

FLIGHT DAY

4

1
00:00:38,080 --> 00:00:35,950
let me start with commander salon via if

2
00:00:39,790 --> 00:00:38,090
I could sir you guys have done a

3
00:00:42,009 --> 00:00:39,800
tremendous job in the last few months

4
00:00:43,540 --> 00:00:42,019
getting mirror back shipshape in good

5
00:00:44,619 --> 00:00:43,550
health wondering if you could tell us

6
00:00:45,820 --> 00:00:44,629
what you think the odds are that

7
00:00:50,939 --> 00:00:45,830
eventually you'll be able to

8
00:00:55,869 --> 00:00:53,680
unfortunately the commander is behind us

9
00:00:57,610 --> 00:00:55,879
and he's doing his exercise right now on

10
00:01:00,850 --> 00:00:57,620
the treadmill so he won't be able to

11
00:01:03,279 --> 00:01:00,860
talk but I have been a busy time and a

12
00:01:05,100 --> 00:01:03,289
great deal repair works been done and I

13
00:01:08,590 --> 00:01:05,110

can tell you that these cosmonaut

14

00:01:11,950 --> 00:01:08,600

anatoly and pavel are just amazing at

15

00:01:13,810 --> 00:01:11,960

their ability to replace systems and at

16

00:01:17,050 --> 00:01:13,820

work hard it's been spectacular to watch

17

00:01:19,389 --> 00:01:17,060

and to help just along those lines

18

00:01:20,859 --> 00:01:19,399

leaving you or mr. vita Granoff could

19

00:01:22,090 --> 00:01:20,869

answer the question about Spectre I mean

20

00:01:23,889 --> 00:01:22,100

you guys must talk about it do you think

21

00:01:37,260 --> 00:01:23,899

the odds are any good that eventually

22

00:01:44,910 --> 00:01:40,000

nothing or 13 I will put up in a musical

23

00:01:48,250 --> 00:01:44,920

rent of whether options to revitalize

24

00:01:50,200 --> 00:01:48,260

respect to module unfortunately we'll

25

00:01:52,800 --> 00:01:50,210

probably not have enough time to

26

00:01:56,130 --> 00:01:52,810

complete it during our mission

27

00:02:00,880 --> 00:01:56,140

practically all hardware is ready for it

28

00:02:03,810 --> 00:02:00,890

all equipment and repair tools to find

29

00:02:08,469 --> 00:02:03,820

the link to our door and to try to

30

00:02:11,830 --> 00:02:08,479

repressurize net spektr module the

31

00:02:13,330 --> 00:02:11,840

question for commander will cut sir on

32

00:02:14,949 --> 00:02:13,340

this Super Bowl Sunday there doesn't

33

00:02:16,870 --> 00:02:14,959

really seem to be a corner of the United

34

00:02:18,070 --> 00:02:16,880

States you can't go without hearing a

35

00:02:19,540 --> 00:02:18,080

lot about all that's going on in

36

00:02:20,800 --> 00:02:19,550

Washington in recent days I was just

37

00:02:22,900 --> 00:02:20,810

curious if there was a corner of the

38

00:02:24,370 --> 00:02:22,910

solar system where you don't find out

39

00:02:25,810 --> 00:02:24,380

what's going on in Washington if you

40

00:02:29,949 --> 00:02:25,820

guys are able to keep up or if that's

41

00:02:32,500 --> 00:02:29,959

any kind of a distraction for you well

42

00:02:34,720 --> 00:02:32,510

actually we get used from home each day

43

00:02:37,150 --> 00:02:34,730

on the version of email that we have up

44

00:02:38,949 --> 00:02:37,160

here so you know it's such a mental

45

00:02:40,930 --> 00:02:38,959

break to read news from home we're able

46

00:02:46,120 --> 00:02:40,940

to keep up with what goes on on the

47

00:02:49,990 --> 00:02:46,130

sports field and in Washington but this

48

00:02:53,020 --> 00:02:50,000

bill cuz it's still hard wood yes it is

49

00:02:55,350 --> 00:02:53,030

Terry go ahead I just want to say hello

50

00:02:57,850 --> 00:02:55,360

and hope things are like that in Florida

51
00:02:59,590 --> 00:02:57,860
well they are indeed thank you and I'd

52
00:03:01,960 --> 00:02:59,600
like to turn to David Wilson any Thomas

53
00:03:03,220 --> 00:03:01,970
briefly David obviously after four

54
00:03:05,620 --> 00:03:03,230
months in space it must have been quite

55
00:03:06,940 --> 00:03:05,630
a sight to see endeavour pull up just

56
00:03:07,990 --> 00:03:06,950
wondering what your looking forward to

57
00:03:09,640 --> 00:03:08,000
the most when you get your feet back

58
00:03:12,340 --> 00:03:09,650
down on the ground if it's a specific

59
00:03:15,320 --> 00:03:12,350
food or drink or just seeing people or

60
00:03:18,320 --> 00:03:15,330
what's on your menu of things to do

61
00:03:21,710 --> 00:03:18,330
all of the above bill everything I think

62
00:03:23,560 --> 00:03:21,720
of I even driving my car up to a stop

63
00:03:26,300 --> 00:03:23,570

and go a monkey and getting a coffee

64

00:03:28,610 --> 00:03:26,310

every little thing I think of is

65

00:03:31,580 --> 00:03:28,620

something I can't wait to go do earth is

66

00:03:34,550 --> 00:03:31,590

a wonderful place time to pass the baton

67

00:03:36,980 --> 00:03:34,560

to Andy he's a very capable astronaut

68

00:03:38,270 --> 00:03:36,990

and he's ready for an experience of his

69

00:03:41,570 --> 00:03:38,280

life it'll be taught there it'll be

70

00:03:43,490 --> 00:03:41,580

great they were surprised you the most

71

00:03:44,750 --> 00:03:43,500

about working aboard mirror for four

72

00:03:46,190 --> 00:03:44,760

months so obviously did a lot of

73

00:03:53,270 --> 00:03:46,200

training to get there but were there any

74

00:03:56,060 --> 00:03:53,280

major surprises I honestly was surprised

75

00:03:57,830 --> 00:03:56,070

at just how much work it really is we

76

00:04:00,230 --> 00:03:57,840

really work for might say nine in the

77

00:04:02,720 --> 00:04:00,240

morning till midnight every day seven

78

00:04:05,470 --> 00:04:02,730

days a week holidays included for the

79

00:04:08,000 --> 00:04:05,480

most part and that's what it takes to

80

00:04:11,030 --> 00:04:08,010

really operate a space station and

81

00:04:12,680 --> 00:04:11,040

conduct a full science program and it

82

00:04:15,230 --> 00:04:12,690

really didn't hurt you once you get to

83

00:04:18,410 --> 00:04:15,240

expect that type of work level it's just

84

00:04:19,759 --> 00:04:18,420

what you do in space what about food

85

00:04:22,250 --> 00:04:19,769

David is there anything in particular

86

00:04:26,000 --> 00:04:22,260

looking forward to or a pizza a cold

87

00:04:28,850 --> 00:04:26,010

beer or anything like that I've

88

00:04:31,220 --> 00:04:28,860

requested a chopper a pizza with

89
00:04:33,310 --> 00:04:31,230
pepperoni and mushroom and I think a few

90
00:04:36,590 --> 00:04:33,320
beverages will go along fine with that

91
00:04:38,750 --> 00:04:36,600
and one last words for you sir for right

92
00:04:39,980 --> 00:04:38,760
now a lot of pundits and politicians of

93
00:04:41,990 --> 00:04:39,990
course before you launched back in

94
00:04:43,340 --> 00:04:42,000
September I recommend that against

95
00:04:45,260 --> 00:04:43,350
sending you the mere arguing that it

96
00:04:47,300 --> 00:04:45,270
wasn't safe what would you say to those

97
00:04:51,409 --> 00:04:47,310
folks now for much later with mirror and

98
00:04:53,330 --> 00:04:51,419
the condition is currently in I really

99
00:04:55,010 --> 00:04:53,340
appreciate that they looked out for us

100
00:04:57,950 --> 00:04:55,020
and I think their questions were very

101
00:04:59,870 --> 00:04:57,960
good and what we saw was our system

102
00:05:01,909 --> 00:04:59,880
working properly our system of checks

103
00:05:04,580 --> 00:05:01,919
and balances they came up with the right

104
00:05:06,800 --> 00:05:04,590
answer and I'm glad we're here I'm glad

105
00:05:09,200 --> 00:05:06,810
Andy's stay and we're getting you more

106
00:05:12,020 --> 00:05:09,210
than we ever expected out of phase one

107
00:05:14,180 --> 00:05:12,030
and we can look forward to a big benefit

108
00:05:17,450 --> 00:05:14,190
as we move into the international space

109
00:05:19,700 --> 00:05:17,460
station later this year question for

110
00:05:21,800 --> 00:05:19,710
Andy Thomas you said yesterday when you

111
00:05:23,270 --> 00:05:21,810
came into the meer core module that as

112
00:05:24,710 --> 00:05:23,280
you looked around you realize there was

113
00:05:26,610 --> 00:05:24,720

still quite a bit to learn to spite your

114

00:05:27,870 --> 00:05:26,620

training what are your first impressions

115

00:05:29,520 --> 00:05:27,880

to the station now that you've been

116

00:05:33,270 --> 00:05:29,530

there for a day what sort of surprises

117

00:05:36,210 --> 00:05:33,280

have you think the thing that strikes me

118

00:05:38,909 --> 00:05:36,220

the most is unlike the training modules

119

00:05:40,650 --> 00:05:38,919

which I saw in Russia there's awful lot

120

00:05:42,629 --> 00:05:40,660

of equipment stood on the roads under

121

00:05:44,280 --> 00:05:42,639

the floor and the ceiling in here that

122

00:05:46,290 --> 00:05:44,290

the cars court there's not as much space

123

00:05:48,750 --> 00:05:46,300

and that's the thing i'm going to notice

124

00:05:51,180 --> 00:05:48,760

the most i think is there's not as much

125

00:05:54,120 --> 00:05:51,190

working volume as so I don't dissipate

126

00:05:55,860 --> 00:05:54,130

it I think most folks going to

127

00:05:57,150 --> 00:05:55,870

Antarctica for an extended stay or

128

00:05:58,980 --> 00:05:57,160

certainly doing what you're doing would

129

00:06:01,409 --> 00:05:58,990

have some sense of trepidation I guess

130

00:06:02,760 --> 00:06:01,419

when you watch and never pull away in a

131

00:06:04,110 --> 00:06:02,770

couple of days have you given that any

132

00:06:06,629 --> 00:06:04,120

thought or you think you're pretty well

133

00:06:08,580 --> 00:06:06,639

psychologically prepared to embark on

134

00:06:13,020 --> 00:06:08,590

what really does amount to isolation and

135

00:06:14,490 --> 00:06:13,030

sort of a hardship assignment well

136

00:06:16,500 --> 00:06:14,500

you're right it is going to be isolated

137

00:06:19,200 --> 00:06:16,510

you know you think you psychologically

138

00:06:21,270 --> 00:06:19,210

prepared but things are tough and turn

139

00:06:23,640 --> 00:06:21,280

around surprise you I have to give you

140

00:06:25,830 --> 00:06:23,650

my responses to how i feel after the

141

00:06:28,560 --> 00:06:25,840

event of seeing and Beverly but I think

142

00:06:30,360 --> 00:06:28,570

it's going to be tough when we're here

143

00:06:32,730 --> 00:06:30,370

if you list your hobbies in your in your

144

00:06:35,279 --> 00:06:32,740

NASA bio is a horse riding mountain

145

00:06:36,870 --> 00:06:35,289

biking running surfing what are you

146

00:06:39,300 --> 00:06:36,880

going to do on mirror when you when you

147

00:06:40,650 --> 00:06:39,310

do catch the occasional few hours when

148

00:06:46,560 --> 00:06:40,660

you've got it to yourself and have some

149

00:06:48,480 --> 00:06:46,570

spare time well hopefully I will get

150

00:06:51,990 --> 00:06:48,490

some spare time we call music up here

151
00:06:54,570 --> 00:06:52,000
we've got CDs we've got CD ROMs we've

152
00:06:56,820 --> 00:06:54,580
got video films so we've got those as

153
00:06:58,860 --> 00:06:56,830
entertainment and we've got exercise

154
00:07:01,080 --> 00:06:58,870
machines up here so we can't exercise

155
00:07:04,589 --> 00:07:01,090
there's even a guitar up here so that we

156
00:07:06,120 --> 00:07:04,599
can play guitar if we get a chance I'll

157
00:07:07,790 --> 00:07:06,130
just this question really to anyone

158
00:07:09,990 --> 00:07:07,800
probably I guess commander will could

159
00:07:11,250 --> 00:07:10,000
senator Glenn flying in space in the

160
00:07:13,500 --> 00:07:11,260
fall of course it's generated a lot of

161
00:07:15,060 --> 00:07:13,510
interest on the ground we're actually

162
00:07:17,129 --> 00:07:15,070
this might be a good question for dr.

163
00:07:18,600 --> 00:07:17,139

wolf I was really wondering what your

164

00:07:21,089 --> 00:07:18,610

thoughts might be about the senator

165

00:07:22,740 --> 00:07:21,099

flying as a human being but also as a

166

00:07:24,719 --> 00:07:22,750

test subject for perhaps learning

167

00:07:26,550 --> 00:07:24,729

whatever could be learned from one

168

00:07:28,170 --> 00:07:26,560

person about the effects of

169

00:07:30,830 --> 00:07:28,180

weightlessness and aging and all of that

170

00:07:34,619 --> 00:07:30,840

what do you thought about that

171

00:07:38,159 --> 00:07:34,629

of course one of that as goals is to go

172

00:07:40,230 --> 00:07:38,169

to Mars and we are especially

173

00:07:43,080 --> 00:07:40,240

permanently with colonies down the line

174

00:07:46,020 --> 00:07:43,090

we have a lot to learn about that but of

175

00:07:48,360 --> 00:07:46,030

course the effects of gravity are

176

00:07:51,149 --> 00:07:48,370

largely responsible for the whole form

177

00:07:53,040 --> 00:07:51,159

and function of our bodies and by taking

178

00:07:54,929 --> 00:07:53,050

away and changing that variable we can

179

00:07:56,939 --> 00:07:54,939

learn a great deal about how our bodies

180

00:07:59,850 --> 00:07:56,949

work on earth and it is one of the very

181

00:08:04,019 --> 00:07:59,860

important things that we do in space for

182

00:08:05,459 --> 00:08:04,029

the benefit of all mankind and with

183

00:08:08,219 --> 00:08:05,469

senator Glenn I mean is that a good

184

00:08:10,080 --> 00:08:08,229

thing to do in your mind since the 177

185

00:08:14,519 --> 00:08:10,090

years our old up into space to do

186

00:08:16,290 --> 00:08:14,529

research with oh I get back to your

187

00:08:18,749 --> 00:08:16,300

previous question I did not know that

188

00:08:20,459 --> 00:08:18,759

Senator Vaughn was going to fly or I

189

00:08:21,899 --> 00:08:20,469

know nothing about that I've had very

190

00:08:24,059 --> 00:08:21,909

little news for the last three or four

191

00:08:28,409 --> 00:08:24,069

months so someone else might be bizarre

192

00:08:30,869 --> 00:08:28,419

able to answer that I could afford a van

193

00:08:35,550 --> 00:08:30,879

we both feel very happy to fly with very

194

00:08:36,810 --> 00:08:35,560

good 8530 price I understand i will let

195

00:08:38,009 --> 00:08:36,820

me get back to Dave real quick for a

196

00:08:39,540 --> 00:08:38,019

second one of the questions I meant to

197

00:08:40,889 --> 00:08:39,550

ask you earlier was that in the course

198

00:08:42,139 --> 00:08:40,899

of your four months aboard mirror which

199

00:08:44,939 --> 00:08:42,149

you ever had any moments where

200

00:08:46,380 --> 00:08:44,949

loneliness crap dinner or I won't say

201
00:08:48,540 --> 00:08:46,390
depression but I mean you are up there

202
00:08:50,880 --> 00:08:48,550
by yourself a stranger in a strange land

203
00:08:52,319 --> 00:08:50,890
if you will did you experience any of

204
00:08:56,220 --> 00:08:52,329
those emotions or was it pretty much a

205
00:08:58,949 --> 00:08:56,230
steady pace throughout the song degree

206
00:09:03,420 --> 00:08:58,959
off I did and you have to keep a good

207
00:09:06,180 --> 00:09:03,430
rational grip on your mind to hold those

208
00:09:08,579 --> 00:09:06,190
feelings at bay and this is something

209
00:09:11,069 --> 00:09:08,589
Andy and I will be discussing and the

210
00:09:12,150 --> 00:09:11,079
fire crews helps me with that and we're

211
00:09:14,519 --> 00:09:12,160
learning how to do that there's a

212
00:09:16,500 --> 00:09:14,529
somewhat of a language barrier where you

213
00:09:18,500 --> 00:09:16,510

can't express all the feelings you'd

214

00:09:21,269 --> 00:09:18,510

like to even though we can communicate

215

00:09:22,980 --> 00:09:21,279

operationally quite well so those

216

00:09:25,290 --> 00:09:22,990

feelings are a big part of this kind of

217

00:09:27,210 --> 00:09:25,300

a mission and it would be a great

218

00:09:30,060 --> 00:09:27,220

privilege to fly the Senators gone for

219

00:09:31,530 --> 00:09:30,070

any other and gentlemen I'm out of time

220

00:09:33,420 --> 00:09:31,540

let me just squeeze one more in here

221

00:09:35,220 --> 00:09:33,430

it's a for super bowl sunday down here I

222

00:09:36,960 --> 00:09:35,230

was wondering if any of the crew members

223

00:09:43,030 --> 00:09:36,970

who care to make a pic or say who the

224

00:09:48,710 --> 00:09:46,970

so I guess I could speak for the and for

225

00:09:50,329 --> 00:09:48,720

the crew of endeavor as well as the crew

226

00:09:52,040 --> 00:09:50,339

of the mirror and say that just there

227

00:09:54,320 --> 00:09:52,050

one place it will never be besides that

228

00:10:00,949 --> 00:09:54,330

the space where I complying right now

229

00:10:03,500 --> 00:10:00,959

they sitting on the 50-yard line from a

230

00:10:21,819 --> 00:10:03,510

song like your promo with Jim I likely

231

00:10:28,220 --> 00:10:24,759

probably spectrum of a feeling it's all

232

00:10:32,269 --> 00:10:28,230

clear mission started in august and you

233

00:10:39,800 --> 00:10:32,279

people tell us what is left to do in the

234

00:10:43,000 --> 00:10:39,810

time remaining at the end of your

235

00:10:46,910 --> 00:10:43,010

question by the end of our mission we

236

00:10:51,560 --> 00:10:46,920

have a lot of work to do with the French

237

00:10:55,220 --> 00:10:51,570

rest or not we'll be working together is

238

00:10:57,290 --> 00:10:55,230

the final results of our expedition my

239

00:11:03,290 --> 00:10:57,300

weapons videos remember I think it's too

240

00:11:06,889 --> 00:11:03,300

early to see about the results outside

241

00:11:13,400 --> 00:11:06,899

of the station we replaced the solar

242

00:11:16,670 --> 00:11:13,410

arrays 22 Facebook's looks to know

243

00:11:19,040 --> 00:11:16,680

experimental college experience a number

244

00:11:21,680 --> 00:11:19,050

two spot for complete various typical

245

00:11:25,340 --> 00:11:21,690

experiments on water the station every

246

00:11:27,790 --> 00:11:25,350

photos were very interesting we also

247

00:11:30,949 --> 00:11:27,800

replace the lack of onboard systems

248

00:11:33,079 --> 00:11:30,959

forever powder I believe we did good

249

00:11:36,050 --> 00:11:33,089

housekeeping on the station right now it

250

00:11:40,280 --> 00:11:36,060

is functioning well and we hope that the

251
00:11:42,610 --> 00:11:40,290
following missions will be very result

252
00:11:46,760 --> 00:11:42,620
phul poor poor and the next question

253
00:11:49,460 --> 00:11:46,770
again to you whenever I during your work

254
00:11:50,900 --> 00:11:49,470
on the MIR station we purchased the

255
00:11:54,020 --> 00:11:50,910
central computer

256
00:11:57,740 --> 00:11:54,030
trooper not working for a while what was

257
00:12:00,710 --> 00:11:57,750
the reason for those failures could you

258
00:12:03,380 --> 00:12:00,720
appreciate our colorful most likely if

259
00:12:07,210 --> 00:12:03,390
America specialist will explain better

260
00:12:12,190 --> 00:12:07,220
what the reasons for the failures war

261
00:12:15,410 --> 00:12:12,200
most likely those are not the technical

262
00:12:18,770 --> 00:12:15,420
disadvantages of our particular system I

263
00:12:22,430 --> 00:12:18,780

believe any kind of computer system I'm

264

00:12:25,280 --> 00:12:22,440

a reporter is working wash in space than

265

00:12:29,750 --> 00:12:25,290

it is working on the ground that deals

266

00:12:33,680 --> 00:12:29,760

with the level of radioactivity and also

267

00:12:36,530 --> 00:12:33,690

we have a lot to learn your career micro

268

00:12:41,120 --> 00:12:36,540

orbital debris is flying around for

269

00:12:45,500 --> 00:12:41,130

electrical impact and so home I think

270

00:12:53,450 --> 00:12:45,510

they're at least to shield one of those

271

00:12:57,320 --> 00:12:53,460

systems and this is what we are doing to

272

00:13:02,540 --> 00:12:57,330

our systems and any other system species

273

00:13:06,020 --> 00:13:02,550

may fail this is I think inevitable and

274

00:13:08,810 --> 00:13:06,030

new PCs you computer systems new

275

00:13:11,360 --> 00:13:08,820

generation is on the way and those will

276

00:13:14,780 --> 00:13:11,370

be working fine in space thank you very

277

00:13:18,230 --> 00:13:14,790

much yep you sure pregunta profitable

278

00:13:20,570 --> 00:13:18,240

yoga keep it Vidya tell Debra I have a

279

00:13:24,020 --> 00:13:20,580

question to some work on what is the

280

00:13:27,800 --> 00:13:24,030

impression from endeavor thank you for

281

00:13:31,550 --> 00:13:27,810

your question my adaptation I will

282

00:13:34,580 --> 00:13:31,560

recommend very smooth and quick on the

283

00:13:39,080 --> 00:13:34,590

first day of the flight I felt normal

284

00:13:45,199 --> 00:13:39,090

already and i want to say what of it

285

00:13:45,199 --> 00:13:45,209

right now I feel great push it later

286

00:13:51,650 --> 00:13:47,329

I have a lot of experience working with

287

00:13:55,939 --> 00:13:51,660

my colleagues here they're either stop

288

00:13:59,629 --> 00:13:55,949

him develop effective way also the

289

00:14:02,689 --> 00:13:59,639

launch was very beautiful of endeavor it

290

00:14:05,629 --> 00:14:02,699

was all smooth right now we are in space

291

00:14:10,369 --> 00:14:05,639

within two days in space all systems

292

00:14:13,699 --> 00:14:10,379

were working fine oh and my personal

293

00:14:17,650 --> 00:14:13,709

impression perfect portrait all the

294

00:14:21,549 --> 00:14:17,660

views of the earth and the space are

295

00:14:25,639 --> 00:14:21,559

unbelievable I am very much impressed

296

00:14:30,650 --> 00:14:25,649

this company of course the view of the

297

00:14:37,009 --> 00:14:30,660

main station area was quite impressive

298

00:14:40,280 --> 00:14:37,019

for me also when we dock and when we got

299

00:14:42,169 --> 00:14:40,290

into the station reporting on the size

300

00:14:45,489 --> 00:14:42,179

of the equipment and everything what was

301
00:14:50,829 --> 00:14:45,499
working it was a great impression for me

302
00:14:54,410 --> 00:14:50,839
I want to say the guys thank you for

303
00:14:58,359 --> 00:14:54,420
keeping the station in such a great

304
00:15:02,379 --> 00:14:58,369
shape all systems are working perfectly

305
00:15:05,989 --> 00:15:02,389
come on talk about it was my dream to

306
00:15:09,739 --> 00:15:05,999
come to the main station we go and now

307
00:15:13,189 --> 00:15:09,749
my dream came true recorded ago but I

308
00:15:16,519 --> 00:15:13,199
can see the station with her in a much

309
00:15:18,379 --> 00:15:16,529
better condition than I expected to be

310
00:15:21,679 --> 00:15:18,389
working the last question to david wood

311
00:15:24,650 --> 00:15:21,689
Bishop Rainier to water puppet a local

312
00:15:27,350 --> 00:15:24,660
premiere what are your impressions from

313
00:15:30,410 --> 00:15:27,360

the MIR station are you satisfied with

314

00:15:32,329 --> 00:15:30,420

your activities in Russian please the

315

00:15:34,309 --> 00:15:32,339

impression of your stay in the Russian

316

00:15:38,900 --> 00:15:34,319

space station Mir rain please the health

317

00:15:41,629 --> 00:15:38,910

in Russian if it is possible right in

318

00:15:46,039 --> 00:15:41,639

front of each other thank you everything

319

00:15:50,389 --> 00:15:46,049

was great this is a great station very

320

00:15:51,060 --> 00:15:50,399

able crew very safe operations with the

321

00:15:53,790 --> 00:15:51,070

screen

322

00:15:58,130 --> 00:15:53,800

we had a lot to work to do a lot of

323

00:16:01,080 --> 00:15:58,140

fixing to do and we're continuing to

324

00:16:06,480 --> 00:16:01,090

you're working everything is fine you

325

00:16:12,330 --> 00:16:06,490

know and I feel great thank you very

326

00:16:16,640 --> 00:16:12,340

much time giving the phone to my

327

00:16:19,410 --> 00:16:16,650

colleague from Interfax another thing

328

00:16:22,740 --> 00:16:19,420

drop alert or people who are working at

329

00:16:26,550 --> 00:16:22,750

the Mission Control Center I working

330

00:16:30,030 --> 00:16:26,560

great and it was a pleasure for me to

331

00:16:34,290 --> 00:16:30,040

find out how close they work with the

332

00:16:37,590 --> 00:16:34,300

crew everything was great I guess

333

00:16:39,750 --> 00:16:37,600

somebody Interfax Andre Curie I have a

334

00:16:43,920 --> 00:16:39,760

question to David wolf David please tell

335

00:16:46,560 --> 00:16:43,930

me what most interesting experiments you

336

00:16:49,740 --> 00:16:46,570

will be conducting we save the for

337

00:17:00,210 --> 00:16:49,750

upcoming days kind of experiments you

338

00:17:04,800 --> 00:17:00,220

plan to conduct during did know soon i

339

00:17:07,829 --> 00:17:04,810

will give the food to ain t 0 for you

340

00:17:11,760 --> 00:17:07,839

should get a burger boy play my favorite

341

00:17:13,470 --> 00:17:11,770

was the short one we're gonna get you

342

00:17:16,620 --> 00:17:13,480

ready to bring the results of this

343

00:17:20,990 --> 00:17:16,630

experiment on the ground and aunty is

344

00:17:24,750 --> 00:17:21,000

going to continue working on some of it

345

00:17:30,050 --> 00:17:24,760

Buddhism at the not-self this is a great

346

00:17:35,970 --> 00:17:34,170

another question I asked another okay a

347

00:17:40,200 --> 00:17:35,980

question to pathogenic ratified oh

348

00:17:43,460 --> 00:17:40,210

please avvocato restless how do you

349

00:17:46,530 --> 00:17:43,470

assess the level of readiness of

350

00:17:50,940 --> 00:17:46,540

American astronauts for long-duration

351
00:17:53,760 --> 00:17:50,950
missions I have to say that all of them

352
00:17:56,670 --> 00:17:53,770
without any exception everybody who

353
00:18:00,600 --> 00:17:56,680
comes to Libya station experienced

354
00:18:04,049 --> 00:18:00,610
astronauts most of them

355
00:18:07,710 --> 00:18:04,059
of experience in space previously for

356
00:18:10,380 --> 00:18:07,720
example John plaza in other people who

357
00:18:14,480 --> 00:18:10,390
come here those are grown-up astronauts

358
00:18:18,150 --> 00:18:14,490
they have great level of preparation and

359
00:18:20,340 --> 00:18:18,160
as to the level of preparation of

360
00:18:22,490 --> 00:18:20,350
working with the experiments I think

361
00:18:26,070 --> 00:18:22,500
this is the highest level of preparation

362
00:18:29,160 --> 00:18:26,080
possible of course it is impossible to

363
00:18:32,669 --> 00:18:29,170

get ready for anything what can come up

364

00:18:35,700 --> 00:18:32,679

on the station and do the same way as we

365

00:18:39,299 --> 00:18:35,710

are training in Russia we are training

366

00:18:41,610 --> 00:18:39,309

for three or five years of course that

367

00:18:44,909 --> 00:18:41,620

they have a little bit of less a level

368

00:18:46,950 --> 00:18:44,919

of preparation in housekeeping for the

369

00:18:51,980 --> 00:18:46,960

MIR station specifically but you know

370

00:18:58,250 --> 00:18:51,990

this is another area also the question

371

00:19:01,130 --> 00:18:58,260

280 do you believe you are in australian

372

00:19:03,960 --> 00:19:01,140

astronaut or an american astronaut

373

00:19:11,940 --> 00:19:03,970

because you were born in 3d or american

374

00:19:14,990 --> 00:19:11,950

astronaut you are they do not own our

375

00:19:17,909 --> 00:19:15,000

cover-up I'm an international cosmonaut
