1
00:00:06,860 --> 00:00:04,999
sts-133 the crew targeted to launch

2
00:00:09,560 --> 00:00:06,870
aboard space shuttle discovery on

3
00:00:12,320 --> 00:00:09,570
November first participated in a crew

4
00:00:14,270 --> 00:00:12,330
equipment interface test July 9th and

5
00:00:19,820 --> 00:00:14,280
10th at the Kennedy Space Center in

6
00:00:21,769 --> 00:00:19,830
Florida during the test the crew

7
00:00:24,380 --> 00:00:21,779
inspected mission hardware and flight

8
00:00:29,870 --> 00:00:24,390
equipment they'll use in space during

9
00:00:32,060 --> 00:00:29,880
discoveries last scheduled flight 133

10
00:00:34,180 --> 00:00:32,070
crew members include commander steve

11
00:00:37,729 --> 00:00:34,190
lindsey pilot eric boe and mission

12
00:01:35,810 --> 00:00:37,739
specialists alvin drew tim kopra mike

13
00:01:55,550 --> 00:01:38,130

get a scenario where we had to remove

14

00:01:55,560 --> 00:03:01,950

it goes right through that little hole

15

00:03:06,420 --> 00:03:04,050

there are TV tin now that one did you

16

00:03:09,090 --> 00:03:06,430

put our TV on well actually we bond them

17

00:03:11,550 --> 00:03:09,100

in sticking an inch higher up we used to

18

00:03:13,470 --> 00:03:11,560

bond them flush the bond before we used

19

00:03:14,670 --> 00:03:13,480

to pull test in 28 ounces to make sure

20

00:03:16,920 --> 00:03:14,680

they were going through there now with

21

00:03:19,080 --> 00:03:16,930

contestant 25 pounds in multiple

22

00:03:23,760 --> 00:03:19,090

locations so that them in our testing we

23

00:03:27,120 --> 00:03:26,170

it's the brest I'll with the

24

00:03:29,610 --> 00:03:27,130

coat

25

00:03:31,320 --> 00:03:29,620

this coding is only about the thickness

26

00:03:33,390 --> 00:03:31,330

of an eggshell this coating actually

27

00:03:35,370 --> 00:03:33,400

impregnates a couple hundred thousands

28

00:04:28,160 --> 00:03:35,380

into the tile so we can actually machine

29

00:05:37,650 --> 00:04:30,600

right some of the Y in there right again

30

00:05:47,430 --> 00:05:39,700

so we just bring out it back at the time

31

00:06:30,409 --> 00:05:50,080

or is that the NBL are exactly one yeah

32

00:06:30,419 --> 00:06:59,200

the socket that's nothing

33

00:07:17,090 --> 00:07:03,200

soft soft doc you bringing eight hits
