

1
00:00:15,049 --> 00:00:12,799
ftv which is a storage area and when you

2
00:00:19,460 --> 00:00:15,059
come into this area you can go down to

3
00:00:22,370 --> 00:00:19,470
the docking compartment and what's

4
00:00:24,350 --> 00:00:22,380
called the mrm and then use of you I

5
00:00:29,240 --> 00:00:24,360
think Steve Steven here for let him tell

6
00:00:31,220 --> 00:00:29,250
you any sewing oh this is pretty free

7
00:00:32,780 --> 00:00:31,230
constricted swindle environment here in

8
00:00:34,400 --> 00:00:32,790
the camera was almost too pretty to see

9
00:05:27,649 --> 00:00:34,410
through the window but if you looked in

10
00:05:27,659 --> 00:05:52,189
after we get to the blanket off

11
00:05:58,439 --> 00:05:55,980
to get the Cooper on it so in the

12
00:06:00,990 --> 00:05:58,449
morning we had the depressive take all

13
00:06:04,589 --> 00:06:01,000

the air out of the Cooper and then here

14

00:06:06,480 --> 00:06:04,599

we are leaving after we attack we attach

15

00:06:09,089 --> 00:06:06,490

the two different hatch and now we're

16

00:06:11,850 --> 00:06:09,099

having to open up a can put air back

17

00:06:13,290 --> 00:06:11,860

inside of it one of the fun things like

18

00:06:14,999 --> 00:06:13,300

I said before about working in the

19

00:06:16,890 --> 00:06:15,009

degree is that you can work in any

20

00:06:19,140 --> 00:06:16,900

attitude any direction you want can be

21

00:06:21,510 --> 00:06:19,150

up and you can have a bunch of people in

22

00:06:22,710 --> 00:06:21,520

a small space for with and on the ground

23

00:08:10,870 --> 00:06:22,720

in a trainer it would be really
