

POSSIBL

1  
00:00:04,870 --> 00:00:02,310  
i know it might sound a little bit

2  
00:00:07,349 --> 00:00:04,880  
sci-fi but could you imagine if we could

3  
00:00:09,910 --> 00:00:07,359  
harness the power of a solar storm as it

4  
00:00:12,150 --> 00:00:09,920  
sweeps past our small planet if we could

5  
00:00:13,830 --> 00:00:12,160  
capture that energy we could supply our

6  
00:00:16,870 --> 00:00:13,840  
energy what i'd like to learn about the

7  
00:00:20,630 --> 00:00:16,880  
sun is that will it ever blow up or die

8  
00:00:23,189 --> 00:00:20,640  
magnetism spectra systems cycles all

9  
00:00:25,349 --> 00:00:23,199  
different things using the sun

10  
00:00:27,029 --> 00:00:25,359  
very important aspect of space weather

11  
00:00:29,269 --> 00:00:27,039  
because as we become more and more

12  
00:00:31,589 --> 00:00:29,279  
technologically advanced our satellites

13  
00:00:34,150 --> 00:00:31,599

cool thing about sunspots is somewhat

14

00:00:35,990 --> 00:00:34,160

cooler than the surface of the sun
