

1  
00:00:04,610 --> 00:00:02,210  
hi I'm Jeff Williams I'm here with a TJ

2  
00:00:07,550 --> 00:00:04,620  
creamer and sweetie noguchi and all of

3  
00:00:09,860 --> 00:00:07,560  
us are twittering from space and all of

4  
00:00:12,980 --> 00:00:09,870  
us I believe twittered pre-flight as

5  
00:00:16,220 --> 00:00:12,990  
well we have recognized over the last

6  
00:00:18,109 --> 00:00:16,230  
year or so that it's a great way to get

7  
00:00:20,689 --> 00:00:18,119  
the word out to the general public as to

8  
00:00:22,099 --> 00:00:20,699  
what we're doing in the space program

9  
00:00:23,980 --> 00:00:22,109  
because the space program obviously

10  
00:00:27,410 --> 00:00:23,990  
belongs to the people and the people

11  
00:00:29,320 --> 00:00:27,420  
need to know what we're doing in TJ I

12  
00:00:31,849 --> 00:00:29,330  
know you've been Twitter and as as well

13  
00:00:33,709 --> 00:00:31,859

preflight and a little bit in flip so

14

00:00:36,290 --> 00:00:33,719

tell us a little bit about your

15

00:00:37,760 --> 00:00:36,300

experience a couple of things that I was

16

00:00:41,240 --> 00:00:37,770

trying to do while we were twittering

17

00:00:44,119 --> 00:00:41,250

pre-flight was to give the sense of our

18

00:00:46,729 --> 00:00:44,129

activities our pace our interests in a

19

00:00:48,440 --> 00:00:46,739

little bit of the unknown aspect of what

20

00:00:50,990 --> 00:00:48,450

we do on a daily basis to the

21

00:00:53,000 --> 00:00:51,000

Twitterverse and I opened up questions

22

00:00:54,560 --> 00:00:53,010

to to the people who are following me

23

00:00:56,689 --> 00:00:54,570

and asked them that ask me the questions

24

00:00:59,180 --> 00:00:56,699

they wanted me to address and we spent

25

00:01:01,099 --> 00:00:59,190

several days back-to-back answering the

26

00:01:03,130 --> 00:01:01,109

questions and giving picture tours of

27

00:01:05,140 --> 00:01:03,140

baikonur picture tours of Star City and

28

00:01:07,250 --> 00:01:05,150

since we've been up on the space station

29

00:01:08,810 --> 00:01:07,260

the twittering pace has slowed down just

30

00:01:12,410 --> 00:01:08,820

a little bit because we've lost our

31

00:01:13,969 --> 00:01:12,420

ability to tweet real time but that is a

32

00:01:16,340 --> 00:01:13,979

project that Jeff and I are working on

33

00:01:18,710 --> 00:01:16,350

near and dear to our hearts to to make

34

00:01:21,710 --> 00:01:18,720

lifetime tweeting so we can communicate

35

00:01:23,840 --> 00:01:21,720

with you real time and get those

36

00:01:26,120 --> 00:01:23,850

questions get that interest back up and

37

00:01:28,030 --> 00:01:26,130

share with you all what we are doing

38

00:01:30,530 --> 00:01:28,040

which we think is so interesting up here

39

00:01:33,350 --> 00:01:30,540

Thanks and sweetie you've also been

40

00:01:36,620 --> 00:01:33,360

twittering it tell us a little bit about

41

00:01:39,350 --> 00:01:36,630

your experience yeah be happy to just a

42

00:01:41,359 --> 00:01:39,360

two example I'll be twittering from

43

00:01:43,310 --> 00:01:41,369

space and there's a two responses that I

44

00:01:45,800 --> 00:01:43,320

remember one from the high school kids

45

00:01:49,130 --> 00:01:45,810

in Japan that he has no interest in

46

00:01:51,080 --> 00:01:49,140

space so so far but just listening or

47

00:01:52,880 --> 00:01:51,090

the reading my Twitter he's just

48

00:01:54,710 --> 00:01:52,890

starting to follow the oldest space news

49

00:01:59,209 --> 00:01:54,720

that's one good thing the other thing is

50

00:02:02,359 --> 00:01:59,219

I had a one-on-one the VIP call with the

51  
00:02:04,999 --> 00:02:02,369  
Prime Minister Hatoyama and I wrote

52  
00:02:07,550 --> 00:02:05,009  
about the conversation on my Twitter and

53  
00:02:10,520 --> 00:02:07,560  
the next day surprise surprise mr. huh

54  
00:02:11,440 --> 00:02:10,530  
trauma replied on the Twitter so rting

55  
00:02:14,020 --> 00:02:11,450  
to me

56  
00:02:18,729 --> 00:02:14,030  
via Twitter so someday we do all the

57  
00:02:20,110 --> 00:02:18,739  
beep calls via Twitter and actually a

58  
00:02:22,290 --> 00:02:20,120  
few months ago I didn't know what

59  
00:02:25,210 --> 00:02:22,300  
Twitter was so I'm relatively new at it

60  
00:02:28,750 --> 00:02:25,220  
and I haven't been twittering as much as

61  
00:02:30,670 --> 00:02:28,760  
I intended to in-flight but as TJ

62  
00:02:32,770 --> 00:02:30,680  
mentioned we're working on internet

63  
00:02:34,630 --> 00:02:32,780

access real-time internet access up here

64

00:02:37,780 --> 00:02:34,640

we're all excited to get that turns out

65

00:02:40,270 --> 00:02:37,790

it's not quite as simple as as we had

66

00:02:42,670 --> 00:02:40,280

hoped so we're troubleshooting it the

67

00:02:46,120 --> 00:02:42,680

team on the ground has been working on

68

00:02:47,740 --> 00:02:46,130

it extensively over the last several

69

00:02:51,220 --> 00:02:47,750

weeks trying to troubleshoot the

70

00:02:54,160 --> 00:02:51,230

problems but like everything that has to

71

00:02:55,569 --> 00:02:54,170

do with space exploration nothing even

72

00:02:57,550 --> 00:02:55,579

the things that we take for granted on

73

00:02:59,440 --> 00:02:57,560

the earth nothing comes easy hopefully

74

00:03:02,559 --> 00:02:59,450

we'll get it soon and we'll get that

75

00:03:07,390 --> 00:03:02,569

those direct tweets as I guess you call

76

00:03:09,100 --> 00:03:07,400

them from space to earth anyway good
