

1
00:00:22,070 --> 00:00:11,910
undocking confirmed at 704 pm central

2
00:00:26,790 --> 00:00:25,189
himself has compiled 360 days in space

3
00:00:28,950 --> 00:00:26,800
on his two

4
00:00:31,429 --> 00:00:28,960
missions it's almost a year

5
00:02:20,309 --> 00:00:31,439
creamer has 163 days under his belt and

6
00:02:20,319 --> 00:02:34,830
very good

7
00:02:41,830 --> 00:02:38,869
tp so use castle he is in his chair

8
00:02:43,670 --> 00:02:41,840
the crew is looking in great tree

9
00:02:46,630 --> 00:02:43,680
allen cooked off

10
00:02:48,070 --> 00:02:46,640
extending his arms congratulatory

11
00:02:50,550 --> 00:02:48,080
signal

12
00:02:52,710 --> 00:02:50,560
everything is good they landed in fairly

13
00:02:56,309 --> 00:02:52,720

uh even terrain

14

00:02:58,070 --> 00:02:56,319

uh just uh to the east of jessica's gone

15

00:03:01,030 --> 00:02:58,080

it was an on target landing so each

16

00:03:03,750 --> 00:03:01,040

indiguchi is flashing a thumbs up sign

17

00:03:05,430 --> 00:03:03,760

to a board of japanese photographers and

18

00:03:08,149 --> 00:03:05,440

journalists who are on hand here at the

19

00:03:11,670 --> 00:03:08,159

landing site alec kotov

20

00:03:15,430 --> 00:03:14,229

tj creamer laughing and now having an

21

00:03:17,430 --> 00:03:15,440

opportunity

22

00:03:21,589 --> 00:03:17,440

to munch into an apple that was brought

23

00:03:26,149 --> 00:03:23,509

the soyuz did in fact land on the side

24

00:03:28,789 --> 00:03:26,159

the crew was extracted uh horizontally

25

00:03:30,550 --> 00:03:28,799

rather than vertical this is typical not

26

00:03:34,149 --> 00:03:30,560

too much wind out here today a very

27

00:03:38,309 --> 00:03:35,589

a lot of charring

28

00:03:40,470 --> 00:03:38,319

from the heat of atmospheric injury

29

00:03:43,110 --> 00:03:40,480

everything looks in great shape and this

30

00:03:44,949 --> 00:03:43,120

crew after 163 days in space is doing

31

00:03:46,710 --> 00:03:44,959

just great

32

00:03:49,589 --> 00:03:46,720

well the today's activity that began

33

00:03:51,990 --> 00:03:49,599

with the soyuz undocking next to a

34

00:03:53,990 --> 00:03:52,000

beautiful moon that hung over the limb

35

00:03:55,190 --> 00:03:54,000

of the earth ends in

36

00:03:57,589 --> 00:03:55,200

beautiful

37

00:03:59,429 --> 00:03:57,599

clear skies here at the landing site a

38

00:04:01,190 --> 00:03:59,439

perfect end to a mission

39

00:04:02,949 --> 00:04:01,200

that saw

40

00:04:05,910 --> 00:04:02,959

three space shuttles visiting the

41

00:04:08,149 --> 00:04:05,920

expedition 23 crew the rains uh now in
