00:08:24,250 --> 00:08:22,430

used for the future and the stepping

155

00:08:26,710 --> 00:08:24,260

163

00:08:54,550 --> 00:08:50,720

Canadian European NASA and also I would

00:08:56,710 --> 00:08:54,560

like to sit an objective or unit which

165

00:08:59,230 --> 00:08:56,720

you should be striving towards during

166

00:09:02,500 --> 00:08:59,240

your stay on the spaceship on the space

167

00:09:04,630 --> 00:09:02,510

station the new house doesn't miss to do

168

00:09:07,690 --> 00:09:04,640

you believe it would be possible to use

169

00:09:09,580 --> 00:09:07,700

the ISS further on in order to study the

170

00:09:11,070 --> 00:09:09,590

outer space and with that thank you very

171

00:09:15,100 --> 00:09:11,080

270

00:16:13,150 --> 00:16:09,699

thinking lately that there are lots of

271

00:16:15,490 --> 00:16:13,160

American women among the astronauts but

272

00:16:17,530 --> 00:16:15,500

I can hardly recall any Russian woman

273

00:16:19,720 --> 00:16:17,540

that through the space recently do you

274

00:16:22,240 --> 00:16:19,730

have an idea way that so maybe do you

275

00:16:24,790 --> 00:16:22,250

have media have more time Oh spare time

276

00:16:29,470 --> 00:16:24,800

or more courage I don't know thank you

277

00:16:33,160 --> 00:16:29,480

so this is a um enter via Russian

278

television journalist Alexandra Cullinan

279

00:16:41,470 --> 00:16:36,140

so his first question was to filter

280

00:16:45,310 --> 00:16:41,480

Nikolayevich he objection he was asking

281

00:16:50,970 --> 00:16:45,320

about the module that they were

282

00:16:54,579 --> 00:16:50,980

delivering during his visit to ISS and

283

00:16:56,740 --> 00:16:54,589

his question was is the station being

284

00:17:01,319 --> 00:16:56,750

assembled and is it growing is it

285

00:17:09,279 --> 00:17:05,289

295

Suellen so let us start from Shannon's

296

00:17:40,210 --> 00:17:37,100

answer just I give her first go because

297

00:17:43,899 --> 00:17:40,220

this is a good tradition that the first

298

00:17:46,149 --> 00:17:43,909

women goes well I'm not exactly sure how

299

00:17:48,909 --> 00:17:46,159

how I can explain why they're not more

300

00:17:50,529 --> 00:17:48,919

women in the russian cosmonaut Corps I

301
00:17:53,019 --> 00:17:50,539
guess you have to address that question

302
00:17:55,269 --> 00:17:53,029
to the selection committee but there is

303
00:17:57,340 --> 00:17:55,279
one woman in one of the new classes now

304
00:18:01,649 --> 00:17:57,350

Douglas and Shannon is about the the end

404
00:23:02,480 --> 00:23:00,179
of the shuttle program in November you

405
00:23:05,830 --> 00:23:02,490
all of course be some of the few the top

406

407
00:23:10,310 --> 00:23:08,549
shuttle arrive at the space station I'm

408
00:23:10,770 --> 00:23:10,320
wondering first of all what you can tell

409
00:23:12,990 --> 00:23:10,780
us how you

410
00:23:15,600 --> 00:23:13,000
feel about that and secondly whether

shadow of course addressing the shuttle

427
00:24:04,500 --> 00:24:02,500
question first of course it's a it's a

428
00:24:05,940 --> 00:24:04,510
big change in our program a big change

429
00:24:08,150 --> 00:24:05,950
in the way that we've been doing

430
00:24:12,470 --> 00:24:08,160
business over the last several years and

431
00:24:14,970 --> 00:24:12,480
so change is not always bad and it's

432
00:24:17,190 --> 00:24:14,980
we're growing as an agency we're growing

433
00:24:20,610 --> 00:24:17,200
in partnership with our with our

434
00:24:23,550 --> 00:24:20,620
international partners and so by virtue

435
00:24:27,120 --> 00:24:23,560
of the fact that will see their shuttle

436
00:24:28,890 --> 00:24:27,130
retiring during our increment actually

437
00:24:30,270 --> 00:24:28,900
is one of one of the reasons why our

438
00:24:32,580 --> 00:24:30,280

increment is going to be pretty busy

439

00:24:35,490 --> 00:24:32,590

where we're going to be busy

440

00:24:38,430 --> 00:24:35,500

logistically trying to configure the

441

00:24:41,460 --> 00:24:38,440

station as we would need it to be able

442

00:24:44,280 --> 00:24:41,470

to support using the vehicles that will

443

00:24:47,280 --> 00:24:44,290

have for cargo ships and also arch means

444

00:24:51,450 --> 00:24:47,290

of transport back back and forth to the

445

00:24:54,720 --> 00:24:51,460

earth and we're also we will see a

446

00:24:58,530 --> 00:24:54,730

fairly long gap for the next shuttle

447

00:25:01,470 --> 00:24:58,540

flight to arrive and so we have a fair

448

00:25:05,430 --> 00:25:01,480

amount of EVS or spacewalks that will be

449

00:25:09,180 --> 00:25:05,440

doing as well we have three Russian EV

450

00:25:11,520 --> 00:25:09,190

A's that will be theater and our Russian

451
00:25:13,290 --> 00:25:11,530
partners will will go outside and be

452
00:25:15,690 --> 00:25:13,300
doing some configuration on the outside

453
00:25:20,250 --> 00:25:15,700
of the Russian segment and we'll also

454
00:25:22,259 --> 00:25:20,260
have to us Schedule II VA's in August to

455
00:25:24,979 --> 00:25:22,269
do the very same thing too

456
00:25:29,699 --> 00:25:24,989
outfit the station to be a little more

457
00:25:31,739 --> 00:25:29,709
independent of the the heavy lift

458
00:25:34,680 --> 00:25:31,749
capability the feet that the shuttle was

459
00:25:36,539 --> 00:25:34,690
uh was bringing to the station so it's

460
00:25:40,589 --> 00:25:36,549
it's actually bittersweet to see the

461
00:25:43,049 --> 00:25:40,599
shuttle go but it's it's really an

462
00:25:44,729 --> 00:25:43,059
exciting time as well because we're also

463
00:25:47,310 --> 00:25:44,739

going to be the first really the first

464

00:25:49,669 --> 00:25:47,320

increment to really go to full

465

00:25:53,249 --> 00:25:49,679

utilization of the space station as a

466

00:25:55,079 --> 00:25:53,259

orbiting laboratory and like fielder had

467

00:25:57,479 --> 00:25:55,089

mentioned earlier we've now got a

468

00:26:00,659 --> 00:25:57,489

European laboratory we got a Japanese

469

00:26:02,099 --> 00:26:00,669

laboratory the Russian laboratory

470

00:26:04,739 --> 00:26:02,109

experiments we have on a Russian segment

471

00:26:06,539 --> 00:26:04,749

the u.s. laboratory and we've got a

472

00:26:09,690 --> 00:26:06,549

fully functioning orbiting laboratory

473

00:26:12,089 --> 00:26:09,700

that we really now can only begin to

474

00:26:14,069 --> 00:26:12,099

start doing the science that we that we

475

00:26:15,839 --> 00:26:14,079

originally had envisioned on the space

476
00:26:17,699 --> 00:26:15,849
station so we're very excited about that

477
00:26:19,889 --> 00:26:17,709
and that's that's probably the biggest

478
00:26:26,290 --> 00:26:19,899
task that we have is bringing the

508

you know layman's terms to just sum up

509
00:28:07,640 --> 00:28:05,520
whether the space station has fulfilled

510
00:28:10,850 --> 00:28:07,650
those expectations people had when it

511
00:28:12,320 --> 00:28:10,860
was first launched and whether it's it's

512
00:28:14,450 --> 00:28:12,330
really success in what is something like

513
00:28:16,460 --> 00:28:14,460

this is worth persevering with you know

514

00:28:17,690 --> 00:28:16,470

515

522

00:28:43,790 --> 00:28:40,770

one thing I've only got one one flight

523

00:28:46,610 --> 00:28:43,800

into space for just a few days but

524

00:28:48,140 --> 00:28:46,620

actually two weeks for 15 days and but I

525

00:28:50,540 --> 00:28:48,150

did get a chance to do three spacewalks

526
00:28:53,960 --> 00:28:50,550
and see both the inside and the outside

527
00:28:58,370 --> 00:28:53,970
of this this engineering feat that we've

528
00:29:00,380 --> 00:28:58,380
accomplished as a global society really

529
00:29:02,900 --> 00:29:00,390
I mean just all of our international

530
00:29:04,790 --> 00:29:02,910
partners we've pulled together and we've

531
00:29:07,520 --> 00:29:04,800
done things in the engineering world

532
00:29:12,170 --> 00:29:07,530
that were just that only ten years ago

533
00:29:13,880 --> 00:29:12,180
where it seemed to be impossible so did

534
00:29:16,400 --> 00:29:13,890
we think we'd get to this point sooner

535
00:29:20,030 --> 00:29:16,410
yes did we think we'd get to this point

536
00:29:22,520 --> 00:29:20,040
cheaper yes but but the surprises that

537
00:29:25,730 --> 00:29:22,530
we've we have had in space and the

538
00:29:29,720 --> 00:29:25,740

things that we've discovered ways to

539

00:29:32,270 --> 00:29:29,730

engineer new materials ways to

540

00:29:35,210 --> 00:29:32,280

engineer equipment to piece together

541

00:29:36,860 --> 00:29:35,220

once we get it to space pieces of

542

00:29:39,800 --> 00:29:36,870

equipment that may have never seen each

543

00:29:41,870 --> 00:29:39,810

other on the earth but yet we still have

544

00:29:44,150 --> 00:29:41,880

to design these things to fit together

545

00:29:46,670 --> 00:29:44,160

once we get them to space not an easy

546

00:29:49,580 --> 00:29:46,680

feat when you when you have the

547

00:29:52,370 --> 00:29:49,590

temperature changes that we have the the

548

00:29:55,310 --> 00:29:52,380

radiation experience that we have in low

549

00:29:57,020 --> 00:29:55,320

Earth orbit and so so I would say that

550

00:30:00,280 --> 00:29:57,030

the you know we had we had big dreams

551
00:30:04,400 --> 00:30:00,290
and visions are going I'm sorry Anya

552
00:30:06,050 --> 00:30:04,410
okay and and I think that now we're just

553
00:30:08,270 --> 00:30:06,060
getting to that point where we're going

554
00:30:12,260 --> 00:30:08,280
to begin to really see the return on

555
00:30:14,450 --> 00:30:12,270
investment for us I think that

556
00:30:16,790 --> 00:30:14,460
originally like I think your question is

557
00:30:19,640 --> 00:30:16,800
did we intend to get to this point

558
00:30:22,580 --> 00:30:19,650
sooner and the answer to that is yes but

559
00:30:24,620 --> 00:30:22,590
we're very very excited to be sort of on

560
00:30:28,460 --> 00:30:24,630
the cutting edge of that now to be able

561
00:30:30,650 --> 00:30:28,470
to start delivering this back to to the

562
00:30:32,510 --> 00:30:30,660
peoples of our nation's and to be able

563
00:30:35,480 --> 00:30:32,520

to design new materials to be able to

564

00:30:37,850 --> 00:30:35,490

maybe find breakthroughs in medicine

565

00:30:38,870 --> 00:30:37,860

and in science and material design and

566

00:30:42,049 --> 00:30:38,880

things like that and so we're very

567

00:30:51,710 --> 00:30:42,059

excited about it and and we're ready to

568

00:30:54,140 --> 00:30:51,720

worth and the most important thing that

621

00:34:17,680 --> 00:34:16,460

we do is our different nationalities

important is the medical researchers

733

00:40:00,320 --> 00:39:57,690

tourists they had their own experiments

734

00:40:03,020 --> 00:40:00,330

and they were they went through the

735

00:40:06,020 --> 00:40:03,030

training program and of course that not

736

00:40:09,740 --> 00:40:06,030

that experienced and had got good skills

737

00:40:17,230 --> 00:40:09,750

like with you but they were great guys

738

00:40:21,650 --> 00:40:17,240

and they had done a great job in space

739

00:40:26,720 --> 00:40:21,660

well and of course they take her place

740

00:40:29,150 --> 00:40:26,730

of one of us like real cosmos that could

741

00:40:32,020 --> 00:40:29,160

have flown instead of them to space but

742

00:40:36,290 --> 00:40:32,030

i think that that was good program and

743

00:40:39,620 --> 00:40:36,300

for our free time that we have in spit

744

00:40:42,980 --> 00:40:39,630

in space our working day is eight hours

745

00:40:46,760 --> 00:40:42,990

and everything other time we do is

746

00:40:49,670 --> 00:40:46,770

prepare for the next day I like taking

747

00:40:54,050 --> 00:40:49,680

pictures and we are planning to answer

748

00:40:57,530 --> 00:40:54,060

kids questions more this time because

749

00:41:07,400 --> 00:40:57,540

our future is our children and we hope

750

00:41:11,450 --> 00:41:07,410

to them to to bring to to space that's

Capades yet spasiba my question about

765

00:41:54,420 --> 00:41:50,500

the new experiment more specialty now it

766

00:41:57,240 --> 00:41:54,430

has just recently started my question is

767

00:42:00,720 --> 00:41:57,250

to all cosmonauts what is your attitude

768

00:42:03,900 --> 00:42:00,730

to this program to this ground space

769

00:42:06,300 --> 00:42:03,910

program and i heard i have heard that

770

00:42:08,730 --> 00:42:06,310

further is taking something connected

771

00:42:12,990 --> 00:42:08,740

with this program to space what is that

772

00:42:16,140 --> 00:42:13,000

can I wonder and are you going to have

773

00:42:22,110 --> 00:42:16,150

any communication with this ground

774

00:42:25,860 --> 00:42:22,120

cosmos well let me first address Mars

775

00:42:28,470 --> 00:42:25,870

and maybe a goal to reach for our

776

00:42:32,550 --> 00:42:28,480

younger astronauts of the astronauts

777

00:42:35,790 --> 00:42:32,560

over the future and what's it okay

778

00:42:38,190 --> 00:42:35,800

what's exciting for me especially when I

779

00:42:40,170 --> 00:42:38,200

go to talk to young children like we saw

780

00:42:42,420 --> 00:42:40,180

but we see sitting up front here and

781

00:42:45,420 --> 00:42:42,430

also that won the award for the design

782

00:42:48,000 --> 00:42:45,430

of the patch is that I believe that in

783

00:42:52,170 --> 00:42:48,010

25 to 30 years we're going to see the

784

00:42:55,320 --> 00:42:52,180

first humans walking on Mars and I'm

785

00:42:57,000 --> 00:42:55,330

going to be too old but I hope to be in

786

00:43:00,450 --> 00:42:57,010

a rocking chair somewhere with a glass

787

00:43:03,420 --> 00:43:00,460

of tea watching and what's very exciting

788

00:43:05,700 --> 00:43:03,430

for me is that most of our astronauts

789

00:43:08,310 --> 00:43:05,710

are selected when they're in their 30s

790

00:43:10,920 --> 00:43:08,320

and so that means that the first humans

791

00:43:12,870 --> 00:43:10,930

have stepped foot on Mars are our

792

00:43:15,480 --> 00:43:12,880

children somewhere they may be children

793

00:43:16,580 --> 00:43:15,490

sitting in this room or in our school

794

00:43:19,280 --> 00:43:16,590

somewhere

795

00:43:22,000 --> 00:43:19,290

and the exciting thing for me is that

796

00:43:24,620 --> 00:43:22,010

they're there somewhere out there and so

797

00:43:27,230 --> 00:43:24,630

there be there young minds that we're

798

00:43:30,650 --> 00:43:27,240

trying to get excited and interested in

799

00:43:33,020 --> 00:43:30,660

math science and engineering and and

800

00:43:35,750 --> 00:43:33,030

it's just a very exciting time to know

801
00:43:37,820 --> 00:43:35,760
that one of our children will be the

802
00:43:40,730 --> 00:43:37,830
first person on on Mars and we'll be

803
00:43:42,770 --> 00:43:40,740
watching them and and maybe then we'll

804
00:43:44,750 --> 00:43:42,780
be back and they'll be behind this glass

805
00:43:50,600 --> 00:43:44,760
and we'll be able to ask them what it

806
00:43:52,940 --> 00:43:50,610
was like to go to Mars oh the smell

807

on us via Kagome Co spicy so for the

834

00:45:08,450 --> 00:45:05,670

second part of the question you were

835

00:45:11,570 --> 00:45:08,460

asking about something that I'm bringing

836

00:45:13,910 --> 00:45:11,580

to space as a surprise for the Mars

837

00:45:17,090 --> 00:45:13,920

program so this is actually a surprise

838

00:45:20,270 --> 00:45:17,100

so let it stay a surprise I'm going to

839

00:45:23,090 --> 00:45:20,280

get it there and yes actually the answer

840

00:45:26,690 --> 00:45:23,100

is yes I do have something but this is

841

00:45:29,730 --> 00:45:26,700

something we'll go as something else

842

00:45:36,090 --> 00:45:29,740

that I have with me

and me also we're going to do a lot of

883

00:47:34,410 --> 00:47:32,530

experiments and they're all very

884

00:47:37,140 --> 00:47:34,420

interesting but maybe the most

885

00:47:39,900 --> 00:47:37,150

interesting experience both for children

886

flight so you'll see the game and when

893

00:48:04,820 --> 00:48:01,920

you grow up you understand what is

894

00:48:07,940 --> 00:48:04,830

plasma crystal is but now we're going to

895

00:48:10,130 --> 00:48:07,950

work with the crystals to and also we're

896

00:48:15,430 --> 00:48:10,140

going to do some medical experiments

897

00:48:25,240 --> 00:48:15,440

that will help to use to treat and heal

898

00:48:27,860 --> 00:48:25,250

sick people and the last question place

899

00:48:31,100 --> 00:48:27,870

you can choose Nico sentir come across

900

00:48:33,200 --> 00:48:31,110
