

1
00:04:49,330 --> 00:04:46,930
we understand and understand such

2
00:04:53,290 --> 00:04:49,340
actions need to be performed and these actions are further

3
00:04:55,839 --> 00:04:53,300
set out, we move on to configuration

4
00:04:57,760 --> 00:04:55,849
number one engine and 17 we lay the end of the perry

5
00:05:01,659 --> 00:04:57,770
p and further, according to this

6
00:05:05,800 --> 00:05:01,669
diagram, it's clear whether it's from the question

7
00:05:11,649 --> 00:05:05,810
otherwise I open the water page came for

8
00:05:19,300 --> 00:05:11,659
2 children 2 start working itself means

9
00:05:26,399 --> 00:05:19,310
immediately you need to indicate the earth we lay down 0

10
00:05:26,409 --> 00:05:50,140
so let's say it

11
00:05:57,560 --> 00:05:55,250
means you cross it out to

12
00:06:03,230 --> 00:05:57,570
cross out up to 1 preparation we

13
00:06:05,510 --> 00:06:03,240

flashed it we don't do next it

14

00:06:07,280 --> 00:06:05,520

should be next to the amplifier look

15

00:06:38,439 --> 00:06:07,290

with it look carefully it should

16

00:06:38,449 --> 00:10:46,850

we're already nearby, there's already a reserve,

17

00:11:00,730 --> 00:10:50,810

everything sounds in the dachas, there's now there is a

18

00:11:06,660 --> 00:11:05,590

Anatoly, you asked about this

19

00:11:10,150 --> 00:11:06,670

transfer of

20

00:11:12,340 --> 00:11:10,160

closing the hatches to the right, I'm afraid that we won't be

21

00:11:14,740 --> 00:11:12,350

able to do this because we are

22

00:11:51,030 --> 00:11:14,750

tied to telemetry, we have further

23

00:11:51,040 --> 00:11:55,590

copy

24

00:11:55,600 --> 00:12:06,519

thousands of control system
