

1
00:00:10,790 --> 00:00:08,629
hi my name is dave samira i'm from

2
00:00:11,910 --> 00:00:10,800
fredericksburg virginia i was really

3
00:00:13,350 --> 00:00:11,920
excited about getting to tweet up

4
00:00:14,629 --> 00:00:13,360
because i've been a big fan of nest for

5
00:00:16,470 --> 00:00:14,639
a long time but what i learned today is

6
00:00:17,590 --> 00:00:16,480
that nasa is not about

7
00:00:22,390 --> 00:00:17,600
space

8
00:00:25,589 --> 00:00:22,400
is phenomenally

9
00:00:28,230 --> 00:00:25,599
exciting hi i'm bob price and i'm from

10
00:00:30,150 --> 00:00:28,240
cary north carolina and i've really

11
00:00:32,709 --> 00:00:30,160
enjoyed the tweet up here i think

12
00:00:35,110 --> 00:00:32,719
there's been some great uh lectures and

13
00:00:36,950 --> 00:00:35,120

by some great folks very knowledgeable

14

00:00:37,670 --> 00:00:36,960

and i'm certainly glad i got to come up

15

00:00:39,030 --> 00:00:37,680

to

16

00:00:41,190 --> 00:00:39,040

the tweet up there

17

00:00:43,590 --> 00:00:41,200

and hi my name is bj price i'm from

18

00:00:45,590 --> 00:00:43,600

orlando florida and we get to see a lot

19

00:00:47,830 --> 00:00:45,600

of the space shuttle science in florida

20

00:00:49,830 --> 00:00:47,840

but the climate science is amazing and

21

00:00:51,430 --> 00:00:49,840

the opportunity for nasa to share with

22

00:01:00,950 --> 00:00:51,440

us a great deal of the earth science

23

00:01:04,390 --> 00:01:02,069

well i thought this was really cool

24

00:01:05,670 --> 00:01:04,400

because this was the first earth science

25

00:01:07,270 --> 00:01:05,680

tweet up that

26

00:01:09,750 --> 00:01:07,280

certainly the one that i've been to and

27

00:01:12,230 --> 00:01:09,760

i loved watching the time lapse videos

28

00:01:14,070 --> 00:01:12,240

earlier of the the effect that climate

29

00:01:16,870 --> 00:01:14,080

change is having on

30

00:01:18,390 --> 00:01:16,880

the glaciers they retract and some of

31

00:01:19,749 --> 00:01:18,400

them are going away

32

00:01:21,429 --> 00:01:19,759

and something i've always thought is

33

00:01:24,630 --> 00:01:21,439

interesting is of course clearly people

34

00:01:26,710 --> 00:01:24,640

have a certain idea of what what nasa is

35

00:01:28,390 --> 00:01:26,720

what nasa does and oftentimes people are

36

00:01:30,630 --> 00:01:28,400

so focused on the whole

37

00:01:32,550 --> 00:01:30,640

uh getting away from earth is that they

38

00:01:34,310 --> 00:01:32,560

forget the fact that there is a lot of

39

00:01:35,990 --> 00:01:34,320

ass vital nasa research that's done

40

00:01:37,830 --> 00:01:36,000

about our own climate and our things

41

00:01:40,550 --> 00:01:37,840

that are looking back at the planet

42

00:01:43,429 --> 00:01:40,560

right here is relay i'm from sao paulo

43

00:01:47,190 --> 00:01:43,439

brazil i just came to know something

44

00:01:49,030 --> 00:01:47,200

about nasa and i was very very
