

1
00:00:12,080 --> 00:00:05,630
asian japanese prime minister's office

2
00:00:15,099 --> 00:00:12,090
for toichi how do you read me mush mush

3
00:00:18,800 --> 00:00:15,109
ii bukas na koi mascota hello

4
00:00:24,410 --> 00:00:18,810
Cucaracha I hear you very well this is

5
00:00:27,230 --> 00:00:24,420
no Bochy at Kibo hello nobody sir yeah I

6
00:00:32,440 --> 00:00:27,240
know I want your casa Prime Minister

7
00:00:40,549 --> 00:00:36,950
hello Prime Minister so could you please

8
00:00:43,970 --> 00:00:40,559
give a message to note some roses phone

9
00:00:47,770 --> 00:00:43,980
Coco no it's an aroma the other this is

10
00:00:51,200 --> 00:00:47,780
Yukio Hatoyama Prime Minister of Japan

11
00:00:54,860 --> 00:00:51,210
so I'm very happy that you are very well

12
00:00:58,729 --> 00:00:54,870
and doing very well so you have a five

13
00:01:02,720 --> 00:00:58,739

month long stay at the station this is a

14

00:01:05,630 --> 00:01:02,730

big mission dr we thought it there no

15

00:01:09,590 --> 00:01:05,640

you look very healthy very well so

16

00:01:11,990 --> 00:01:09,600

that's great although I hatami sorry

17

00:01:14,960 --> 00:01:12,000

acha master when I told I myself Prime

18

00:01:17,539 --> 00:01:14,970

Minister happy new years I must know

19

00:01:21,679 --> 00:01:17,549

focus on a day and thank you for your

20

00:01:26,060 --> 00:01:21,689

message you do not stop yes i have

21

00:01:28,520 --> 00:01:26,070

started a very good stay towards the

22

00:01:32,480 --> 00:01:28,530

five-month day and i also appreciate

23

00:01:36,020 --> 00:01:32,490

Japanese peoples good message suitable

24

00:01:40,940 --> 00:01:36,030

people call me an alien I have never

25

00:01:43,490 --> 00:01:40,950

been to whatever base yet look I ND no

26

00:01:47,600 --> 00:01:43,500

booty some coffee or cool story I hope

27

00:01:50,149 --> 00:01:47,610

you really do a great mission oh oh well

28

00:01:55,190 --> 00:01:50,159

I really hope that your mission will go

29

00:01:57,550 --> 00:01:55,200

smoothly hi any others i must it my mom

30

00:02:01,310 --> 00:01:57,560

what I should thank you for the message

31

00:02:05,800 --> 00:02:01,320

so I'm far from the earth I am rotating

32

00:02:09,710 --> 00:02:05,810

around the earth yes sir as one of a

33

00:02:13,340 --> 00:02:09,720

was done on humankind little bit i think

34

00:02:18,410 --> 00:02:13,350

the planet earth is really beautiful han

35

00:02:22,490 --> 00:02:18,420

tenido some myself up in the space i

36

00:02:25,400 --> 00:02:22,500

want to tell everybody for thank you for

37

00:02:28,880 --> 00:02:25,410

wonderful beautiful earth we're in de

38

00:02:32,330 --> 00:02:28,890

coca so how does the earth look from up

39

00:02:35,210 --> 00:02:32,340

there is it beautiful and bright and you

40

00:02:38,330 --> 00:02:35,220

can you distinguish between the day and

41

00:02:42,740 --> 00:02:38,340

night well I'm sure you have hard time

42

00:02:44,870 --> 00:02:42,750

do you get good sleep hi are you got

43

00:02:50,300 --> 00:02:44,880

those I must on also it's oedema yes

44

00:02:54,850 --> 00:02:50,310

thank you as you can see this window of

45

00:02:57,850 --> 00:02:54,860

Kibo module is open right now it's a day

46

00:03:03,710 --> 00:02:57,860

and there is a beautiful contrast

47

00:03:08,380 --> 00:03:03,720

between the dark face and blue earth and

48

00:03:12,020 --> 00:03:08,390

white cloud each colors are very

49

00:03:16,310 --> 00:03:12,030

distinguishable and I can see really the

50

00:03:18,789 --> 00:03:16,320

blue planet and I really feel that all

51
00:03:22,970 --> 00:03:18,799
the living things on earth is beautiful

52
00:03:25,990 --> 00:03:22,980
this is my third week into space and I'm

53
00:03:29,449 --> 00:03:26,000
getting used to the life cycle on

54
00:03:31,610 --> 00:03:29,459
spaceships and during the day I see the

55
00:03:35,270 --> 00:03:31,620
beautiful earth and during the night I

56
00:03:38,180 --> 00:03:35,280
see the beautiful stars so now i have

57
00:03:43,009 --> 00:03:38,190
really i can look at all that so you

58
00:03:46,580 --> 00:03:43,019
have day and night hi so this nano

59
00:03:48,860 --> 00:03:46,590
coxeter station along excurses the

60
00:03:52,610 --> 00:03:48,870
international few days foundation

61
00:03:56,180 --> 00:03:52,620
rotates around the earth in one and half

62
00:03:59,870 --> 00:03:56,190
hours so 45 minutes in day and 45

63
00:04:02,360 --> 00:03:59,880

minutes is night so there is a very

64

00:04:05,030 --> 00:04:02,370

clear distinguish between the day and

65

00:04:06,870 --> 00:04:05,040

night yoga very much thank you no it's

66

00:04:08,910 --> 00:04:06,880

done now it's

67

00:04:12,810 --> 00:04:08,920

Minister color but that could you please

68

00:04:17,370 --> 00:04:12,820

give a message hi happy new year this is

69

00:04:22,800 --> 00:04:17,380

Patsy ocala bata of next oh how is the

70

00:04:24,900 --> 00:04:22,810

happy new year in space I a coveted I

71

00:04:26,730 --> 00:04:24,910

senior chemist immediate overtime us so

72

00:04:31,970 --> 00:04:26,740

this name I don't know Minister call

73

00:04:35,100 --> 00:04:31,980

about the happy new year well so I have

74

00:04:38,100 --> 00:04:35,110

encountered a new year in space and I'm

75

00:04:42,390 --> 00:04:38,110

really happy this international space

76

00:04:46,500 --> 00:04:42,400

station is not just for technology it's

77

00:04:50,610 --> 00:04:46,510

also a venue for cultural exchange so I

78

00:04:55,620 --> 00:04:50,620

introduced various Japanese traditions

79

00:04:58,560 --> 00:04:55,630

and it looks place this is a calligraphy

80

00:05:01,890 --> 00:04:58,570

that I wrote and I showed this to

81

00:05:03,720 --> 00:05:01,900

Russian and American astronauts I showed

82

00:05:06,570 --> 00:05:03,730

them that this is what Japanese children

83

00:05:09,180 --> 00:05:06,580

do at New Year and also you see the

84

00:05:13,320 --> 00:05:09,190

Japanese badminton and you see the rice

85

00:05:15,600 --> 00:05:13,330

cake behind me so I use these to

86

00:05:18,330 --> 00:05:15,610

introduce the Japanese traditions it's

87

00:05:21,180 --> 00:05:18,340

kind of a cultural exchange so Kibo

88

00:05:25,260 --> 00:05:21,190

module is really a place for cultural

89

00:05:27,960 --> 00:05:25,270

exchange thank you no bud some prime

90

00:05:30,770 --> 00:05:27,970

minister do you have questions what will

91

00:05:36,120 --> 00:05:30,780

you do so you showed me the calligraphy

92

00:05:39,390 --> 00:05:36,130

of harmony I think that your letter is

93

00:05:42,780 --> 00:05:39,400

beautiful when you use the brush to

94

00:05:45,450 --> 00:05:42,790

write that letter did you have any

95

00:05:47,190 --> 00:05:45,460

difficulty so the snare no atashi oh no

96

00:05:50,010 --> 00:05:47,200

hon tony kanaan gu Jae Deok ku ku

97

00:05:53,190 --> 00:05:50,020

kandaen aw shoot well in this barrel

98

00:05:56,550 --> 00:05:53,200

gravity I did the calligraphy for the

99

00:06:01,320 --> 00:05:56,560

first time and to be honest it was

100

00:06:05,130 --> 00:06:01,330

difficult than extra vehicle activities

101
00:06:08,070 --> 00:06:05,140
EBA because you see as I was writing my

102
00:06:12,960 --> 00:06:08,080
body was getting away from the paper and

103
00:06:16,200 --> 00:06:12,970
also that ink I had difficulty in

104
00:06:18,270 --> 00:06:16,210
placing the ink at the right place but I

105
00:06:20,700 --> 00:06:18,280
think I did quite well

106
00:06:23,160 --> 00:06:20,710
my efforts paid off that's very

107
00:06:27,450 --> 00:06:23,170
interesting what I was just taking

108
00:06:30,540 --> 00:06:27,460
calligraphy I see we use you gravitate

109
00:06:32,940 --> 00:06:30,550
to write letters you know Terry I want

110
00:06:35,640 --> 00:06:32,950
to ask no booty son think you are

111
00:06:38,970 --> 00:06:35,650
staying for a long term so you probably

112
00:06:42,030 --> 00:06:38,980
are facing some mysteries of life you're

113
00:06:46,290 --> 00:06:42,040

perfectly so we do have to respect life

114

00:06:48,960 --> 00:06:46,300

we want to respect life so in the space

115

00:06:54,659 --> 00:06:48,970

everybody's okay what is a good

116

00:06:58,620 --> 00:06:54,669

sometimes you give you try to give birth

117

00:07:02,250 --> 00:06:58,630

or you try to kind of nurture life you

118

00:07:04,800 --> 00:07:02,260

know if that possible and stay the

119

00:07:09,200 --> 00:07:04,810

mystery of life this is a really

120

00:07:12,350 --> 00:07:09,210

important topic for us in the scientific

121

00:07:16,409 --> 00:07:12,360

experiments we have two big themes

122

00:07:21,320 --> 00:07:16,419

environment and technologies energy and

123

00:07:24,440 --> 00:07:21,330

in this cable modules we have some life

124

00:07:28,650 --> 00:07:24,450

Tanya no so tight this is a plant

125

00:07:32,330 --> 00:07:28,660

experiment we have a seed and we try to

126

00:07:37,110 --> 00:07:32,340

give water and try to grow this plant

127

00:07:40,409 --> 00:07:37,120

even in this module when it's not you

128

00:07:44,420 --> 00:07:40,419

know it's an organic but we still can

129

00:07:49,590 --> 00:07:44,430

grow plan and I want to see how it grows

130

00:07:52,740 --> 00:07:49,600

and of course the earth down there that

131

00:07:56,159 --> 00:07:52,750

is really a place of life I can really

132

00:07:58,140 --> 00:07:56,169

feel there is life on Earth so what we

133

00:08:02,090 --> 00:07:58,150

can do in order to protect the

134

00:08:05,040 --> 00:08:02,100

environment that's a big theme for the

135

00:08:08,490 --> 00:08:05,050

plants and then I guess you also have

136

00:08:13,040 --> 00:08:08,500

animals I hear that you've made some

137

00:08:19,290 --> 00:08:13,050

experiment with fish and also the frogs

138

00:08:23,279 --> 00:08:19,300

computer they sell you on it's probably

139

00:08:26,940 --> 00:08:23,289

difficult so right we're going to do so

140

00:08:27,600 --> 00:08:26,950

in the future when there might be some

141

00:08:30,270 --> 00:08:27,610

human

142

00:08:33,120 --> 00:08:30,280

in the space is that still far ahead

143

00:08:35,850 --> 00:08:33,130

it's still difficult to you think so

144

00:08:39,209 --> 00:08:35,860

it's naomi you East mother's name I know

145

00:08:42,719 --> 00:08:39,219

well that's a really good question i'ma

146

00:08:45,120 --> 00:08:42,729

go check some of our predecessors would

147

00:08:48,319 --> 00:08:45,130

she acting look guys that's agata

148

00:08:53,630 --> 00:08:48,329

muscular she's conducting research of a

149

00:08:57,960 --> 00:08:53,640

space live show higher living animals

150

00:09:01,769 --> 00:08:57,970

reply species we do want to conduct

151

00:09:05,329 --> 00:09:01,779

experiments in those as well we are now

152

00:09:07,759 --> 00:09:05,339

in space and the fact that I am in space

153

00:09:13,170 --> 00:09:07,769

well I think this is a great opportunity

154

00:09:16,170 --> 00:09:13,180

to conduct experiment using my body so

155

00:09:20,250 --> 00:09:16,180

staying in zero gravity for half a year

156

00:09:23,460 --> 00:09:20,260

what kind of effect will that give we

157

00:09:25,769 --> 00:09:23,470

want to accumulate that kind of data so

158

00:09:29,040 --> 00:09:25,779

that in the future that astronauts can

159

00:09:32,759 --> 00:09:29,050

accumulate better than you boots and

160

00:09:35,939 --> 00:09:32,769

how about Minister color but do you have

161

00:09:38,370 --> 00:09:35,949

questions discover even know which time

162

00:09:42,210 --> 00:09:38,380

do I gotta take you into space in

163

00:09:47,250 --> 00:09:42,220

discovery this time you flew on so you

164

00:09:49,439 --> 00:09:47,260

do you have any impressions hi desi

165

00:09:52,139 --> 00:09:49,449

alioto's amazon oh that's a whole tree

166

00:09:55,530 --> 00:09:52,149

conquer minister my americano special

167

00:09:58,920 --> 00:09:55,540

luckily five years ago i flew on space

168

00:10:02,130 --> 00:09:58,930

shuttle and this time i flew on Russian

169

00:10:05,280 --> 00:10:02,140

Soyuz so I had a chance to try two

170

00:10:08,430 --> 00:10:05,290

different spacecraft there are

171

00:10:11,040 --> 00:10:08,440

differences I'm a technician engineer so

172

00:10:15,800 --> 00:10:11,050

I'm interested in those differences the

173

00:10:18,480 --> 00:10:15,810

US has multi-purpose space battleship

174

00:10:22,230 --> 00:10:18,490

rasmussen that can deliver a lot of

175

00:10:27,240 --> 00:10:22,240

people at one the Russian base craft is

176

00:10:30,689 --> 00:10:27,250

kind of a very stable one and what the

177

00:10:36,960 --> 00:10:30,699

design is it was based on that how to

178

00:10:38,100 --> 00:10:36,970

send the people stabili to Japan we have

179

00:10:41,860 --> 00:10:38,110

no man

180

00:10:45,610 --> 00:10:41,870

spacecraft and also there is a robotic

181

00:10:49,330 --> 00:10:45,620

arm on Kibo module I call this a cobalt

182

00:10:53,770 --> 00:10:49,340

small robots so Japanese technology is

183

00:10:56,140 --> 00:10:53,780

utilized in these modules and I think

184

00:10:58,960 --> 00:10:56,150

we're now in an era where we can really

185

00:11:01,090 --> 00:10:58,970

have a difference make a difference with

186

00:11:05,590 --> 00:11:01,100

Japanese technologies Thank You mr.

187

00:11:08,830 --> 00:11:05,600

noguchi thank you very much actually we

188

00:11:11,770 --> 00:11:08,840

have here children from Hamas elementary

189

00:11:13,960 --> 00:11:11,780

school where you come graduated now do

190

00:11:17,620 --> 00:11:13,970

you have any questions anybody have

191

00:11:24,940 --> 00:11:17,630

questions yes why did you become an

192

00:11:31,150 --> 00:11:24,950

astronaut hyenas are gone bajwa Edith on

193

00:11:33,970 --> 00:11:31,160

good afternoon well yes I liked faraway

194

00:11:37,000 --> 00:11:33,980

places and space and when I became an

195

00:11:39,970 --> 00:11:37,010

adult I wanted to see some broad area

196

00:11:44,260 --> 00:11:39,980

and that led to my going to the space

197

00:11:46,170 --> 00:11:44,270

now this time coming here I really just

198

00:11:49,480 --> 00:11:46,180

don't do no assets are the beautiful

199

00:11:53,830 --> 00:11:49,490

aspect of the earth and this is a great

200

00:11:58,000 --> 00:11:53,840

experiment and venue of experiment thank

201
00:12:04,210 --> 00:11:58,010
you very much I slaughter saw any other

202
00:12:08,440 --> 00:12:04,220
yes okay Morocco you Judas is it fun to

203
00:12:12,310 --> 00:12:08,450
be in on gravity site hi ho chimeric

204
00:12:15,520 --> 00:12:12,320
arigato mu 0 class Stockman I thank you

205
00:12:21,190 --> 00:12:15,530
yes it's fun you can go up and go down

206
00:12:24,420 --> 00:12:21,200
very easily and you can actually go fly

207
00:12:27,340 --> 00:12:24,430
to a faraway module without knowing

208
00:12:29,970 --> 00:12:27,350
however this is non gravity and

209
00:12:35,020 --> 00:12:29,980
everything many things are floating and

210
00:12:37,440 --> 00:12:35,030
so how should we utilize such aspect for

211
00:12:40,180 --> 00:12:37,450
the earth is something that many

212
00:12:44,290 --> 00:12:40,190
engineers technicians are thinking about

213
00:12:49,060 --> 00:12:44,300

so we want to use this venue of space

214

00:12:50,500 --> 00:12:49,070

and to contribute to the earth small

215

00:12:56,590 --> 00:12:50,510

article thank you

216

00:12:59,410 --> 00:12:56,600

go go go mr. Kato ah no go go go get in

217

00:13:01,390 --> 00:12:59,420

your stay for five months what is this

218

00:13:03,790 --> 00:13:01,400

something what is the thing that you're

219

00:13:07,290 --> 00:13:03,800

looking forward to the most are you know

220

00:13:10,360 --> 00:13:07,300

that much mr. cutter thank you very much

221

00:13:13,390 --> 00:13:10,370

well I am looking forward to a lot of

222

00:13:16,750 --> 00:13:13,400

things but two things one is to permit

223

00:13:19,720 --> 00:13:16,760

it look at how earth is I'm going to

224

00:13:23,710 --> 00:13:19,730

continue to look what shirt we go round

225

00:13:26,380 --> 00:13:23,720

and round the earth the earth is

226

00:13:28,480 --> 00:13:26,390

changing its the living thing so it

227

00:13:31,270 --> 00:13:28,490

really changes depending on the season

228

00:13:33,370 --> 00:13:31,280

and the place and the nation and so I

229

00:13:36,460 --> 00:13:33,380

want to have a close look after these

230

00:13:39,880 --> 00:13:36,470

changes and actually during my stay in

231

00:13:43,930 --> 00:13:39,890

space my fellow colleague Yamazaki Sun

232

00:13:46,270 --> 00:13:43,940

will be coming in around March and so

233

00:13:49,030 --> 00:13:46,280

for the first time through Japanese

234

00:13:51,580 --> 00:13:49,040

people will be in outer space and we can

235

00:13:53,560 --> 00:13:51,590

have a Japanese community here in the

236

00:13:56,310 --> 00:13:53,570

International Space Station i'm looking

237

00:14:01,169 --> 00:13:56,320

forward to see my colleague here zurich

238

00:14:09,939 --> 00:14:06,579

Hadassah well I'm I'd swim for my club

239

00:14:13,509 --> 00:14:09,949

and sometimes I encounter difficulties

240

00:14:16,090 --> 00:14:13,519

until you became astronauts when you had

241

00:14:18,549 --> 00:14:16,100

hard times in training before you became

242

00:14:22,179 --> 00:14:18,559

astronaut how did you overcome such

243

00:14:24,669 --> 00:14:22,189

difficulties osea attitude Conahan thank

244

00:14:28,569 --> 00:14:24,679

you very much so you're swimming that's

245

00:14:30,910 --> 00:14:28,579

great because a swimming is one of the

246

00:14:33,369 --> 00:14:30,920

training sessions to become astronauts

247

00:14:36,579 --> 00:14:33,379

so if you do well now that will work

248

00:14:39,549 --> 00:14:36,589

later on well when I was a small I used

249

00:14:42,759 --> 00:14:39,559

to play baseball soccer and you said I

250

00:14:44,859 --> 00:14:42,769

had field and track as well but you know

251

00:14:47,379 --> 00:14:44,869

what is important when you're facing

252

00:14:49,359 --> 00:14:47,389

difficulties to overcome the

253

00:14:51,939 --> 00:14:49,369

difficulties together with your friends

254

00:14:54,340 --> 00:14:51,949

as a team if you're strong enough you

255

00:14:56,799 --> 00:14:54,350

maybe you can overcome alone but when

256

00:14:58,989 --> 00:14:56,809

you're with a team with a friends you

257

00:15:02,199 --> 00:14:58,999

can stimulate each other and then

258

00:15:04,720 --> 00:15:02,209

overcome difficulties together and by

259

00:15:07,900 --> 00:15:04,730

overcoming difficulties you can become

260

00:15:09,970 --> 00:15:07,910

stronger you can become greater and you

261

00:15:13,809 --> 00:15:09,980

have to have the imagination towards

262

00:15:17,470 --> 00:15:13,819

that in overcoming difficulties you are

263

00:15:19,359 --> 00:15:17,480

going to look forward to what will

264

00:15:23,340 --> 00:15:19,369

happen after you overcame such

265

00:15:28,840 --> 00:15:23,350

difficulties our next todo como con todo

266

00:15:32,889 --> 00:15:28,850

mr. hakama yoga journal or dug it well

267

00:15:36,910 --> 00:15:32,899

when the rocket lifted off then was

268

00:15:39,460 --> 00:15:36,920

launched how did you feel arigato otoko

269

00:15:42,720 --> 00:15:39,470

Kivar ok da kalma thank you very much

270

00:15:47,259 --> 00:15:42,730

well this time the rocket was so used a

271

00:15:49,840 --> 00:15:47,269

Russian rocket whatta you could have

272

00:15:52,929 --> 00:15:49,850

actually compared to its space shuttle I

273

00:15:56,859 --> 00:15:52,939

thought that the speed was slower that

274

00:15:59,919 --> 00:15:56,869

was my friend's opinion but well I was

275

00:16:03,030 --> 00:15:59,929

sort of comparing the space shuttle with

276

00:16:08,999 --> 00:16:03,040

so use without intentionally

277

00:16:12,879 --> 00:16:09,009

intentionally however when the

278

00:16:14,110 --> 00:16:12,889

spacecraft leave it goes straight up and

279

00:16:18,150 --> 00:16:14,120

that's the same

280

00:16:22,930 --> 00:16:18,160

but for both spacecraft you they

281

00:16:24,820 --> 00:16:22,940

overcome the gravity and they read they

282

00:16:27,250 --> 00:16:24,830

fly into the space and it's really

283

00:16:30,460 --> 00:16:27,260

exciting and that that was saying for

284

00:16:40,269 --> 00:16:30,470

the both thank you very much next

285

00:16:43,540 --> 00:16:40,279

question oko casa well in the ISS what's

286

00:16:46,290 --> 00:16:43,550

the most inconvenient thing for you so

287

00:16:49,960 --> 00:16:46,300

this nima who came to Thomas well yes

288

00:16:54,220 --> 00:16:49,970

well not really inconvenient however

289

00:16:57,280 --> 00:16:54,230

what is disappointing sometimes is that

290

00:17:01,540 --> 00:16:57,290

I'm so far away from people on earth I'm

291

00:17:07,689 --> 00:17:01,550

away from my family and that's something

292

00:17:11,549 --> 00:17:07,699

that's not sad however recently we have

293

00:17:15,660 --> 00:17:11,559

a consent email and we can have

294

00:17:19,090 --> 00:17:15,670

telephone calls and we have have TV

295

00:17:24,280 --> 00:17:19,100

communications together with the the

296

00:17:27,309 --> 00:17:24,290

earth so therefore i can see second of

297

00:17:29,650 --> 00:17:27,319

all directly talk with at the japanese

298

00:17:32,230 --> 00:17:29,660

elementary school children and junior

299

00:17:34,180 --> 00:17:32,240

high school children and people in on

300

00:17:36,460 --> 00:17:34,190

earth and i can feel that i'm still

301

00:17:41,169 --> 00:17:36,470

connected with the earth and that is a

302

00:17:44,590 --> 00:17:41,179

very special and precious time for me

303

00:17:48,490 --> 00:17:44,600

not on goggle next she knows who mr.

304

00:17:51,580 --> 00:17:48,500

Chenault well i play baseball with you

305

00:17:54,580 --> 00:17:51,590

but in space what happens if you throw a

306

00:17:58,299 --> 00:17:54,590

ball with all your force is no good

307

00:18:01,419 --> 00:17:58,309

don't worry oh yes mr. shi no thank you

308

00:18:04,750 --> 00:18:01,429

very much i also played baseball when I

309

00:18:07,660 --> 00:18:04,760

was small and astronauts rukala there it

310

00:18:10,570 --> 00:18:07,670

was also playing baseball with you were

311

00:18:15,070 --> 00:18:10,580

small so we always talk about baseball

312

00:18:16,960 --> 00:18:15,080

now here we bought a baseball with me

313

00:18:21,010 --> 00:18:16,970

this is actually the same ball that I

314

00:18:23,620 --> 00:18:21,020

also pitched five years ago but what

315

00:18:25,660 --> 00:18:23,630

will happen if I do this with all my

316

00:18:27,250 --> 00:18:25,670

might I think it will go to the other

317

00:18:30,910 --> 00:18:27,260

end of the space station

318

00:18:34,180 --> 00:18:30,920

we'll come back looks very slow however

319

00:18:38,830 --> 00:18:34,190

at this time the space station is flying

320

00:18:41,500 --> 00:18:38,840

at a speed of 2,500 kilometers and so

321

00:18:46,090 --> 00:18:41,510

that that ball will be going at a speed

322

00:18:50,920 --> 00:18:46,100

of 2,500 kilometers some water to learn

323

00:18:54,280 --> 00:18:50,930

thank you very much and nobody saw so

324

00:18:57,580 --> 00:18:54,290

you can see the purple ball floating so

325

00:19:00,190 --> 00:18:57,590

I suppose we'll have to think of a

326

00:19:02,920 --> 00:19:00,200

different rule in the space for playing

327

00:19:06,420 --> 00:19:02,930

baseball because the ball floats so

328

00:19:09,910 --> 00:19:06,430

towards the success of the mission

329

00:19:12,340 --> 00:19:09,920

please send a message to know which song

330

00:19:14,710 --> 00:19:12,350

well thank you very much for your

331

00:19:19,380 --> 00:19:14,720

efforts we're all excited to see your

332

00:19:23,140 --> 00:19:19,390

activities and so if could you know

333

00:19:25,720 --> 00:19:23,150

stole our study people one person from

334

00:19:28,240 --> 00:19:25,730

each nation could come into the

335

00:19:31,330 --> 00:19:28,250

International Space Station and look at

336

00:19:35,680 --> 00:19:31,340

together I'm sure that all the conflicts

337

00:19:38,680 --> 00:19:35,690

will disappear and so that is a dream

338

00:19:42,130 --> 00:19:38,690

that I have a hope that I have for the

339

00:19:43,480 --> 00:19:42,140

future and from your perspective don't

340

00:19:46,890 --> 00:19:43,490

you think that's something we'd like to

341

00:19:50,980 --> 00:19:46,900

do to make the world to make the Earth's

342

00:19:52,450 --> 00:19:50,990

someplace without war I am misarista

343

00:19:54,790 --> 00:19:52,460

going to see you what about it up Yes

344

00:19:57,940 --> 00:19:54,800

Prime Minister Hatoyama thank you very

345

00:20:01,120 --> 00:19:57,950

much for your beautiful words well my

346

00:20:04,180 --> 00:20:01,130

I'm myself also look at down at the

347

00:20:09,430 --> 00:20:04,190

earth and I can't believe that such a

348

00:20:12,310 --> 00:20:09,440

beautiful place be a venue for a war and

349

00:20:14,650 --> 00:20:12,320

conflict and I think it is important for

350

00:20:17,350 --> 00:20:14,660

us to build together the beautiful earth

351
00:20:19,800 --> 00:20:17,360
now at the International Space Station

352
00:20:22,990 --> 00:20:19,810
all the groove eat dinner together

353
00:20:29,580 --> 00:20:23,000
Americans Russians Japanese all our

354
00:20:32,470 --> 00:20:29,590
different however we always frankly talk

355
00:20:34,480 --> 00:20:32,480
with each other and I'm sure that we'll

356
00:20:37,010 --> 00:20:34,490
be able to understand each other if we

357
00:20:40,390 --> 00:20:37,020
can exchange Frank opinion

358
00:20:43,610 --> 00:20:40,400
now since Janet this is January seventh

359
00:20:45,950 --> 00:20:43,620
perhaps this is occasion for us to eat

360
00:20:50,540 --> 00:20:45,960
an anoxic are you one of the rice

361
00:20:52,730 --> 00:20:50,550
porridge meal that we eat this year at

362
00:20:56,240 --> 00:20:52,740
this time of the year now Minister

363
00:20:59,210 --> 00:20:56,250

calabaza please it was like some awards

364

00:21:03,350 --> 00:20:59,220

oh well thank you in March so otra nota

365

00:21:07,550 --> 00:21:03,360

yamazaki will join you and I look

366

00:21:12,260 --> 00:21:07,560

forward for your task I hope you'll take

367

00:21:16,640 --> 00:21:12,270

a good care of yourself Thank You

368

00:21:21,470 --> 00:21:16,650

Minister now from Hamas suka elementary

369

00:21:23,720 --> 00:21:21,480

school I'm gonna be knockin gotta move

370

00:21:30,830 --> 00:21:23,730

it so from how much elementary school

371

00:21:33,050 --> 00:21:30,840

you have a message yes eight hundred of

372

00:21:35,840 --> 00:21:33,060

us from how much because elementary

373

00:21:40,220 --> 00:21:35,850

school and all the elementary and middle

374

00:21:43,970 --> 00:21:40,230

school kids we really hope that you will

375

00:21:46,460 --> 00:21:43,980

do your mission and you will deliver a

376

00:21:50,510 --> 00:21:46,470

vision and hope to all the children

377

00:21:55,910 --> 00:21:50,520

around the world I we look forward for

378

00:22:00,020 --> 00:21:55,920

your return hi ari atoll a Hamas kosoko

379

00:22:03,290 --> 00:22:00,030

nihonto yoga today thank you all of you

380

00:22:06,650 --> 00:22:03,300

from how much scar elementary school I

381

00:22:09,740 --> 00:22:06,660

hope that you were really busted feels

382

00:22:13,340 --> 00:22:09,750

that there's a great dream and hope I

383

00:22:17,270 --> 00:22:13,350

hope that we can I can give you a lot of

384

00:22:19,790 --> 00:22:17,280

news and I mean no signs I with David

385

00:22:24,470 --> 00:22:19,800

oka so let ya know is that wave our

386

00:22:27,290 --> 00:22:24,480

hands to no good thank you so much I

387

00:22:29,780 --> 00:22:27,300

mean arigato hatami Saudi coveted I Jean

388

00:22:33,110 --> 00:22:29,790

so you could also thank you and thank u

389

00:22:34,880 --> 00:22:33,120

prime minister and minister and to all

390

00:22:36,890 --> 00:22:34,890

of you from how much climbing tree

391

00:22:40,010 --> 00:22:36,900

school station this is Houston ACR that

392

00:22:41,480 --> 00:22:40,020

concludes the event thanks Thank You

393

00:22:43,460 --> 00:22:41,490

Prime Minister Hatoyama and all

394

00:22:44,660 --> 00:22:43,470

participants in Japan station we are now
