20  
00:01:48,800 --> 00:01:31,940  
after hearing also the report of the RSC

21  
00:01:52,760 --> 00:01:48,810  
Energia we have that main crew for Soyuz

22  
00:01:57,399 --> 00:01:52,770  
is confirmed consisting of alexander

23  
00:02:00,830 --> 00:01:57,409  
escorts of commander mikhail kornienko

24  
00:02:04,069 --> 00:02:00,840  
slide engineer and Tracy

25  
00:02:05,750 --> 00:02:04,079  
gold will die sir flight engineer and

26

00:02:10,880 --> 00:02:05,760

the backup crew

27

00:02:14,690 --> 00:02:10,890

mistress Makuta mr. borisenko and mr.

28

00:02:19,720 --> 00:02:14,700

Scott it was also decided to continue

29

00:02:22,370 --> 00:02:19,730

preparing the rocket for the watch

30

00:02:29,120 --> 00:02:22,380

schedule to other any additions or

31

00:02:31,870 --> 00:02:29,130

changes please commission members both

32

00:02:38,560 --> 00:02:31,880

changes therefore the official decision

33

00:02:43,840 --> 00:02:41,060

now we will hear the report of the

34

00:02:46,850 --> 00:02:43,850

manned space flight program director

35

00:02:50,690 --> 00:02:46,860

Alexei krasnov Derek Sandra Mikaela

36

00:02:54,580 --> 00:02:50,700

Tracey finally we are at a very exciting

37

00:02:59,750 --> 00:02:54,590

moment for you where we are

38

00:03:02,240 --> 00:02:59,760

participating in their final commission

39

00:03:05,180 --> 00:03:02,250

meeting on confirming the crew I know

40

00:03:07,880 --> 00:03:05,190

how long it took you to train and

41

00:03:11,840 --> 00:03:07,890

prepare especially for Alexander Mikhail

42

00:03:13,760 --> 00:03:11,850

both of you spent over 10 years waiting

43

00:03:19,220 --> 00:03:13,770

for your opportunity to flight and so

44

00:03:21,170 --> 00:03:19,230

finally we are in the start here so we

45

00:03:26,690 --> 00:03:21,180

only have one day left before the lunch

46

00:03:32,500 --> 00:03:26,700

you will be doing a lot of work and a

47

00:03:35,090 --> 00:03:32,510

lot of expected of you on orbit you will

48

00:03:36,920 --> 00:03:35,100

be working on integrating the new module

49

00:03:41,660 --> 00:03:36,930

that will be delivered by the shuttle

50

00:03:48,050 --> 00:03:41,670

and you will have great responsibility

51  
00:03:49,580 --> 00:03:48,060  
as the rs-24 commander I know that today

52  
00:03:51,170 --> 00:03:49,590  
you don't have any space light

53  
00:03:54,590 --> 00:03:51,180  
experience but in two months you will

54  
00:04:00,560 --> 00:03:54,600  
and you will spend the time learning the

55  
00:04:03,949 --> 00:04:00,570  
station and Tracy as an experienced crew

56  
00:04:06,740 --> 00:04:03,959  
member will help you I'm sure so I wish

57  
00:04:11,570 --> 00:04:06,750  
you the best and the tomorrow we'll see

58  
00:04:13,130 --> 00:04:11,580  
you again in Baikonur will see you

59  
00:04:17,210 --> 00:04:13,140  
launch at then will it be expecting to

60  
00:04:19,070 --> 00:04:17,220  
see you back tomorrow Kira crowd Sharman

61  
00:04:21,710 --> 00:04:19,080  
please Alex

118

00:06:55,010 --> 00:06:51,540

morning I would like to thank all the

119

00:06:58,790 --> 00:06:55,020

commission members for the trust that

120

00:07:01,130 --> 00:06:58,800

they showed us even right now sitting

121

00:07:03,800 --> 00:07:01,140

here in this chair I can tell you that

122

00:07:08,330 --> 00:07:03,810

the crew is already and thank you for

123

00:07:12,890 --> 00:07:08,340

the good wishes that we heard address to

124

00:07:19,510 --> 00:07:12,900

our crew we will work we will try to

125

00:07:22,490 --> 00:07:19,520

work nominally yeah the ocean and the

126

00:07:27,710 --> 00:07:22,500

little sliver for the guys that are

127

00:07:34,460 --> 00:07:27,720

sitting to the left of us I wish see the

128

00:07:36,590 --> 00:07:34,470

day when you guys move to the right when

129

00:07:38,090 --> 00:07:36,600

you fly in space for us this is a very

130

00:07:44,870 --> 00:07:38,100

exciting moment and we're ready to work

131

00:07:50,480 --> 00:07:44,880

thank you very much thank you engineer

132

00:07:53,450 --> 00:07:50,490

mikhail kornienko dear Commission

133

00:07:56,170 --> 00:07:53,460

members I would like to join our

134

00:07:59,750 --> 00:07:56,180

commander and that will be very brief

135

00:08:07,310 --> 00:07:59,760

thank you very much for the trust and we

136

00:08:09,130 --> 00:08:07,320

will not let you down thank you - Tracy

137

Caldwell Dyson

138

00:08:16,250 --> 00:08:12,920

yep our whiskey thank you I will try to

139

00:08:19,720 --> 00:08:16,260

say my words in Russian and then repeat

140

00:08:25,640 --> 00:08:23,210

I think our rocket is already and this

141

00:08:28,850 --> 00:08:25,650

crew is already the

142

00:08:32,079 --> 00:08:28,860

though we both cruiser an orbit end on

143

00:08:36,110 --> 00:08:32,089

the ground already our families already

144

00:08:39,440 --> 00:08:36,120

the right see is nuts net reaching you

145

00:08:41,600 --> 00:08:39,450

let's start this adventure who ready our

146

00:08:43,820 --> 00:08:41,610

Rockets ready this crews ready the

147

00:08:47,060 --> 00:08:43,830

quraan orbit and the crews on the ground

148

00:08:50,600 --> 00:08:47,070

already and our families already as we

149

00:08:53,810 --> 00:08:50,610

walk to that rocket tomorrow it's with

150

00:08:57,380 --> 00:08:53,820

great love for our family and our

151

00:09:02,150 --> 00:08:57,390

friends and deep deep gratitude all of

152

00:09:11,890 --> 00:09:02,160

you who've and a sense of pride for we

153

00:09:59,930 --> 00:09:52,900

is completed engineer is flight engineer

154

00:10:10,570 --> 00:09:59,940

Tracy Caldwell Dyson congratulation to

155

00:10:17,150 --> 00:10:13,610

company you are representing and please

156

00:10:19,880 --> 00:10:17,160

be clear because we have the interpreter

157

00:10:23,120 --> 00:10:19,890

working here and so please remember that

158

00:10:25,100 --> 00:10:23,130

we have interpretation Rob Navy is from

159

00:10:28,550 --> 00:10:25,110

NASA television several questions for

160

00:10:30,949 --> 00:10:28,560

Tracy your launch tomorrow occurs just

161

00:10:32,960 --> 00:10:30,959

three hours before the countdown begins

162

00:10:35,120 --> 00:10:32,970

for Discovery's launch next monday from

163

00:10:37,850 --> 00:10:35,130

the Kennedy Space Center can you offer a

164

00:10:38,960 --> 00:10:37,860

few thoughts on the symmetry the

165

00:10:41,350 --> 00:10:38,970

integration of these

166

00:10:44,030 --> 00:10:41,360

two vehicles heading for the same

167

00:10:45,740 --> 00:10:44,040

destination and how busy are you going

168

00:10:48,790 --> 00:10:45,750

to be next week when they arrived

169

00:10:51,740 --> 00:10:48,800

what positively reading and NASA

170

00:10:55,369 --> 00:10:51,750

whisperer Tracy called was banished to

171

00:11:00,759 --> 00:10:55,379

that reverse start states of Savalas

172

00:11:04,939 --> 00:11:00,769

reaches though Michelle I should start

173

00:11:09,230 --> 00:11:04,949

shuttle procedure chemistry to do my

174

00:11:11,720 --> 00:11:09,240

Papa do the war CAC what it would do a

175

00:11:14,929 --> 00:11:11,730

cosmic operatic Ettore made that noise -

177  
00:11:24,230 --> 00:11:20,850  
must be establishing a border thanks for

178  
00:11:26,059 --> 00:11:24,240  
I can say personally I think it rocks

179  
00:11:28,309 --> 00:11:26,069  
I'm really excited

180  
00:11:31,009 --> 00:11:28,319  
these are some great friends of mine on

181  
00:11:33,199 --> 00:11:31,019  
this shuttle and I've flown with some of

182  
00:11:35,329 --> 00:11:33,209  
them and I've seen saying with some of

183  
00:11:37,040 --> 00:11:35,339  
them and I've shared a lot of dinners

184  
00:11:39,259 --> 00:11:37,050  
and good times with these folks and I'm

185  
00:11:42,079 --> 00:11:39,269  
delighted for them and just ecstatic

186  
00:11:43,490 --> 00:11:42,089  
that the timing has worked out for us to

187  
00:11:46,129 --> 00:11:43,500  
be in space together

188  
00:11:49,670 --> 00:11:46,139

but what this means on a larger scale is

189

00:11:52,639 --> 00:11:49,680

it really brings out the essence of our

190

00:11:54,949 --> 00:11:52,649

International Space Station and our

191

00:11:57,230 --> 00:11:54,959

program that we could have a shuttle and

192

00:12:00,679 --> 00:11:57,240

a soyluz launching within days of each

193

00:12:03,949 --> 00:12:00,689

other and how we can integrate and add

194

00:12:05,569 --> 00:12:03,959

to the already complex nature of what we

195

00:12:09,740 --> 00:12:05,579

do and the business that were in

196

00:12:11,509 --> 00:12:09,750

so it encompasses a lot and it's made

197

00:12:16,090 --> 00:12:11,519

even better by the events that surround

198

00:12:18,829 --> 00:12:16,100

this month Easter many first flights and

199

00:12:23,569 --> 00:12:18,839

there's just a great deal of

200

over the next half year highlighted by a

216

00:13:16,519 --> 00:13:14,879

restoration of the station to a

217

00:13:19,040 --> 00:13:16,529

six-person crew for the first time since

218

00:13:21,110 --> 00:13:19,050

November and the start of a year

219

00:13:22,189 --> 00:13:21,120

actually in which we head down the

220

00:13:25,210 --> 00:13:22,199

homestretch in the history of the

221

capacious teach lien of mortal was not

229

00:13:56,449 --> 00:13:53,670

well definitely the vehicle traffic

230

00:13:58,699 --> 00:13:56,459

coming our way is part of what makes

231

00:14:02,569 --> 00:13:58,709

this so complex and so busy for us

232

00:14:05,780 --> 00:14:02,579

having three shuttles potentially three

233

00:14:07,280 --> 00:14:05,790

progress and a crew leaving and a crew

234

00:14:11,150 --> 00:14:07,290

coming during the time period that will

235

00:14:14,420 --> 00:14:11,160

be on orbit will be hopping will be on

236

00:14:16,220 --> 00:14:14,430

our toes and especially when we first

237

00:14:19,699 --> 00:14:16,230

arrive being ready for a shuttle to

238

00:14:24,079 --> 00:14:19,709

arrive we'll make our adaptation period

239

00:14:24,949 --> 00:14:24,089

quite interesting and will be energetic

240

00:14:30,619 --> 00:14:24,959

and ready for it

241

00:14:33,860 --> 00:14:30,629

the what this means is the shuttle comes

242

00:14:37,519 --> 00:14:33,870

to a close it's a well if you think

243

00:14:40,669 --> 00:14:37,529

about the fact that our station is near

244

00:14:45,410 --> 00:14:40,679

its completion in terms of its assembly

245

00:14:47,689 --> 00:14:45,420

it's almost it's coincidental incidental

246

00:14:50,569 --> 00:14:47,699

bittersweet that our shuttle program

247

00:14:54,110 --> 00:14:50,579

comes to its close as well and I imagine

248

00:14:57,350 --> 00:14:54,120

that with each shuttle that arrives in

249

00:15:00,710 --> 00:14:57,360

fact if we're fortunate enough to to see

250

00:15:01,560 --> 00:15:00,720

you lf6 comm our way we will be able to

251

00:15:05,010 --> 00:15:01,570

see each

252

00:15:06,570 --> 00:15:05,020

of our orbiters of the tired fleet come

253

00:15:10,560 --> 00:15:06,580

docked to the space station and for me

254

00:15:13,530 --> 00:15:10,570

personally having been a dreamer of this

255

00:15:16,190 --> 00:15:13,540

program for so long that is for me

256

00:15:18,780 --> 00:15:16,200

personally significant but I think also

257

00:15:23,780 --> 00:15:18,790

significant for our station as well to

258

00:15:30,920 --> 00:15:23,790

to be able to say farewell to such great

259

00:15:37,860 --> 00:15:34,140

disputing a national program about

260

00:15:40,740 --> 00:15:37,870

Nemanja the group cool traffic up a lot

261

276

00:16:44,070 --> 00:16:41,440

question station my question is for

277

00:16:45,930 --> 00:16:44,080

Alexander and Tracy Alexander is a crew

278

00:16:48,570 --> 00:16:45,940

commander I know that all three of you

279

00:16:49,950 --> 00:16:48,580

will be celebrating birthdays in orbit

280

00:16:55,260 --> 00:16:49,960

and for all of you this will be your

281

00:16:57,780 --> 00:16:55,270

first birthdays have you decided how you

282

00:16:59,730 --> 00:16:57,790

once said that your long hair can become

283

00:17:04,669 --> 00:16:59,740

a problem during your flight how we're

284

00:17:11,039 --> 00:17:09,149

no ma'am the other issue well we haven't

285

00:17:13,049 --> 00:17:11,049

really decided how we're going to

286

00:17:15,240 --> 00:17:13,059

celebrate our birthdays because I know

287

00:17:17,100 --> 00:17:15,250

that this is not going to be an off-duty

288

00:17:21,120 --> 00:17:17,110

day for the crew none of their birthday

289

00:17:23,749 --> 00:17:21,130

fall under the four official holidays

290

00:17:25,829 --> 00:17:23,759

that the crew will be given during their

291

00:17:27,990 --> 00:17:25,839

expedition but I think in the evening

292

00:17:32,159 --> 00:17:28,000

we'll get together around the table in

293

00:17:34,889 --> 00:17:32,169

the service module this is a tradition

294

00:17:37,230 --> 00:17:34,899

for the crew and so I'm sure we'll wish

295

00:17:39,090 --> 00:17:37,240

each other happy birthdays we'll be

296

00:17:41,490 --> 00:17:39,100

celebrating Mikhail's birthday first and

297

00:17:45,779 --> 00:17:41,500

mine and then Tracy's can you tell us

298

00:17:47,820 --> 00:17:45,789

more about the soccer match well it's

299

00:17:57,139 --> 00:17:47,830

funny Tracy and I were smiling about it

300

00:18:01,680 --> 00:17:59,490

as well and so we were laughing about

301  
00:18:05,240 --> 00:18:01,690  
how we're gonna play soccer in space and

302  
00:18:08,820 --> 00:18:05,250  
who's gonna play the role of the ball

303  
00:18:10,950 --> 00:18:08,830  
probably thinking about it during the

304  
00:18:12,960 --> 00:18:10,960  
launch yeah so we'll wait until we're

305  
00:18:15,080 --> 00:18:12,970  
not one orbit to decide how we're gonna

306  
00:18:22,200 --> 00:18:15,090  
play soccer but also I wanted to add

307  
00:18:24,659 --> 00:18:22,210  
just today is April 1st I wanted to joke

308  
00:18:28,369 --> 00:18:24,669  
a little bit my father lives in Odessa

309  
00:18:29,549 --> 00:18:28,379  
and it's a it's an official holiday in

310  
00:18:42,629 --> 00:18:29,559  
Odessa

311  
00:18:44,850 --> 00:18:42,639  
it's a humor day his wife and tell her

312  
00:18:47,249 --> 00:18:44,860  
that he is he's the one flying in space

313  
00:18:52,259 --> 00:18:47,259

instead of me it's just April Fool's Day

314

00:18:54,930 --> 00:18:52,269

joke so I think we're gonna have fun

315

00:18:59,759 --> 00:18:54,940

during our expedition there was a

316

00:19:01,710 --> 00:18:59,769

question for Tracy mentioned that your

317

00:19:04,710 --> 00:19:01,720

long hair may become a problem in space

318

00:19:06,360 --> 00:19:04,720

how are you going to solve it well I

319

00:19:07,830 --> 00:19:06,370

just ask everybody to stay tuned because

320

00:19:08,249 --> 00:19:07,840

I'm going to try to figure it out as I

321

00:19:11,660 --> 00:19:08,259

go along

322

00:19:15,500 --> 00:19:11,670

I think

323

00:19:18,020 --> 00:19:15,510

I'm not going as far as Scott there's a

324

00:19:20,630 --> 00:19:18,030

limit and that's it

325

00:19:23,360 --> 00:19:20,640

but women face a real challenge in orbit

326

00:19:27,500 --> 00:19:23,370

it it's a brings a lot of laughter and

327

00:19:30,320 --> 00:19:27,510

humor but it really is a quite a job to

328

00:19:32,260 --> 00:19:30,330

maintain your hair in orbit and I don't

329

00:19:35,660 --> 00:19:32,270

know if any of us have really found the

330

00:19:37,910 --> 00:19:35,670

answer but it's a very personal choice

331

00:19:40,070 --> 00:19:37,920

how you keep your hair I think

332

00:19:42,800 --> 00:19:40,080

washing it is about the most difficult

333

00:19:45,290 --> 00:19:42,810

and Scott likes to joke we flew on a

334

00:19:47,420 --> 00:19:45,300

shuttle together and he says that he

335

00:19:49,820 --> 00:19:47,430

heard me complain twice on orbit and

336

00:19:50,780 --> 00:19:49,830

both times it was about my hair so it

337

00:19:53,540 --> 00:19:50,790

remains to be seen

338

00:19:55,700 --> 00:19:53,550

and I hope in six months I'll be able to

339

00:19:57,440 --> 00:19:55,710

come back with some suggestions for gals

340

00:20:00,260 --> 00:19:57,450

that want to keep their maybe a haircut

341

00:20:01,790 --> 00:20:00,270

on orbit maybe I'm not going as far as

342

00:20:05,990 --> 00:20:01,800

sandy Williams went and cutting off my

343

00:20:12,140 --> 00:20:06,000

ponytail once I'm up there but I might

344

00:20:16,460 --> 00:20:12,150

get a trimmer to thank you what was I

345

00:20:19,250 --> 00:20:16,470

refugio problemo in native Des Moines

361  
00:21:22,850 --> 00:21:15,030  
area I think the best solution will be

362  
00:21:25,640 --> 00:21:22,860  
to look like me no st information agency

363  
00:21:28,520 --> 00:21:25,650

dear Cruz I'd like

364

00:21:30,980 --> 00:21:28,530

to congratulate you on the start of your

365

00:21:34,490 --> 00:21:30,990

wonderful flight program and say huge

366

00:21:37,340 --> 00:21:34,500

hello from the from Vitaly Petrov who

367

00:21:40,430 --> 00:21:37,350

participates in Formula One he was not

368

00:21:42,200 --> 00:21:40,440

able to get here but he said that he'll

369

00:21:44,420 --> 00:21:42,210

try to be there for the landing and to

370

00:21:46,250 --> 00:21:44,430

greet the groups back on earth and he

371

00:21:49,220 --> 00:21:46,260

said he'll try to compete with you who's

372

00:21:53,060 --> 00:21:49,230

faster you or him I've been following

373

00:21:56,090 --> 00:21:53,070

him and I think if he only gets as far

374

00:22:00,320 --> 00:21:56,100

as round 10 right but I hope that you'll

375

00:22:04,400 --> 00:22:00,330

support him okay thank you good luck RIA

376

00:22:06,620 --> 00:22:04,410

Novosti Easter will be celebrated by the

377

00:22:08,930 --> 00:22:06,630

Orthodox Christians and Catholics on the

378

00:22:11,720 --> 00:22:08,940

same day April 4th how are you planning

379

00:22:13,640 --> 00:22:11,730

to celebrate this holiday who is this

380

00:22:18,860 --> 00:22:13,650

question for is it for me or for the

381

00:22:25,120 --> 00:22:18,870

entire crew well okay I'll respond for

382

00:22:28,850 --> 00:22:25,130

the entire crew for us Kyle and I are

383

00:22:32,090 --> 00:22:28,860

they believe in God Tracy also so for us

384

00:22:35,090 --> 00:22:32,100

it will be a big holiday and we are

385

00:22:41,240 --> 00:22:35,100

proud that we are launching on Good

386

00:22:44,000 --> 00:22:41,250

Friday and docking on the Easter and so

387

00:22:52,160 --> 00:22:44,010

if a person has God in his or her heart

388

00:22:57,769 --> 00:22:52,170

and then God will help them next

389

00:23:02,989 --> 00:23:00,919

Peter Leonard Associated Press just a

390

00:23:05,389 --> 00:23:02,999

question for Tracy as I understand

391

00:23:08,440 --> 00:23:05,399

you're likely to be leaving the space

392

00:23:10,460 --> 00:23:08,450

station just as the last shuttle is

393

00:23:13,249 --> 00:23:10,470

leaving Earth so you'll be kind of

394

00:23:15,019 --> 00:23:13,259

crossing paths are you disappointed that

395

00:23:17,149 --> 00:23:15,029

you won't be there to see the last

396

00:23:18,499 --> 00:23:17,159

shuttle arriving in the space station

397

00:23:20,239 --> 00:23:18,509

and I was wondering if you could just

398

00:23:27,220 --> 00:23:20,249

elaborate a little bit more on your

399

00:23:32,749 --> 00:23:30,229

Jason yeah point of a shock slopes -

400

00:23:34,369 --> 00:23:32,759

with the crossbow Vietnamization a

401  
00:23:37,249 --> 00:23:34,379  
program which are like a devastating

402  
00:23:40,159 --> 00:23:37,259  
shot who will eat eat nimah glimmers

403  
00:23:43,580 --> 00:23:40,169  
padrone's gazette we coach nearest

404  
00:23:49,340 --> 00:23:43,590  
rowing a team store program a shuttles

405  
00:23:52,580 --> 00:23:49,350  
air shades I do me well I think I would

406  
00:23:54,499 --> 00:23:52,590  
if for lack of a better word say I would

407  
00:23:56,570 --> 00:23:54,509  
be more disappointed just because it's

408  
00:23:59,629 --> 00:23:56,580  
the last shuttle I'd love to be there

409  
00:24:01,549 --> 00:23:59,639  
but I feel pretty blessed as it is just

410  
00:24:06,710 --> 00:24:01,559  
to be in space and to see three of them

411  
00:24:09,859 --> 00:24:06,720  
arrive but my feelings about the last

412  
00:24:12,320 --> 00:24:09,869  
show you know before I ever became an

413  
00:24:15,049 --> 00:24:12,330

astronaut I was pretty impressed and

414

00:24:18,710 --> 00:24:15,059

then when I was selected and began to

415

00:24:21,470 --> 00:24:18,720

train how to operate in the space

416

00:24:25,430 --> 00:24:21,480

shuttle I was not only impressed but I

417

00:24:27,680 --> 00:24:25,440

was in awe of what a magnificent machine

418

00:24:30,229 --> 00:24:27,690

this turtle is and not and then when I

419

00:24:34,399 --> 00:24:30,239

became a crew member training for a

420

00:24:36,710 --> 00:24:34,409

mission I realized just how complex the

421

00:24:39,979 --> 00:24:36,720

shuttle is and it boggled my mind that

422

00:24:43,099 --> 00:24:39,989

not only could we design such a vehicle

423

00:24:45,229 --> 00:24:43,109

to start as a rocket turn into a

424

00:24:49,009 --> 00:24:45,239

spaceship and then become a glider and

425

00:24:52,729 --> 00:24:49,019

all of the systems of this wonderful

426

00:24:55,190 --> 00:24:52,739

vehicle to help support our life and our

427

00:24:59,320 --> 00:24:55,200

mission it when you start to get into

428

00:25:02,659 --> 00:24:59,330

the details of the system it is almost

429

00:25:04,639 --> 00:25:02,669

unbelievable that it it not only was

430

00:25:06,649 --> 00:25:04,649

accomplished but when you think when you

431

00:25:08,090 --> 00:25:06,659

start to realize and work with all of

432

00:25:11,210 --> 00:25:08,100

the people that

433

00:25:15,680 --> 00:25:11,220

come together to create this and to

434

00:25:18,020 --> 00:25:15,690

build it and to operate it it's it's it

435

00:25:25,789 --> 00:25:18,030

takes your breath away and to see that

436

00:25:39,100 --> 00:25:25,799

go away is very bittersweet you need not

437

00:25:45,799 --> 00:25:41,659

economically partial crying II miss you

438

455  
00:26:38,029 --> 00:26:36,240  
bittersweet it's better because we're

456  
00:26:39,710 --> 00:26:38,039  
saying goodbye to such a such a

457  
00:26:41,990 --> 00:26:39,720  
tremendous part of our space program

458  
00:26:44,120 --> 00:26:42,000  
we've spent more time in that shuttle

459  
00:26:46,220 --> 00:26:44,130  
then we have any vehicle and it's

460  
00:26:49,130 --> 00:26:46,230  
blessed us with a Space Station today

461  
00:26:52,940 --> 00:26:49,140  
and many many experienced astronauts and

462  
00:26:56,810 --> 00:26:52,950  
cosmonauts and sweet in that it was so

463  
00:26:59,240 --> 00:26:56,820

successful and it it brings to close in

464

00:27:03,380 --> 00:26:59,250

such a positive light something that

465

00:27:06,710 --> 00:27:03,390

brought us so much success in all sorts

466

00:27:08,779 --> 00:27:06,720

of ways and it sheds new light on where

467

00:27:11,510 --> 00:27:08,789

we're going now with

468

00:27:11,990 --> 00:27:11,520

483

00:28:04,490 --> 00:28:00,420

disasters I know that you will have one

484

00:28:09,110 --> 00:28:04,500

experiment dedicated to this type of

485

00:28:11,750 --> 00:28:09,120

research the consequences of natural

486

00:28:15,050 --> 00:28:11,760

disasters are you planning on observing

487

00:28:17,450 --> 00:28:15,060

earthquakes from space there is a new

488

00:28:23,690 --> 00:28:17,460

experiment that we will be performing on

489

00:28:29,480 --> 00:28:23,700

orbit whose purpose is discovering

490

00:28:34,390 --> 00:28:29,490

earthquakes from space by studying the

491

00:28:36,770 --> 00:28:34,400

high-energy particles that allows

492

00:28:39,140 --> 00:28:36,780

scientists to understand the nature of

493

00:28:43,820 --> 00:28:39,150

the disaster better I hope that it will

494

00:28:47,950 --> 00:28:43,830

help our emergency in ministry to

495

00:28:52,910 --> 00:28:47,960

predict earthquakes better because

496

00:28:55,040 --> 00:28:52,920

timely family preparation always saves

497

00:28:58,180 --> 00:28:55,050

life so we are happy to from this

498

00:29:01,970 --> 00:28:58,190

experiment it is not possible to observe

499

00:29:04,400 --> 00:29:01,980

earthquakes from space but you can try

500

00:29:06,740 --> 00:29:04,410

to predict where they will happen and we

501  
00:29:14,320 --> 00:29:06,750  
will try to assist our scientists our

502  
00:29:21,710 --> 00:29:18,470  
well you girls can spend any Kousaka get

503  
00:29:24,680 --> 00:29:21,720  
the dot are you newspaper my question is

504  
00:29:25,970 --> 00:29:24,690  
for Tracy you trained for the shuttle

505  
00:29:28,690 --> 00:29:25,980  
flight you flew in the shuttle now you

506  
00:29:32,690 --> 00:29:28,700  
trained for the Soyuz flight can you

507  
00:29:33,980 --> 00:29:32,700  
tell us what the difference how this

508  
00:29:35,210 --> 00:29:33,990  
flight will be different from your

509  
00:29:39,320 --> 00:29:35,220  
shadow flight and what do you expect

510  
00:29:41,600 --> 00:29:39,330  
from this vehicle and also for misters

511  
00:29:43,040 --> 00:29:41,610  
quartz quartz offer can you tell us more

512  
00:29:45,410 --> 00:29:43,050  
about other experiments that will be

513  
00:29:49,520 --> 00:29:45,420

performed on board of the Isis in this

514

00:29:52,190 --> 00:29:49,530

expedition that's a really hard question

515

00:29:54,860 --> 00:29:52,200

to answer in a in a nutshell a short

516

00:29:57,530 --> 00:29:54,870

period of time because the two vehicles

517

00:30:00,320 --> 00:29:57,540

though as orbital mechanics would have

518

00:30:02,450 --> 00:30:00,330

it are pretty similar the vehicles

519

00:30:04,760 --> 00:30:02,460

themselves and how we operate is

520

00:30:07,790 --> 00:30:04,770

slightly different my role in the Soyuz

521

00:30:10,910 --> 00:30:07,800

is is a lot different than my role was

522

00:30:14,750 --> 00:30:10,920

on the shuttle the the volume that we'll

523

00:30:17,600 --> 00:30:14,760

be living in is a lot different what is

524

00:30:19,820 --> 00:30:17,610

similar of course is how a vehicle flies

525

00:30:23,150 --> 00:30:19,830

in space and how we get from the ground

526  
00:30:28,460 --> 00:30:23,160  
to to orbit and how we get to a space

527  
00:30:30,860 --> 00:30:28,470  
station and but the the way we go about

528  
00:30:34,810 --> 00:30:30,870  
that on the shuttle it's there's every

529  
00:30:37,250 --> 00:30:34,820  
moment is time lined with activities and

530  
00:30:39,560 --> 00:30:37,260  
we're very busy up until the point we go

531  
00:30:42,620 --> 00:30:39,570  
to bed and we're talking to the ground

532  
00:30:46,370 --> 00:30:42,630  
the entire time and when we're on the

533  
00:30:48,790 --> 00:30:46,380  
Soyuz there's a very large periods of

534  
00:30:52,610 --> 00:30:48,800  
time where it's just the three of us and

535  
00:30:54,470 --> 00:30:52,620  
we are taking care of the vehicle and

536  
00:30:56,690 --> 00:30:54,480  
getting ourselves to the space station

537  
00:31:01,070 --> 00:30:56,700  
so the the time line is a lot different

538  
00:31:05,270 --> 00:31:01,080

and the number of folks on board some

539

thing that's very vastly different that

557  
00:32:10,940 --> 00:32:08,640  
I'm looking forward to experiencing is

558  
00:32:13,580 --> 00:32:10,950  
that in the shuttle once we get to orbit

559  
00:32:17,060 --> 00:32:13,590  
the maneuvers that we make are somewhat

560  
00:32:19,250 --> 00:32:17,070  
subtle inside the the vehicle itself we

561  
00:32:21,919 --> 00:32:19,260  
may feel slight acceleration but for the

562  
00:32:25,310 --> 00:32:21,929  
most part our windows are facing the

563  
00:32:27,260 --> 00:32:25,320

earth and it's pretty calm but in the

564

00:32:29,570 --> 00:32:27,270

Soyuz there we don't have a lot of

565

00:32:32,269 --> 00:32:29,580

volume ourselves to twirl around the

566

00:32:33,980 --> 00:32:32,279

vehicle itself will be in a rotation and

567

00:32:35,990 --> 00:32:33,990

we'll see the earth through a window

568

00:32:39,830 --> 00:32:36,000

it'll be gone and we'll see it again and

569

00:32:41,750 --> 00:32:39,840

I am looking forward to to seeing the

570

00:32:43,639 --> 00:32:41,760

difference between how I felt on the

571

00:32:47,840 --> 00:32:43,649

shuttle and how I'll feel on the Soyuz

572

00:32:50,750 --> 00:32:47,850

given those conditions issues the chorus

573

00:32:55,669 --> 00:32:50,760

small-scale experimental already

587

00:33:48,190 --> 00:33:45,530

answered one question about experiments

588

00:33:49,900 --> 00:33:48,200

but we have 42 experiments scheduled for

589

00:33:52,780 --> 00:33:49,910

our flight so I don't want to talk about

590

00:33:56,380 --> 00:33:52,790

any specific ones not to hurt anyone's

591

00:33:59,170 --> 00:33:56,390

feelings I think it would be unfair if I

592

00:34:00,940 --> 00:33:59,180

single out one or two experiments they

593

00:34:02,890 --> 00:34:00,950

will be unfair to those who have put so

594

00:34:05,560 --> 00:34:02,900

much effort in so much soul into

595

00:34:08,530 --> 00:34:05,570

developing their experiments keep this

596

00:34:12,040 --> 00:34:08,540

tea newspaper Michaela was born in our

597

00:34:16,990 --> 00:34:12,050

wonderful city on the Volga River and I

598

00:34:19,270 --> 00:34:17,000

know how hard his path was to becoming a

599

00:34:21,850 --> 00:34:19,280

cosmonaut in flying space because my

600

00:34:25,270 --> 00:34:21,860

question is for you what would you

601  
00:34:28,060 --> 00:34:25,280  
recommend to today's youth if they want

602  
00:34:32,560 --> 00:34:28,070  
to fly in space how does one become a

603  
00:34:45,129 --> 00:34:32,570  
cosmonaut today it's easier to become a

604  
00:34:48,460 --> 00:34:45,139  
cosmonaut groups one is an arrogant that

605  
00:34:50,740 --> 00:34:48,470  
is the engineers and one is the military

606  
00:34:55,629 --> 00:34:50,750  
pilots now they're planning to combine

607  
00:34:56,919 --> 00:34:55,639  
the true groups so you need to be

608  
00:34:59,890 --> 00:34:56,929  
healthy you need to have higher

609  
00:35:02,260 --> 00:34:59,900  
education and you need to have great

610  
00:35:06,880 --> 00:35:02,270  
desire to fly in space because as you

611  
00:35:11,230 --> 00:35:06,890  
correctly said it's very difficult to

612  
00:35:14,080 --> 00:35:11,240  
become a cosmonaut it's not that you are

613  
00:35:17,350 --> 00:35:14,090

selected in the cosmic core and then you

614

00:35:19,270 --> 00:35:17,360

fly the next day as you heard it was

615

00:35:23,440 --> 00:35:19,280

over a decade for both of me and

616

00:35:25,890 --> 00:35:23,450

Alexander to finally get to the day when

617

00:35:29,080 --> 00:35:25,900

we fly in space and then somebody also

618

00:35:32,410 --> 00:35:29,090

calculated that an average crew member

619

00:35:32,900 --> 00:35:32,420

has to pass over 200 exams before his

620

00:35:35,390 --> 00:35:32,910

license

621

00:35:38,029 --> 00:35:35,400

space and now I think this number is

622

00:35:40,880 --> 00:35:38,039

doubled because you we also have to

623

00:35:43,069 --> 00:35:40,890

train in the US for which by the way we

624

00:35:46,400 --> 00:35:43,079

need to learn the English language and

625

00:35:54,319 --> 00:35:46,410

also we travel to Japan and Europe and

626

00:35:58,059 --> 00:35:54,329

Canada to study as well the main thing

627

00:36:01,490 --> 00:35:58,069

is to have a clear goal in mind and move

628

00:36:05,380 --> 00:36:01,500

with the purpose towards a goal you

629

00:36:13,549 --> 00:36:08,960

young lady here Nastya Berezovsky who is

630

00:36:16,370 --> 00:36:13,559

the winner of the competition for the

631

00:36:18,579 --> 00:36:16,380

emblem so here she is she would like to

632

00:36:22,910 --> 00:36:18,589

say a few words to you congratulations

633

00:36:27,740 --> 00:36:22,920

on your flight especially for the backup

634

00:36:29,990 --> 00:36:27,750

crew and also for Tracy for mr. Carney

635

00:36:34,640 --> 00:36:30,000

income is rose quartz off I wish you a

636

00:36:38,120 --> 00:36:34,650

successful flight and also I hope that

637

00:36:42,799 --> 00:36:38,130

you will use my second patch a designer

638

00:36:44,480 --> 00:36:42,809

Fourier space soccer last yeah we loved

639

00:36:48,380 --> 00:36:44,490

your first design as well thank you very

640

00:36:52,490 --> 00:36:48,390

much it was very nice for me I was very

641

00:36:53,510 --> 00:36:52,500

happy to learn when your name was

642

00:36:55,069 --> 00:36:53,520

announced as the winner of the

643

00:36:57,500 --> 00:36:55,079

competition that you were born in coach

644

00:37:00,140 --> 00:36:57,510

Adams good because I used to fly over

645

00:37:04,609 --> 00:37:00,150

your city fairly often so thank you very

646

00:37:10,130 --> 00:37:04,619

much now for the soccer doing well we'll

647

00:37:11,750 --> 00:37:10,140

figure something out thank you also

648

00:37:16,660 --> 00:37:11,760

thank you that you're wearing the

649

00:37:21,200 --> 00:37:16,670

t-shirt two million that we've designed

650

00:37:25,279 --> 00:37:21,210

together with Ross cosmos management mr.

651  
00:37:27,819 --> 00:37:25,289  
Perlman are participated in this Nastya

652  
00:37:30,410 --> 00:37:27,829  
has prepared the presents for you and

653  
00:37:40,990 --> 00:37:30,420  
crew Doc's will give them to you and

654  
00:37:55,820 --> 00:37:53,660  
so we do get presents the cigarette

655  
00:38:04,460 --> 00:37:55,830  
football feel nice after this we simply

656  
00:38:11,570 --> 00:38:04,470  
must play soccer in space thank you very

657  
00:38:19,990 --> 00:38:11,580  
much thank you sweetie hello a number of

658  
00:38:23,720 --> 00:38:20,000  
you over our endeavour channel song

659  
00:38:30,579 --> 00:38:23,730  
watching Earth from a window why did

660  
00:38:36,370 --> 00:38:33,440  
because probably it's a good song

661  
00:38:41,930 --> 00:38:36,380  
first of all that everybody liked

662  
00:38:45,680 --> 00:38:41,940  
cosmonauts like just like the movie the

663  
00:38:47,240 --> 00:38:45,690

white Sun of the desert has a big symbol

664

00:38:49,820 --> 00:38:47,250

that day every cool

665

00:38:52,400 --> 00:38:49,830

every crew watches this film before

666

00:38:54,530 --> 00:38:52,410

their flight so the same goes for the

667

00:39:01,849 --> 00:38:54,540

songs that it became our pre-launch

668

00:39:04,849 --> 00:39:01,859

songs Pony - now you also asked us to

669

00:39:07,940 --> 00:39:04,859

sing the song but I worry that it's not

670

00:39:10,609 --> 00:39:07,950

gonna be very pleasing to everyone here

671

00:39:12,349 --> 00:39:10,619

if I start singing Tracy is the best

672

00:39:14,480 --> 00:39:12,359

singer here but unfortunately she

673

00:39:16,220 --> 00:39:14,490

probably doesn't know the words to this

674

00:39:18,940 --> 00:39:16,230

particular song she knows a few Russian

675

00:39:21,950 --> 00:39:18,950

songs and she sings them wonderfully but

676

00:39:24,290 --> 00:39:21,960

maybe Sasha will volunteer to sing this

677

00:39:26,300 --> 00:39:24,300

is my favorite song actually it's a

678

00:39:28,990 --> 00:39:26,310

ringtone on my phone and if you and I

679

00:39:31,730 --> 00:39:29,000

can just play the ringtone for you

680

00:39:37,700 --> 00:39:31,740

Alexander can you sing a few lines for

681

00:39:42,230 --> 00:39:37,710

us sorry I'm not in the mood for singing

682

00:39:45,589 --> 00:39:42,240

today and it's true Tracy has a

683

00:39:47,870 --> 00:39:45,599

wonderful voice and she showed it she

684

00:39:50,280 --> 00:39:47,880

demonstrated it to us yesterday

685

00:39:57,780 --> 00:39:50,290

but I'm sure she'll learn the words to

686

00:40:00,300 --> 00:39:57,790

the song the significance because I was

687

00:40:03,720 --> 00:40:00,310

I was a backup crew member and when I

688

00:40:08,099 --> 00:40:03,730

hear the song I know that my skin crawls

689

00:40:16,740 --> 00:40:08,109

with excitement and I hope Tracy can

690

00:40:22,790 --> 00:40:16,750

sing something maybe at least one spicy

691

00:40:29,130 --> 00:40:26,910

fragment is here today and we wanted to

692

00:40:33,330 --> 00:40:29,140

say a few words for you and he is here

693

00:40:35,070 --> 00:40:33,340

to sing his song hello first of all I

694

00:40:40,380 --> 00:40:35,080

want to congratulate you and wish you a

695

00:40:45,359 --> 00:40:40,390

successful launch and also want to give

696

00:40:47,490 --> 00:40:45,369

you a new version of the song back in

697

00:40:51,359 --> 00:40:47,500

the Soviet times there was a supermax

698

00:40:54,030 --> 00:40:51,369

eat bad that was pretty popular and so

699

00:40:56,370 --> 00:40:54,040

we think that song together and so this

700

00:41:02,750 --> 00:40:56,380

is a joint collaboration now so I want

701  
00:41:07,920 --> 00:41:02,760  
to add that 2009 was celebrated 30 years

702  
00:41:12,120 --> 00:41:07,930  
for our band this song is almost 30

703  
00:41:14,790 --> 00:41:12,130  
years old - so this is all for you to

704  
00:41:21,349 --> 00:41:14,800  
make it more fun to be in space who

705  
00:41:31,260 --> 00:41:25,800  
I'm not gonna take any more time but

706  
00:41:33,960 --> 00:41:31,270  
I'll go ahead and think Jackson

707  
00:41:39,120 --> 00:41:33,970  
Christina Marty Carson drew shitamachi

708  
00:41:42,270 --> 00:41:39,130  
Bruce Timm Madonna as most young women

709  
00:41:46,349 --> 00:41:42,280  
here as most young women here should be

710  
00:41:49,589 --> 00:41:46,359  
listen of shiitake salad me like kisses

711  
00:41:54,839 --> 00:41:49,599  
at Mina carcasses at minions Leah

712  
00:41:58,069 --> 00:41:54,849

Allegiant aha cinema three steel basket

716

00:42:26,849 --> 00:42:24,640

Sonam good job everyone thank you thank

717

00:42:30,329 --> 00:42:26,859

you very much thank you

718

00:42:39,599 --> 00:42:30,339

unfortunately can I have the microphone

719

00:42:41,520 --> 00:42:39,609

please first second the our musicians

720

00:42:43,500 --> 00:42:41,530

wanted to go back to Moscow soon as they

721

00:42:46,500 --> 00:42:43,510

can but I would actually like to propose

722

00:42:47,490 --> 00:42:46,510

keeping them here in Baikonur okay thank

723

00:42:49,109 --> 00:42:47,500

you very much

724

00:42:51,329 --> 00:42:49,119

unfortunately we're out of time thank

725

00:42:54,109 --> 00:42:51,339

you to the crew we need to leave a

726

00:42:59,589 --> 00:42:54,119

little time for group pictures as well

727

00:43:10,960 --> 00:43:06,479

a lot students do casual

728

00:43:20,099 --> 00:43:10,970

marsala stuff laughing please love the

729

00:43:20,109 --> 00:43:45,040

please stand closer to each other

730

00:43:45,050 --> 00:44:00,820

let's do

731

00:44:06,650 --> 00:44:02,930

Aleksandra when you each apostles Thomas

732

00:44:09,500 --> 00:44:06,660

Alexander please stay here we would like

733

00:44:12,830 --> 00:44:09,510

to also have you step closer to the

734

00:44:36,950 --> 00:44:12,840

mirror later and to the window later and

735

00:44:39,410 --> 00:44:36,960

we'll take more photographs shake thank

736

00:44:50,750 --> 00:44:39,420

you very much - now with the backup crew

737

00:45:42,740 --> 00:44:50,760

here in front of the stable step closer

738

00:45:52,140 --> 00:45:49,220

until procedure to be little shaky but

739

00:45:59,730 --> 00:45:52,150

also I wanted to invite the backup crews

740

00:46:02,160 --> 00:45:59,740

to visit us in our city press conference

741

00:46:04,700 --> 00:46:02,170

is complete I apologize to those who

742

00:46:06,839 --> 00:46:04,710

didn't get a chance to ask questions

743

00:46:07,950 --> 00:46:06,849

because we're out of time okay I think

744

00:46:10,279 --> 00:46:07,960

there was something important that

745

00:46:13,710 --> 00:46:10,289

somebody wants to say you Rena

746

00:46:16,920 --> 00:46:13,720

Dinko from the antidote are you what is

747

00:46:19,079 --> 00:46:16,930

surgery that's good for the mascot for

748

00:46:23,009 --> 00:46:19,089

the crew and what's gonna happen to it

749

00:46:24,410 --> 00:46:23,019

after you get to the SS yes we have a

750

00:46:26,309 --> 00:46:24,420

little symbol

751

00:46:31,220 --> 00:46:26,319

unfortunately I can't show it because

752

00:46:36,960 --> 00:46:34,559

certified for flight so it's there we

753

00:46:39,329 --> 00:46:36,970

have our own and the one that we have is

754

00:46:43,620 --> 00:46:39,339

the weightlessness indicator a little

755

00:46:50,670 --> 00:46:43,630

ducky Tracy and I decided to name him

756

00:46:58,470 --> 00:46:50,680

quack it has a very nice color green and

757

00:47:02,880 --> 00:46:58,480

yellow very soothing with this indicator

758

00:47:07,499 --> 00:47:02,890

and Cooper carrots - thank you during

759

00:47:11,900 --> 00:47:07,509

second 528 it will indicate that the

760

00:47:19,260 --> 00:47:15,450

okay thank you very much to everyone I'm
