

1
00:03:05,860 --> 00:02:05,070

you

2
00:03:08,110 --> 00:03:05,870

seconds we'll listen Jim just to keep

3
00:03:10,960 --> 00:03:08,120

you updated what our plan is is to do as

4
00:03:13,540 --> 00:03:10,970

you tips out the twice orbital rate

5
00:03:15,210 --> 00:03:13,550

initiation and fly around and will keep

6
00:03:18,870 --> 00:03:15,220

your praise if we want to change that

7
00:03:30,310 --> 00:03:18,880

the other thing is we're heading on

8
00:03:31,630 --> 00:03:30,320

leaving k you in the whole time and of

9
00:03:37,420 --> 00:03:31,640

course if that changes will later

10
00:03:39,580 --> 00:03:37,430

awesome copy Jim we've got a tentative

11
00:03:44,010 --> 00:03:39,590

go for undocking from Moscow you have a

12
00:03:44,020 --> 00:04:20,490

hey over there now

13
00:04:28,180 --> 00:04:24,250

Atlantis Mary Houston from the time you

14

00:04:30,670 --> 00:04:28,190

give a go to the mirror crew to put the

15

00:04:33,070 --> 00:04:30,680

pressure pulse inside the spektr module

16

00:04:34,690 --> 00:04:33,080

it takes about a minute and a half for

17

00:04:36,850 --> 00:04:34,700

that pressure to ramp up so it may be

18

00:04:39,879 --> 00:04:36,860

that period of time before you would be

19

00:04:51,770 --> 00:04:39,889

able to see anything if there is any

20

00:05:17,270 --> 00:04:54,140

and he's a little collapse at that band

21

00:05:17,280 --> 00:05:28,490

closer

22

00:05:34,620 --> 00:05:31,370

so what would it mean I should the word

23

00:06:29,910 --> 00:05:34,630

since you have more level to go over all

24

00:06:41,490 --> 00:06:32,230

follow the cross my videos you get to

25

00:06:51,780 --> 00:06:48,280

there's uma thurman stone and Houston do

26
00:06:54,280 --> 00:06:51,790
you want us to stop at 300 on the way a

27
00:07:19,399 --> 00:06:54,290
primitive you have a go to proceed to

28
00:07:19,409 --> 00:07:25,129
north in shape

29
00:07:25,139 --> 00:09:01,720
therefore the most

30
00:09:08,530 --> 00:09:04,810
yeah damaged radiator and solar array on

31
00:09:10,509 --> 00:09:08,540
the spektr module at the base of that

32
00:09:12,699 --> 00:09:10,519
array which is pointed in the seven

33
00:09:14,920 --> 00:09:12,709
o'clock position that is considered by

34
00:09:16,840 --> 00:09:14,930
the Russian flight control team to be

35
00:09:18,400 --> 00:09:16,850
the most likely suspect for where the

36
00:09:55,210 --> 00:09:18,410
breach in the hull of Spectre may be

37
00:10:01,999 --> 00:10:00,109
that okay Ohio solo via preparing to

38
00:10:07,249 --> 00:10:02,009

release air into the spektr module now

39

00:10:09,739 --> 00:10:07,259

from the node of the mirror the valve is

40

00:10:28,300 --> 00:10:09,749

now open air is now being introduced

41

00:10:41,030 --> 00:10:31,250

t-top reporting some particles floating

42

00:10:57,930 --> 00:10:45,810

I wish disapproval give us a fella lower

43

00:11:00,810 --> 00:10:57,940

than usual nvidia permitted Mexico sorry

44

00:11:08,060 --> 00:11:00,820

matea that when you my own or sister and

45

00:11:12,600 --> 00:11:10,500

TTFN are reporting some particles

46

00:11:15,960 --> 00:11:12,610

emanating from the base of the solar

47

00:11:28,710 --> 00:11:15,970

array flying at a 45 degree angle toward

48

00:11:40,870 --> 00:11:28,720

the soyuz t tough reporting nothing else

49

00:11:40,880 --> 00:11:58,480

so let us know on you but the reality

50

00:12:03,160 --> 00:12:01,180

anatole solovyev asking vladimir TTFN

51
00:12:04,750 --> 00:12:03,170
aboard the shuttle if everything was

52
00:12:07,389 --> 00:12:04,760
floating from the base of the solar

53
00:12:09,250 --> 00:12:07,399
array and TTFN confirming that all the

54
00:12:18,010 --> 00:12:09,260
particles he saw came from the base of

55
00:12:21,250 --> 00:12:18,020
the array on the spectre TTFN also

56
00:12:22,570 --> 00:12:21,260
reconfirmed for both Salovey vanveen

57
00:12:23,889 --> 00:12:22,580
aground off on board the mirror and

58
00:12:25,630 --> 00:12:23,899
russian flight controllers through the

59
00:12:28,600 --> 00:12:25,640
mere relay system that it's established

60
00:12:30,340 --> 00:12:28,610
that no particles were seen emanating

61
00:12:32,920 --> 00:12:30,350
from the area of the damaged radiator on

62
00:12:37,150 --> 00:12:32,930
Spector which is a very evident as the

63
00:13:41,870 --> 00:12:37,160

white rectangular area on the specter on

64

00:14:08,250 --> 00:13:51,660

disregarding now approaching a horizon

65

00:14:09,870 --> 00:14:08,260

over the limb of the earth the second

66

00:14:35,360 --> 00:14:09,880

pulse of air now being introduced into

67

00:14:35,370 --> 00:14:56,390

Sakura

68

00:15:02,320 --> 00:14:58,940

oh please you are you using sublight

69

00:15:04,820 --> 00:15:02,330

sister yeah up the upper finishing area

70

00:15:11,590 --> 00:15:04,830

some people appeared Elisabetta

71

00:15:19,430 --> 00:15:16,970

with Vladimir ticked off reporting from

72

00:15:21,800 --> 00:15:19,440

aboard atlantis that he does not see any

73

00:15:25,760 --> 00:15:21,810

debris or any particles coming out of

74

00:15:27,500 --> 00:15:25,770

the spektr module this time comment made

75

00:15:29,210 --> 00:15:27,510

from a flight controller at the Russian

76

00:15:31,760 --> 00:15:29,220

Mission Control Center that the first a

77

00:15:47,550 --> 00:15:31,770

pulse of air probably cleared away any

78

00:15:55,120 --> 00:15:51,850

Atlantis Houston whenever you're ready

79

00:15:58,390 --> 00:15:55,130

you have a go to continue step off the

80

00:16:00,220 --> 00:15:58,400

rbar as planned and before doing the set

81

00:16:32,569 --> 00:16:00,230

burn we would like black seven out for

82

00:16:39,739 --> 00:16:35,479

he's a larger darling camera be until we

83

00:16:42,979 --> 00:16:39,749

can find something of interest ok Jim

84

00:16:44,900 --> 00:16:42,989

will do that and we sure don't want you

85

00:16:47,359 --> 00:16:44,910

guys to go to any any extraordinary

86

00:16:48,799 --> 00:16:47,369

lengths to try to find something you

87

00:17:19,819 --> 00:16:48,809

know if there's a something that you

88

00:17:19,829 --> 00:17:29,470

yes we do like camera Bravo
