:09,969 --> 00:06:03,830
as you card in about two minutes at the

81
00:06:11,649 --> 00:06:09,979
day one is a few minutes okay let me

82
00:06:16,230 --> 00:06:11,659
walk can't talk to lion see if the where

83
00:06:23,710 --> 00:06:19,250
hey you're here

84
00:06:30,719 --> 00:06:27,070
water coming in

85
00:06:30,729 --> 00:06:35,860
sound of the connector

86
00:06:35,870 --> 00:06:42,540
we'll see what happens to see what they

87
00:06:47,760 --> 00:06:45,510
actually you look you saw it

88
00:06:55,410 --> 00:06:47,770

yeah because you're facing me

89

00:06:55,420 --> 00:06:58,880

right over here

90

00:07:04,969 --> 00:07:02,250

there's a little bubble in the lower

91

00:07:06,690 --> 00:07:04,979

right corner of the

92

00:07:08,880 --> 00:07:06,700

water

93

00:07:10,860 --> 00:07:08,890

looks like we're a little bit behind if

94

00:07:12,270 --> 00:07:10,870

we get behind about as much as 90

95

00:07:14,880 --> 00:07:12,280

minutes we may have to slip some of our

96

00:07:17,010 --> 00:07:14,890

other activities so if you could keep us

97

00:07:19,710 --> 00:07:17,020

informed than where you are we're trying

98

00:07:23,610 --> 00:07:19,720

to figure out how much we have fallen

99

00:07:35,830 --> 00:07:23,620

behind okay we'll keep you updated okay

100

00:07:44,760 --> 00:07:38,930

we can like you to work beyond just

101
00:07:49,850 --> 00:07:47,339
you probably have to take about four

102
00:07:51,990 --> 00:07:49,860
months for beds in the secure

103
00:07:58,760 --> 00:07:52,000
configuration before you take that leap

104
00:08:04,829 --> 00:08:01,999
take a minute determinants that speech

105
00:08:06,269 --> 00:08:04,839
okay right obviously can or work the

106
00:08:09,570 --> 00:08:06,279
troubleshooting procedures that are

107
00:08:11,449 --> 00:08:09,580
circles go ahead secure basically it

108
00:08:23,020 --> 00:08:11,459
will watch along with didn't help you

109
00:08:27,570 --> 00:08:24,890
Sukhoi time

110
00:08:33,030 --> 00:08:27,580
okay so you were about 40 minutes behind

111
00:08:34,590 --> 00:08:33,040
right now so go ahead Atlantis okay I've

112
00:08:39,270 --> 00:08:34,600
got the books has already copy whenever

113
00:08:43,020 --> 00:08:39,280

you're ready to talk to me okay Shannon

114

00:08:46,820 --> 00:08:43,030

it's fairly easy on the the contingency

115

00:08:50,370 --> 00:08:46,830

Evie a checklist we want to change step

116

00:08:54,060 --> 00:08:50,380

33 where it says steps 1 through 3 we

117

00:08:56,850 --> 00:08:54,070

want to make it 1 & 3 do not do step two

118

00:09:07,570 --> 00:08:56,860

which is transferring a US internal

119

00:09:13,740 --> 00:09:09,790

right now I

120

00:09:16,980 --> 00:09:15,900

and I don't think this we can say the

121

00:09:21,260 --> 00:09:16,990

last employer opportunity obviously

122

00:09:25,470 --> 00:09:21,270

because whatever and we have two Reds

123

00:09:34,720 --> 00:09:25,480

once we go on internal power they lost

124

00:09:34,730 --> 00:09:39,050

well

125

00:09:45,639 --> 00:09:41,440

just on the gel

126

00:09:51,230 --> 00:09:48,859

commands going back to channel go ahead

127

00:09:55,069 --> 00:09:51,240

answer thoughts and communicate here so

128

00:09:57,859 --> 00:09:55,079

that's what we're all right now okay we

129

00:09:59,420 --> 00:09:57,869

copy that no power in the power position

130

00:10:02,419 --> 00:09:59,430

of our back and battery and we'll take a

131

00:10:05,150 --> 00:10:02,429

look at that get back to you done we

132

00:10:07,009 --> 00:10:05,160

show 2245 maneuver to deploy attitude

133

00:10:09,230 --> 00:10:07,019

yes sir we should have deployed pad to

134

00:10:12,379 --> 00:10:09,240

you in just a few minutes well okay

135

00:10:13,910 --> 00:10:12,389

right we're better than loi better

136

00:10:17,960 --> 00:10:13,920

minute LLS although they tell me we have

137

00:10:20,660 --> 00:10:17,970

UHF which surprises me can fly photo yes

138

00:10:22,669 --> 00:10:20,670

which we'd like to get a checkpoint this

139

00:10:24,379 --> 00:10:22,679

El Oso if we could well okay let's talk

140

00:10:25,970 --> 00:10:24,389

about pay it's the timeline shows them

141

00:10:28,790 --> 00:10:25,980

starting to maneuver to deploy attitude

142

00:10:34,999 --> 00:10:28,800

in three minutes okay we'll come out a

143

00:10:41,290 --> 00:10:35,009

little sick berth you see 1 2 3 29 for

144

00:10:50,650 --> 00:10:43,350

now they said it could take up to you a

145

00:10:50,660 --> 00:10:54,740

okay I'm gonna take the umbilical

146

00:11:02,140 --> 00:10:59,040

boundary is able to enable pack on a

147

00:11:06,050 --> 00:11:02,150

great talker should get the company

148

00:11:06,060 --> 00:11:13,810

right okay I us birthday batteries

149

00:11:13,820 --> 00:11:21,950

we have the

150

00:11:21,960 --> 00:11:27,020

dead seconds

151

00:11:27,030 --> 00:11:37,369

5 4 3 2 1

152

00:11:37,379 --> 00:11:44,319

for the arms work as a high roller

153

00:11:50,470 --> 00:11:46,299

rates are good and we're going to 70

154

00:11:55,030 --> 00:11:50,480

degrees its rates good it's going right

155

00:11:57,789 --> 00:11:55,040

over top of us beautiful good play on

156

00:12:01,389 --> 00:11:57,799

time the season and the I us and yell

157

00:12:04,660 --> 00:12:01,399

they are are no way early on pleasure

158

00:12:06,639 --> 00:12:04,670

congratulations copy GNC thank you less

159

00:12:08,169 --> 00:12:06,649

than half a degree heirs and less than
